# **Automobile Engineering**

**Department Name: -Automobile Engineering** 

- UG Program Name: B.Tech. Mechanical Engineering Automobile & B.Tech. Automobile Engineering
- Vision and Mission: -

**Vision -** To offer programs of global repute with an emphasis on academics, research and innovation to provide competent and efficient human resources in the field of automotive engineering to fulfil the needs of the society.

#### Mission -

- 1. To design and enrich the curricula based on changing needs of industry and society.
- 2. To develop a center of excellence to promote automotive research and attract industry assignments.
- 3. To provide an excellent academic environment for development of competent automotive professionals to meet industry expectations.
- 4. To ensure participation of every stakeholder to enhance effectiveness of the programs being offered.

Sr. No.	Program Outcomes
1.	Apply the knowledge of mathematics, science, engineering fundamentals, and an
	engineering specialization to the solution of complex engineering problems
2.	Identify, formulate, review research literature, and analyse complex engineering problems
	reaching substantiated conclusions using first principles of mathematics, natural sciences
	and engineering sciences
3.	Design solutions for complex engineering problems and design system components or
	processes that meet the specified needs with appropriate consideration for the public health
	and safety, and the cultural, societal, and environmental considerations
4.	Use research-based knowledge and research methods including design of experiments,
	analysis and interpretation of data, and synthesis of the information to provide valid
	conclusions for complex problems
5.	Create, select, and apply appropriate techniques, resources, and modern engineering and IT
	tools including prediction and modeling to complex engineering activities with an
	understanding of the limitations
6.	Apply reasoning informed by the contextual knowledge to assess societal, health, safety,
	legal and cultural issues and the consequent responsibilities relevant to the professional
7	engineering practice
7.	Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable
	development
8.	Apply ethical principles and commit to professional ethics and responsibilities and norms
0.	of the engineering practice
9.	Function effectively as an individual, and as a member or leader in diverse teams, and in
· · · · · · · · · · · · · · · · · · ·	multidisciplinary settings
10.	Communicate effectively on complex engineering activities with the engineering
	community and with society at large, such as, being able to comprehend and write effective
	reports and design documentation, make effective presentations, and give and receive clear
	instructions
11.	Demonstrate knowledge and understanding of the engineering and management principles
	and apply these to one's own work, as a member and leader in a team, to manage projects
	and in multidisciplinary environments
12.	Recognize the need for, and have the preparation and ability to engage in independent and
	lifelong learning in the broadest context of technological change

Sr. No.	Program Specific Outcomes				
1.	Diagnose the automotive system failures and repair / replace the components / systems so				
	as to bring the vehicle in original condition.				
2.	Perform the role of motor claim approver and loss assessor with confidence and				
	competence.				

# S. Y. B. Tech. (Mechanical Engineering Automobile)

	Solve mechanical engineering
	ns using Linear Differential
Co:2 Equation problem	
I Hngineering	olve Engineering problems using e Transform.
differer	Apply knowledge of vector ntiation to find directional ives, curl, and divergence of fields.
apply problem	Evaluate Fourier transforms and it to solve heat conduction ms in engineering
interact Co:2 U	se steam table and Mollier chart
2. III MA201 Applied Co:3 A	compute thermodynamics tions.  pply laws of thermodynamics to
Thermodynamics various thermodynamics	flow and non-flow dynamic processes.  Analyze the performance of
various Co:5	power cycles.  Describe various methods of ration and air conditioning.
Co: 1 (effects	Classify various forces and their to analyze real-life problems.  Analyze engineering problems
3. III MA203 Engineering Applyin Co:3 A kinema	ag conditions of equilibrium.  Apply fundamental concepts of tics and kinetics to the analysis of al problems.
Co:4 D inertia	Determine centroid & moment of of the geometrical plane lamina.
of patte Co:2 F	elect material, types, allowances ern in the casting process  Explain casting equipment and
4. Technology Co:3 E: machin	defects xplain various machine tools and ing operations evelop part programing for CNC
machin Co:1	e Classify engineering materials
Material Science & Co.2 D	on properties.  Describe crystalline characteristics
5. MA207 Metallurgy of engin	neering materials.  Illustrate different phases of

,		T		1
				Co:4 Select suitable heat treatment or
				mechanical testing for desired material
				properties.
				Co:5 Select appropriate material for a
				particular application.
				Co:1 Explain the importance and
				sensitivity of the environment.
				Co:2 Interpret the over exploitation of
				natural resources and follow
			Environmental	environmental ethics.
6.	III	SH2173	Science	Co:3 Explain methods to protect the
			Science	environment and prevent environmental
				pollution
				Co:4 Apply their knowledge and skills
				to solve their environment-related
				problems.
				Co:1 Demonstrate the tool grading and
				lathe machine.
_	***	14.200	Workshop Practice –	Co:2 Perform turning, parting, knurling,
7.	III	MA209	I	and threading operations on lathe.
				Co:3 Demonstrate milling, grinding, and
				shaping machines.
				Co:1 Verify law of polygon of forces,
				law of triangle of forces, and principle of
				moment.
				Co:2 Compare coefficient of friction of
8.	III	MA211	Engineering Mechanics Lab.	various surfaces in contact.
0.				Co:3 Correlate theoretical and practical
				results of support reactions and centroid
				of plane lamina.
				Co:4 Analyze a simple truss
				Co:1 Represent the automotive and
				mechanical components and materials
				with their conventions.
				Co:2 Develop an ability to prepare free
				hand sketches with proportionate
9.	IV	MA213	Machine Drawing	dimensions.
			Lab.	Co:3 Apply AutoCAD or similar
				software for drawing machine
				components and assemblies.
				Co:4 Develop an ability to prepare detail
				and assembly drawings as per standard
				procedure.
				Co:1 Comprehend the knowledge
10	III	MA215	Technical Aptitude-I	gained in the course work.
10				Co:2 Demonstrate the problem-solving
				ability.
				Co:1 Utilize scientific methods to solve
				environmental problems.
				Co:2 Evaluate technologies for
11	111	CH3603	Environmental	restoration of degraded environment.
11	III	SH2603	Science Project	Co:3 Develop presentation and report
				writing skills.
				Co:4 Develop as an individual and in
				group leadership quality.
				Co:1 Exhibit the ability to work
			Professional	effectively in a team.
12.	III	SH2633	Leadership Skills	Co:2 Describe the traits of a leadership
			Leadership Skills	through real-life examples.
		<u> </u>		unough rear-me examples.

				Co:3 Plan the speech as per the audience
				and context requirements.
				Co:4 Analyze public speeches.
				Co:1 Exhibit interpersonal
				communication skills.
			1.01.11	Co:2 Demonstrate decision-making
12	777	CH2C12	Interpersonal Skills	_
13.	III	SH2613	['Jeevanvidya' for	skills.
			Work Life Balance]	Co:3 Apply conflict resolution styles
				appropriate in different situations.
				Co:4 Demonstrate leadership skills.
				Co:1 Learn a structured approach to
				define the problem with every possible
				detail, identify conflicts and solve them
			Innovation Tools	Co:2 Apply User Journey Map to the
14.	III	SH2693	and Methods for	selected problem to show user
			Entrepreneurs	interaction at various stages
				Co:3 Analyse the solutions provided by
				competitors for effectiveness and gaps if
				any.
				Co:1 Develop skills to build self-esteem
				and positive attitude.
		SH2593	Personal Effectiveness and Body Language	Co:2 Discover ways to overcome
15.	III			procrastination.
15.				Co:3 Demonstrate responsiveness
			200) Zungunge	towards stress and health issues.
				Co:4 Interpret the non-verbal behavior
		ļ		of a person.
				Co:1 Introduce herself or himself in
				German.
	III	SH2733	German Language -	Co:2 Can listen and understand
16.				alphabets, numbers in German language.
			Basic Level	Co:3 Make basic and easy sentences
				required in day to day situations
				Co:4 Read, write, speak, and listen basic and simple text in German.
				Co:1 Acquaint with foreign language.
				Co:2 Acquire knowledge of basic
				Japanese grammar
	III			Co:3 Acquaint basic Japanese language
				skills (listening, speaking, writing, and
			Japanese Language -	reading).
17.		SH2713	Level III	Co:4 Aware relevance of Japanese
				language to professions and careers.
				Co:5 Aware cultures and civilizations of
				the country of Japan.
				Co:6 Aware of environment where
				Japanese is used exclusively.
				Co:1Design suitable mechanism for
				different applications in a machine
				Co:2 Determine velocity and
				acceleration of linkages in mechanisms
			Kinematics of	using graphical and analytical methods.
18.	IV	MA202	Machines	Co:3 Develop profile of the cam to get
				required follower motion for given
				application.
				Co:4 Analyze characteristic curves of
				mechanical governors for their stability.
				meentinear governors for their stability.

		1		Ta
				Co:5 Select the lower pair mechanisms
				for a given application.
				Co:6 Use principles of friction in
				designing automotive components such
				as clutch, brake, and bearing.
				Co:1 Compare various properties of
				fluids at rest and in transit.
				Co:2 Analyze fluid systems using
				equations such as Bernoulli's equation
				and Continuity equation.
			Fluid Mechanics &	Co:3 Examine energy losses in pipes to
19.	IV	MA204	Machinery	enable drawing energy gradient lines.
			1viaciniici j	Co:4 Solve viscous and boundary layer
				flow problems.
				Co:5 Evaluate the performance
				characteristics of hydraulic turbines.
				Co:6 Evaluate the performance
				characteristics of hydraulic pumps.
				Co:1 Explain the importance and
				working of electric drives.
				Co:2 Analyze performance of DC & AC
			Diamenta Data and 1	machines.
20.	IV	MA206	Electric Drives and Controls	Co:3 Explain conventional & static DC
				& AC drives for speed control.
				Co:4 Describe steeper & servo motor
				and its drive system along with
				applications.
				Co:1 Apply knowledge of stresses and
				strains for structural analysis.
				Co:2 Analyse suitability of appropriate
				section for mechanical applications.
			Mechanics of	Co:3 Compare different columns based
21.	IV	MA208	Materials	on end conditions.
			17240011415	Co:4 Analyze the circular shaft
				subjected to pure torsion.
				Co:5 Apply energy method for structural
				analysis of solid body.
				Co:1 Explain the basic functions of
				management.
				Co:2 Describe the basic concepts of
			Industrial	functional areas of management.
22.	IV	MA210	Organisation and	Co:3 Apply basic concepts of
			Management	management in an industry
				Co:4 Acquaint with Entrepreneurship
				management with Entrepreneurship
+				Co:1 Measure surface finish by using
				Autocollimator.
				Co:2 Measure angle of tapered
			Maturalisa	components, template & thread form
23.	IV	MA212	Metrology &	using tool maker's microscope, sine bar
			Measurement Lab.	and with standard balls and rollers
				Co:3 Measure pressure, force, velocity,
				etc by using various instruments
				Co:4 Calibrate the measuring
			i i	instruments
				Co:1 Verify and apply Bernoulli's
24	IV	MA 214	Fluid Mechanics &	Co:1 Verify and apply Bernoulli's Theorem.
24.	IV	MA 214	Fluid Mechanics & Machines Lab.	Co:1 Verify and apply Bernoulli's

		1		
				Co:3 Calculate various losses through
				pipes.
				Co:4 Draw performance characteristic
				curves for pumps, compressors, and turbines.
				Co:5 Evaluate various efficiencies of
				pumps, compressors and turbines.
				Co:1 Develop base features for
				modeling of parts.
				Co:2 Develop 3D model of automotive
25.	IV	MA216	Solid Modeling Lab.	components.
				Co:3 Assemble components using functional constraints.
				Co:4 Prepare production drawings in
				drafting workbench
				Co:1 Perform different welding
				processes namely metal inert gas (MIG)
				welding, tungsten inert gas (TIG)
				welding, plasma arc cutting, and submerged arc welding (SAW).
				Co:2 Perform different sheet metal
26.	IV	MA218	Workshop Practice -	operations (Marking, Punching,
20.	1 4	WIAZIO	II	Bending, and finishing).
				Co:3 Perform CNC operations as per
				given drawing.
				Co:4 Perform 3D printing operations.
				Co:5 Demonstrate Electrical Discharge
				Machining (EDM) processes.
				Co:1 Identify elements and features of
				object-oriented programming.
				Co:2 Implement various object-oriented concepts with the help of programs.
27.	IV	MA220	Object-Oriented	Co:3 Apply the object-oriented concepts
21.	1 4	WIAZZO	Programming Lab.	in real-time problem-solving.
				Co:4 Apply template and exception
				handling techniques in dealing with
				variety of programs.
				Co:1 Comprehend the knowledge
28.	IV	MA222	Technical Aptitude-	gained in the course work.
20.			II	<b>Co:2</b> Demonstrate problem-solving ability.
				Co:1 Introduce herself or himself in
				German.
				Co:2 Listen and understand alphabets,
29.	IV	SH2643	German Language -	numbers in German language.
۷۶.	1 4	5112045	Advanced Level	Co:3 Make basic and easy sentences
				required in day to day situations
				Co:4 Read, write, speak, and listen basic
				and simple text in German.
				Co:1 Acquainted with foreign language.
				Co:2 Gain knowledge of basic Japanese
				grammar.  Co:3 Acquire basic Japanese language
30	IV	SH2623	Japanese Language -	skills (listening, speaking, writing, and
50	1.4	5112025	Level IV	reading).
				Co:4 Demonstrate an awareness of the
				relevance of Japanese language to
				professions and careers.

			Understand zations of the c			
		Co:6	Function in an	envi	ronment w	vhere

T. Y. B. Tech. (Mechanical Engineering Automobile)

Sr.No.	Semester	Course	Course Name	Course Outcomes
1	V	code MA301	Internal Combustion Engines	CO:1 Perform a primary thermodynamic analysis of Otto and diesel cycle engines. CO:2 Select appropriate engine for specific application. CO:3 Select proper fuel system for IC engine. CO:4 Conduct performance test of IC engine and portray operating characteristics of engine. CO:5Identify abnormal combustion in engine and remedy over it. CO:6 Select proper lubrication, intake, exhaust, cooling system for engine.
2	V	MA303	Dynamics of Machines	CO:1 Analyze kinematic parameters of gears in mesh for typical power transmission application.  CO:2 Explain the effect of gyroscopic effect on naval ship, aero plane etc.  CO:3 Determine dynamic forces and torques acting on reciprocating engine mechanism.  CO:4 Analyze rotating and reciprocating components of machines to compute the magnitude and direction of balancing mass.  CO:5 Formulate mathematical models of systems and determine the natural frequency of undamped and damped free vibrations of single degree freedom systems.  CO:6 Determine the response of vibrating systems under forced harmonic excitations.
3	V	MA305	Heat Transfer	CO:1 Compute temperature distribution using steady-state and unsteady-state heat conduction.  CO:2 Analyze heat transfer through extended surfaces.  CO:3 Analyze forced and free convection heat transfer situations.  CO:4 Apply the principles of radiation heat transfer to engineering problems.  CO:5 Design heat exchangers using LMTD and NTU methods.
4	V	MA307	Automotive Systems	CO:1 Explain constructional details and operation of the automotive systems.  CO:2 Interpret the influence of various technical parameters on the behavior of the automotive systems.  CO:3 Configure the systems and its elements for integrating into drivetrain/chassis systems appropriate for given automotive application.  CO:4 Present in detail the technological advancements of the automotive systems.

5	V	MA309	Autotronics	CO:1 Demonstrate the use of electronics in automotive system  CO:2 Illustrate engine management system and justify the use of electronics in it  CO:3 Describe various sensors and actuators required for automobiles  CO:4 Illustrate the applications of advanced automotive technologies embedded with electronics  CO:5 Explain the technologies used for alternately propelled vehicles.
6	V	MA323	I. C. Engine Lab.	CO:1 Demonstrate the fuels supply, lubrication, cooling systems.  CO:2 Conduct the test on single cylinder and multi-cylinder petrol & diesel engines  CO:3 Plot the engine performance characteristics curves and interpret the curves.  CO:4 Calculate B.P., I.P., F.P., air/fuel ratios, and various engine efficiencies.  CO:5 Conduct the test and prepare heat balance sheet.
7	V	MA325	Thermal Engineering Lab.	CO:1 Apply laws of heat transfer in conduction, convection and radiation domain.  CO:2 Compute effectiveness of heat exchangers.  CO:3 Determine effectiveness of pin fin.  CO:4 Evaluate COP of Refrigeration and air conditioning system.
8	V	MA327	Automobile Engineering Lab.	CO:1 Describe the operating principle, functions, and constructional details of suspension, steering, braking & transmission systems used in automobiles.  CO:2 Apply the concepts of human ergonomics for design of automobile.  CO:3 Explain the use of various tests for designing the vehicle body.  CO:4 Test the working of various electrical components using testing instruments.
9	V	MA329	Theory of Machines Lab	CO:1 Design a gear tooth profile for given engineering application.  CO:2 Determine Gyroscopic couple and verify Gyroscopic law.  CO:3 Plot polar diagram based on the experimental readings on Hook's joint.  CO:4 Design a cam profile for given application.  CO:5 Plot characteristic curves for centrifugal governors  CO:6 Determine moment of inertia of rigid bodies.  CO:7 Apply balancing methods to balance rotating and reciprocating masses.  CO:8 Analyze vibration characteristics of single degree of freedom systems.  CO:9 Determine critical speed of shafts.

				CO:1 Comprehend the knowledge gained in the course work.
10	V	MA331	Comprehensive Exam-III	CO:2 Demonstrate problem-solving ability.
11	V	SH3032	Aptitude Training I	CO:1 Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.  CO:2 Understand usage of basic aptitude terms of percentages, averages, ratios, and applications of business aptitude terms of profits and interests  CO:3 Develop a bridge in analogies, series, and visualizing directions.  CO:4 Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams.
12	V	MA333	Summer Internship	CO:1 Acquaint with garage environment and processes to be carried out.  CO:2 Handle various tools and equipments used in garages.  CO:3 Diagnose minor faults of vehicle.  CO:4 Summarize the uses of advanced tools and equipments.  CO:5 Communicate and present his ideas/work in front of peers and superiors.
13	V	SH3012	Indian Constitution	CO:1 Create awareness about law depiction and importance of Constitution CO:2 Define Fundamental Rights and Fundamental Duties of the Indian Citizen to instill morality, social values, honesty, dignity of life, and their social Responsibilities. CO:3 Create Awareness of their Surroundings, Society, Social problems, and their suitable solutions while keeping rights and duties of the citizen keeping in mind. CO:4 Recognize distribution of powers and functions of Local Self Government. CO:5 Comprehend the National Emergency, Financial Emergency, and their impact on Economy of the country.
14	V	MA311	Product Design and Development	CO:1 Describe the product development process in general.  CO:2 Plan the proposed product and establish its specifications.  CO:3 Generate, screen and test concepts for proposed product.  CO4: Apply various techniques like industrial design, DFx for developing a product.  CO5: Perform economic analysis of proposed product.
15	V	MA313	Tribology	CO:1 Describe the theories of friction and wear mechanisms.  CO:2 Apply principle of hydrodynamic lubrication for designing bearing.

16	V	MA315	England and analysis	CO:3 Analyse and optimize the hydrostatic bearing for minimum energy loss.  CO:4 Apply Reynolds equation for designing gas lubrication system.  CO:5 Select appropriate surface treatment for minimum wear and high corrosion resistance.  CO:1 Write the properties and measurement techniques of various types of fuels.  CO:2 Describe the processing and handling of various types of fuels
10	v	IVIA313	Fuels and combustion	CO:3 Describe various parameters that are utilized to characterize fuels and its combustion process.  CO:4 Identify the utilization of combustion devices for appropriate application.
17	V	MA317	Welding and Joining Technologies	CO:1 Describe various joining processes, their significance & applications.  CO:2 Select appropriate welding process for particular joining operation.  CO3: Compare different welding processes to analyse suitability of a particular welding process for variety of applications.  CO:4 Select appropriate Non-Traditional Machining Processes for particular application
18	V	MA319	Transport management	CO:1 Describe the motor vehicle act & central motor vehicle rules.  CO:2 Illustrate motor vehicle insurance & taxation.  CO:3 Analyze the passenger & goods transport operations.  CO4: Identify advanced techniques in traffic management.
19	V	MA321	Industrial Engineering	CO:1 Apply industrial engineering tools to improve productivity CO:2 Decide plant lay out and suitable material handling system. CO3: Examine work measurement and inventory control techniques CO4: Plan production activities using tools like PPC, Capacity and Aggregate planning
20	VI	MA302	Design of Machine Elements	CO:1 Discuss steps of design and theories of elastic failure.  CO:2 Design joints for different loading conditions.  CO:3 Design shafts keys and couplings to transmit required amount of torque and power.  CO:4 Design four types of gears namely spur, helical, bevel and worm by using different considerations.  CO:5 Design components like spring and levers.

21	VI	MA304	Electric and Hybrid Electric Vehicles	<ul> <li>CO:1 Articulate the need of EVs and HEVs in today's transportation context.</li> <li>CO:2 Design an electric vehicle for given requirements.</li> <li>CO:3 Design a hybrid electric vehicle for given requirements.</li> <li>CO:4 Elaborate fuel cell technology for vehicular application.</li> </ul>
22	VI	MA306	Automotive Safety and Ergonomics	CO:1 Discussthe basics of vehicle collision and its effects.  CO:2 Summarize the various safety concepts used in passenger cars.  CO:3 Explain use of ergonomics in automotive design.  CO:4 Explain the human response to impact.  CO:5 Explain the use of various systems used in automobiles for safety & ergonomic considerations.
23	VI	SH302	Biology for Engineers	CO:1 Apply biological engineering principles, procedures needed to solve real-world problems  CO:2 Demonstrate the functions of biological systems  CO:3 Analyze biological phenomena with math and physics to gain important insights  CO:4 Explain working of different biomedical instruments  CO:5 Select the sensors for given biological applications  CO:6 Explain relevant aspects of movement control process.
24	VI	MA320	Automotive Diagnostic Lab.	CO:1 Carry out engine tune-up.  CO:2 Illustrate the critical inspection parameters while engine top overhaul.  CO:3 Measure wear of engine components.  CO:4 Perform wheel balancing and wheel alignment.  CO:5 Test spark plug and fuel injector performance as per their specification.  CO:6 Overhaul clutch, gearbox, braking system, electrical system, differential and axles.
25	VI	MA322	Advance Modeling Lab	CO:1 Develop surface models in modeling software. CO:2 Design sheet metal components. CO:3 Simulate the working of systems. CO:4 Design mold for plastic component manufacturing.
26	VI	MA324	Comprehensive exam-IV	CO:1 Comprehend the knowledge gained in the course work.  CO:2 Demonstrate problem-solving ability.
27	VI	MA326	Capstone Project phase-I	CO:1 Carry out literature survey and identify as well as select a problem.

				CO:2 Comprehend and analyze an engineering problem and report findings to provide an appropriate solution.  CO:3 Design an experimental setup or develop an analytical model to analyze the system under consideration.  CO:4 Communicate problem, methodology and outcomes systematically and effectively in the form
				of a technical report.  CO:5 Work as a member and a team leader in engineering teams / multidisciplinary teams.  CO:6 Demonstrate an ability to use different tools and techniques to solve the given problem.  CO:7 Demonstrate ethical behavior while completing the project work within given constraints and while delivering the
28	VI	SH3052	Aptitude training- II	expected outcomes.  CO:1 Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning Problems  CO:2 Understand usage of aptitude terms of speed, time and distance and permutations, probabilities, and applications.  CO:3 Understand blood relations and ways of seating arrangements along with various geometrical figures  CO:4 Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive
29	VI	MA308	Automotive Emission and Control Technologies	and campus recruitment exams.  CO:1 Outline the overview of emission control technologies in SI engine.  CO:2 Explore effect of engine design parameters and engine operating variables on SI engines.  CO:3 Analyse the pollutant formation mechanisms in IC engine emissions.  CO:4 Illustrate the knowledge of emission norms, standard test procedures and emission measurements techniques.  CO:5 Analyse different emission control technologies in IC engines.
30	VI	MA310	Sensor and Actuators	CO:1 Illustrate the construction and working of various automotive sensors and actuators.  CO:2 Select suitable sensor for automotive applications.  CO:3 Select suitable actuator for automotive applications.  CO:4 Describe the diagnostics tools and equipments used for testing of electronic components, sensors and actuators.
31	VI	MA312	Advanced Manufacturing Processes	CO:1 Select suitable surface treatment processes for particular application.

				CO:2 Select appropriate advanced
				machining process for particular application.
				CO:3 Use various composite materials &
				ceramics in component manufacturing.
				CO:4 Compare traditional & advanced
				manufacturing processes.
				CO:1 Identify material demanding for
				extreme conditions
				CO:2 Make use of Smart, magnetic
32	VI	MA314	Advanced Materials	&nano-materials
				CO:3 Acquire knowledge of composite materials and polymers.
				CO:4 Suggest suitable material for
				particular application.
				CO:1 Apply principles and techniques of
				TQM to improve quality.
				CO:2 Plan and control the quality.
33	VI	MA316	Total Quality Management	CO:3 Test the reliability of product and
				system.
				CO:4 Apply TQM techniques in service
				sector.
				CO:1 State the scope and practice of
			Supply Chain Management	business logistics and supply chain
				management.  CO:2 Explain the use of planning
				networks to manage flows.
		MA318		CO:3 Explain the use of inventory and
2.4	X 7X			warehousing for effective supply chain
34	VI			management.
				CO:4 Analyze the importance of
				transportation & packaging in supply
				chain management.
				CO:5 Explain the use of organizational
				structure of a company to control the effectively manage the supply chain.
				CO:1 Demonstrate an awareness about the
				concepts of Reliability, Availability and
				Maintainability.
				CO:2 Build system reliability models for
				different configurations.
				CO:3 Evaluate the reliability of simple
35	VI	OE3023	Reliability Engineering	and complex systems
				CO:4 Apply the appropriate
				methodologies to determine time and
				strength based reliabilities.  CO:5 Implement strategies for improving
				reliability of repairable and non-repairable
				systems
				CO:1 Describe the challenges and
	VI			problems associated with the use of
				various energy sources, including fossil
				fuels, concerning future supply and the
36		OE3043	Renewable Energy Sources	environment
				CO:2 Describe the primary renewable
				energy resources and technologies.
				CO:3 Apply the knowledge of thermodynamic and heat transfer
				principles to evaluate the performance of
				principles to evaluate the performance of

	energy conversion systems for maximum efficiency.
	CO:4 Compare the various renewable
	energy technologies.

# inal Year B. Tech. (Automobile Engineering)

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				Co:1 Design automotive clutch system
				for given automotive applications
				Co:2 Design gearbox for automotive
				application.
			Automotive System	Co:3 Design leaf spring and coil spring
1	VII	AE4012	Design	for automotive suspension.
			Design	Co:4 Design braking system (Internal
				expanding shoe type) for a vehicle.
				Co:5 Design front axle, differential,
				propeller shaft & final drive for
				automotive application.
				Co:1 Evaluate vehicle acceleration
				performance & stability of vehicle over
				the range of operating conditions.
				Co:2 Determine braking performance of
				a vehicle when provided with specifications.
2	VII	AE4032	Vahiala Dynamias	Co:3 Evaluate the response of tires for
	V 11	AE4032	Vehicle Dynamics	various operating conditions.
				Co:4 Evaluate handling characteristics
				of a vehicle for a given set of data.
				Co:5 Apply ride concepts while
				designing a suspension system for a
				vehicle.
				Co:1 Analyze performance of two and
				four wheelers using on road and
				laboratory testing methods.
				Co:2 Determine noise level in
				automotive systems using noise
			Vehicle	measurement systems.
3	VII	AE4472	Performance Evaluation & Emission Testing Laboratory	Co:3 Use vibration measurement system
3		AL4472		to determine vibration characteristics of
				automotive systems and components.
				Co:4 Analyze emission characteristics
				of petrol and diesel engines.
				Co:5 Select appropriate sensor for
				performance evaluation of vehicle and
				vehicle components.
				Co:1 Demonstrate the ability to develop
				creative and original solutions to
4				engineering problems of significant
				complexity.  Co:2 Work as an individual member of a
			Capstone Project	team, with support from a supervisor,
	VII	AE4632	Phase-II	formulating solutions to day-to-day
			1 11450-11	problems by integrating knowledge and
				experience gained during the course and
				beyond that.
				Co:3 Demonstrate the ability to produce
				a formal engineering report.
	<u>l</u>	1	L	a totaliar engineering report.

		T		
				Co:4 Describe experimental apparatus and/or models, and analysis procedures in a clear complete and unembiguous
				in a clear, complete and unambiguous manner making best use of latest
				information technology.
				Co:5 Communicate and present his ideas
				/ work in front of peers and superiors.
				Co:1 Apply the fundamental design
				concepts for the design of tractors and
				farm equipment.
			Design of Vehicle	Co:2 Analyze the important
5	VII	AE4052	Operated Farm	supplementary systems in the tractors.
			Equipments	Co:3 Select the different systems for a
				particular type of farm application.
				Co:4 Compare the performance of tractors related to various attachments.
				Co:1 Discuss terminologies related to re-
				engineering, forward engineering, and
				reverse engineering.
				Co:2 Describe Reverse Engineering
				methodologies.
				Co:3 Select a Reverse Engineering
6	VII	AE4072	Reverse	System for an automotive application.
			Engineering	Co:4 Explain Reverse engineering of
				Systems, Mechanical RE.
				Co:5 Determine the geometry of the
				Automobile component.
				Co:6 Discuss aspects of Reverse
				Engineering.
				Co:1 Suggest suitable modern materials
				and composites for automotive
				applications.
			Advanced	Co:2 Explain various ferrous and nonferrous materials used in
7	VII	AE4092	Automotive	nonferrous materials used in automobiles.
			Materials	Co:3 Explain various smart materials &
				polymers used in automobiles.
				Co:4 Suggest suitable materials for
				various automotive components.
				Co:1 Recognise importance of ITS.
				Co:2 Differentiate different ITS user
			Intalliana T	services.
8	VII	AE4112	Intelligent Transport	Co:3 Select appropriate ITS technology
			System	depending upon site specific conditions.
				Co:4 Design various ITS components
				for a specific operation.
				Co:1 Apply the fundamental concepts of
				vehicle safety to modern automobiles.
				Co:2 Discuss European NCAP-Test for
				automobiles.
				Co:3 Select appropriate crash test to be
0	VIII	AE4122	Automotive Cafet	carried out for any particular collision.
9	VII	AE4132	Automotive Safety	Co:4 Evaluate the level of comfort in
				any vehicle by developing ergonomics report.
				Co:5 Predict appropriate dummy to be
				used for a specific crash test.
				Co:6 Explain advanced safety systems
				and driver assistance systems.
		J	1	and direct approximate by profile.

		1		т
				Co:2 Apply psychometric concepts in
				design of HVAC of an automobile.
				Co:3 Analyze automotive HVAC system.
				Co:4 Explain troubleshooting methods
				and maintenance of automotive HVAC
				system.
				Co:1 Outline the overview of emission
				control technologies in SI engine.
				Co:2 Explore effect of engine design
				parameters and engine operating
				variables on SI engines.
			Automotive	Co:3 Analyse the pollutant formation
16	VII	AE4272	Emission Control	mechanisms in IC engine emissions.
			Emission Condo	Co:4 Illustrate the knowledge of
				emission norms, standard test
				procedures and emission measurements
				techniques.
				Co:5 Analyse different emission control
				technologies in IC engines.
				Co:1 Discuss applications of insurance
				principles in vehicle insurance.
				Co:2 Describe various forms in motor
17	VII	AE4292	Motor Vehicle	vehicle insurance.
1,	V 11	1111272	Insurance Practices	Co:3 Discuss MACT in detail.
				Co:4 Analyze fraud management and
				internal audit in relation with motor
				vehicle insurance.
				Co:1 Describe the physical significance
				of the governing equations for fluid
				dynamics and heat transfer.
				Co:2 Develop finite difference implicit
				& explicit algorithms for fluid flow and
18	VIII	AE4312	Computational	heat transfer problems.
			Fluid Dynamics	Co:3 Select appropriate grid generation
				methods for CFD analysis.
				Co:4 Develop finite volume algorithms
				for Steady and unsteady problems.  Co:5 Select appropriate turbulent model
				for CFD simulation.
				Co:1 Use polariscope for finding
				stresses in machine component.
				Co:2 Analyze the photo elastic data by
				various methods.
		,	Experimental Stress	Co:3 Determine the strains and stresses
19	VIII	AE4332	Analysis	in photo elastic coating by using
			5	reflection polariscope.
				Co:4 Use strain gauge for measurement
				of strain/stresses.
				Co:5 Design strain gauge transducers.
				Co:1 Illustrate the need to optimally
				utilize the resources in various types of
				industries.
20	3.7777	AE 4252	Operations	Co:2 Apply optimization techniques for
20	VIII	AE4352	Research	the achievement of various objectives in
				the industry.
				Co:3 Apply cost effective strategies in
				various applications in industry.
		1	i	· · · · · · · · · · · · · · · · · · ·

26	VII	AE4492	Finite Element Methods Lab.	Co:1 Explain user interface of the software.  Co:2 Develop appropriate functions required for simulation.
25	VIII	AE4452	Transport Management	Co:1 Describe the motor vehicle act & central motor vehicle rules. Co:2 Illustrate motor vehicle insurance & taxation. Co:3 Analyze the passenger & goods transport operations. Co:4 Identify advanced techniques in traffic management.
24	VIII	AE4432	Reliability Centered Maintenance	Co:1 Comprehend the concepts of reliability centered maintenance Co:2 Describe basic scheduled maintenance tasks Co:3 Apply RCM program for vehicular system
23	VIII	AE4412	Vehicle Aerodynamics	Co:1 Apply basic principles of aerodynamics for the design of vehicle body.  Co:2 Calculating lift and drag of automotive models.  Co:3 Describe the physics of fluid flow over vehicle body and its optimization techniques.  Co:4 Use of wind tunnels in testing the vehicles.  Co:5 Apply computational fluid dynamics (CFD) tool for aerodynamics study.
22	VIII	AE4392	Special Purpose Vehicle	Co:1 Describe the construction & working of stratified charged/lean burn engines.  Co:2 Describe the working of power trains in special propose vehicles and able to analyze the ride characteristics.  Co:3 Describe the working of drive line in special propose vehicles and compared with commercial vehicles.  Co:4 Describe the construction of farm equipments.  Co:5 Apply the safety concepts for design special proposes vehicles.
21	VIII	AE4372	Inventory Management	Co:4 Demonstrate skills to effectively manage the project within financial and time constraints  Co:1 Describe the importance of information in inventory management.  Co:2 Implement the just-in-time (JIT) method to manage inventory and production.  Co:3 Explain the importance of stocks in the supply chain and within an organization.  Co:4 Examine the methods for forecasting demand in inventory management.
				Co.4 Domestoto della ta effectivale

1		T		
				Co:3 Apply proper constraints and
				boundary conditions.
				Co:4 Analyze structural and thermal
				problems using linear and higher order
				elements.
				Co:5 Apply different post processing
				techniques to interpret the results.
				Co:6 Optimize the codes to simulate the
				engineering problems.
				Co:1 Demonstrate an awareness about
				basics of measurement and elements of
				measurement system.
				Co:2 Calibrate the transducers such as
				accelerometers, microphones and strain
				gauges.
			Automotive NVH	Co:3 Measure vibration characteristics
27	VII	AE4512	Lab.	using data acquisition system or
			Lau.	vibrometer.
				Co:4 Measure noise sound pressure level
				using data acquisition system or sound
				level meter.
				Co:5 Design control strategies to reduce
				noise and vibration level in automotive
				and mechanical systems.
				Co:1 Join two metals using advance
				welding technique.
	VII	AE4532	Sheet Metal Manufacturing Lab.	Co:2 Use sheet metal fabrication tools to
28				prepare simple objects.
20				Co:3 Prepare a process sheet for the
				given object.
				Co:4 Prepare the given object as per
				given shape and size.
				Co:1 Demonstrate and experiment
				advanced manufacturing techniques.
				Co:2 Select modern equipment and
			Nano and Micro	techniques for micro features.
29	VII	AE4552	Nano and Micro Technology Lab.	
				Co:3 Select tools and methodology for
				micro features.
				Co:4 Measure the physical properties of
				nanofluids.
				Co:1 Identify different components of
				Automotive Air Conditioning.
				Co:2 Select refrigerant for refrigerated
				vehicle.
				Co:3 Design refrigeration system for
30	VII	AE4572	Automotive HVAC	refrigerated vehicle.
30	¥ 11	AL4312	Lab.	Co:4 Apply psychometric concepts in
				design of HVAC of an automobile.
				Co:5 Explain troubleshooting methods
				and maintenance of automotive HVAC
				system.
				Co:1 Discuss vehicle emission norms.
				Co:2 Measure engine emission using gas
			Automotive	and smoke analyzers.
31	VII	AE4592	Emission Control	Co:3 Demonstrate emission reducing
	,	112,072	Lab.	devices.
			Luc.	
				Co:4 Demonstrate emission controlling
1		1		devices.

	T	T		1 =
32	VII	AE4612	Motor Vehicle Insurance Practices Lab.	Co:1 Comprehend the detailing of various forms to be used in insurance sector.  Co:2 Carry out motor accident survey.  Co:3 Prepare accident survey report.  Co:4 Settle the claim of motor accident insurance.
33	VIII	OE438	Finance for Engineers	Co:1 Discuss the fundamental aspects of accounting and finance.  Co:2 Apply rules of accounting while recording transactions.  Co:3 Prepare financial statements and analyze financial position of the firm by applying various techniques.  Co:4 Describe the various long term sources of finance available for the business organization.
34	VIII	OE436	Engineering Management & Economics	Co:1 Develop administrative, organizational and planning skills to execute engineering project.  Co:2 Develop bar chart/mile stone chart for the project.  Co:3 Analyze profit/cost data and carry out economic analysis to take optimal decision.  Co:4 Calculate depreciation as per various methods.
35	VIII	IP4022	Internship & Project	Internship  Co:1 Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services).  Co:2 Develop an attitude to adjust with the company culture, work norms, code of conduct.  Co:3 Recognize and follow the safety norms, Code of conduct.  Co:4 Demonstrate the ability to observe, analyse and document the details as per the industry practices.  Co:5 Interpret the processes, systems and procedures and to relate to the theoretical concepts- studies.  Co:6 Develop the leadership abilities, communication.  Co:7 Demonstrate project management and finance sense.  Project  Co:1 Identify the project/problem in the domain of a program relevant for the company.  Co:2 Compile the information to the pertaining to the problem identified.  Co:3 Analyse the information using the statistical tools/ techniques.  Co:4 Develop the feasible solution for given problem.

	Г	T		
				Co:5 Analyse the impact of the project
				on the performance of
				company/department.
				Co:1 Investigate the technical literature.
				Co:2 Recognize and evaluate theories,
				practices, and/or research on a chosen
				topic by conducting a thorough literature
				review and submitting a written
				integrative, critical summary of the
				current literature.
				Co:3 Design a research problem and
				develop a methodology.
				Co:4 Develop and implement an
				advanced original research or creative
				project.
36	VIII	RE4042	Research Project	Co:5 Develop the ability to explain the
	V 111	KE 1012	Rescurentitojeet	conceptua
				1 viability of the project and describe the
				major components involved.
				Co:6 Develop the ability to explain how
				the project will impact the relevant body
				of work.
				Co:7 Develop advanced discipline-
				relevant skills and competencies.
				Co:8 Construct an accurate record of
				research performed.
				Co:9 Write a research report and paper.
				Co:1 Prepare business Plan for selected
				business.
				Co:2 Make risk analysis& market
37	VIII	ED4102	Project	analysis of selected project.
	, 111	25.1102	Management	Co:3 Make risk analysis& market
				analysis of selected project.
				Co:4 Make financial appraisal of
				selected project.
				Co:1 Interpret basic Financial
				Terminologies.
				Co:2 Prepare & analyze financial
				statements.
			Commercial	Co:3 Prepare financial Plan for venture.
38	VIII	ED4042	Aspects of the	Co:4 Apply basic principles of
			Project	
				marketing for various products.
				Co:5 Prepare market survey.
				Co:6 Apply knowledge of marketing
				management for selected business.
			Entrepreneurship	Co:1 Apply knowledge of engineering,
39	VIII	ED4062	Development	economics, marketing and finance for
] 37	V 111	LD4002		formulation of business plan, starting &
			Program (EDP)	managing new business.
				Co:1 Apply knowledge of engineering,
			Entrepreneurship	economics, marketing and finance for
40	VIII	ED4082	Development	preparation of project report.

			1 Toject	financial appraisal of project.
				imanciai appraisai oi project.

- Department Name: -Automobile Engineering
- PG Program Name: M.Tech. Automotive Technology & M.Tech. Mechanical Engineering Automobile
- Vision and Mission: -

**Vision -** To offer programs of global repute with an emphasis on academics, research and innovation to provide competent and efficient human resources in the field of automotive engineering to fulfil the needs of the society.

### Mission -

- 5. To design and enrich the curricula based on changing needs of industry and society.
- 6. To develop a center of excellence to promote automotive research and attract industry assignments.
- 7. To provide an excellent academic environment for development of competent automotive professionals to meet industry expectations.
- 8. To ensure participation of every stakeholder to enhance effectiveness of the programs being offered.

Sr. No.	Program Outcomes
1.	An ability to independently carry out research /investigation and development work to
	solve practical problems.
2.	An ability to write and present a substantial technical report/document.
3.	An ability to demonstrate a degree of mastery in Automotive Technology.
4.	An ability to collaborate, work harmoniously in teams and address multidisciplinary issues
	with consideration of professional, legal, and ethical issues.
5.	An ability to use advanced techniques, skills, and modern engineering tools with financial
	aspects.
6.	An ability to learn continuously, independently and update knowledge & skills.

## M. Tech. (Automotive Technology)

Sr.No.	Semester	Course code	Course Name	Course Outcomes
				CO:1 Explain fundamental concept of the various automotive systems
				CO:2 Discuss the functions of
1	I	MAT101	Vehicular Systems	various automotive systems
1	1	WATTOT	Veniculai Systems	CO:3 Depict the various systems
				using simple schematics
				CO:4 Synthesize mathematical
				models of the various systems
	I		Finite Element Analysis	CO:1 Formulate finite element
		I MAT102		equation using weighted residual
				approach.  CO:2 Formulate finite element
				equation using variational approach.
2				CO:3 Analyze vector and scalar field
				problems using FEM.
				CO:4 Use isoparametric formulation
				for irregular geometries.
				CO:5 Analyze the dynamic
				behaviour of structure using FEM.
				CO:1 Calculate axle loads under any
3			Vehicle Dynamics and Control	combination of accelerations, grades,
	I	MAT103		aerodynamic forces etc.
				CO:2 Evaluate vehicle acceleration
				performance in the light of engine

	1			T
				power constraint and traction limit
				constraints.
				CO:3 Determine braking
				performance of vehicle over the
				range of operating conditions.
				CO:4 Evaluate response of vehicle to
				steering inputs at low and high
				speeds and its characterization as
				-
				understeer or oversteer.
				CO:5 Estimate ride performance of a
				vehicle in terms of resonant
				frequencies, bounce and pitch
				frequencies.
				CO:1 Describe the operating
				principle, functions, and
				constructional details of various
				engine systems.
				CO:2 Conduct the test on single
				cylinder and multi-cylinder petrol,
				-
				diesel engine plot the characteristics
			Engine & Vehicle Testing Laboratory	curves and interpret the curves
		I MAT112		CO:3 Determine performance
				parameters of two & four wheelers
4	I			CO:4 Determine vibration
				characteristics of automotive
				systems and components
				CO:5 Determine sound pressure
				level in an automobile.
				CO:6 Determine performance
				characteristics of automotive gear
				box.
				CO:7 Determine aerodynamic
				7
				performance characteristics of car
		+		bodies.
				CO:1 Develop/ select appropriate
				model required for simulation.
				CO:2 Apply proper constraints and
				boundary conditions.
			Madall'access C' al c'	CO:3 Select suitable solver settings
5	I	MAT113	Modelling and Simulation	of simulation software.
			Laboratory	CO:4 Apply different post-
				processing techniques to interpret the
				results.
				CO:5 Apply optimization tools from
				simulation software
		+		
				CO:1 Acquire skills required for
				good oral and written
				communication.
6	I	SHP551	Technical Communication	CO:2 Demonstrate improved writing
				and reading skills.
				CO:3 Ensure the good quality of oral
				and written communication.
_	_			CO:1 Interpret and understand the
7	I	MAT104	Alternative Fuels & Emissions	essential properties, manufacturing
	<u> </u>	1		properties, manufacturing

	Т	T		
				techniques and use of liquid fuels in
				petrol and diesel engines.
				CO:2 Analyse the properties,
				characteristics and the
				implementation limits of gaseous
				fuels like LPG, CNG, and
				HYDROGEN in I.C engines.
				CO:3 Explain the formation of
				pollutants in SI and CI engine and
				describe the Emission control
				techniques.
				CO:4 Outline the emission
				measurement techniques and various
				test procedure
				CO:1 Apply concepts of aesthetics,
				ergonomics, and aerodynamics to
				design a vehicle body.
	_	3.5.4574.05		CO:2 Design vehicle body structures
8	I	MAT105	Automobile Body Structure Design	as per requirements.
				CO:3 Select suitable materials for
				different body components.
				CO:4 Analyze different loading
				conditions applied on vehicle bodies.
				CO:1 Illustrate the drivers and
				enablers of Industry 4.0.
				CO:2 Appreciate the smartness in
				Smart Factories, Smart cities, smart
				products and smart services.
				CO:3 Outline the various systems
				used in a manufacturing plant and
9	I	MAT106	Industry 4.0 Technologies	their role in an Industry 4.0 world.
				CO:4 Appreciate the power of Cloud
				Computing in a networked economy.
				CO:5 Outline the opportunities,
				challenges brought about by Industry
				4.0 and how organizations and
				individuals should prepare to reap
	1			the benefits.
	1			CO:1 Appreciate the product
	1			development process and life cycle
	1			in general.
	1			_
	1			CO:2 Establish target and final
	1			specifications of proposed product.
10	I	MAT107	Automotive Product Design &	CO:3 Generate, screen and test
10	_	,	Development	concepts for proposed product.
	1			CO:4 Apply various tools and
				techniques like ID, DFx etc. for
	1			product development.
	1			CO:5 Perform economic analysis of
	<u> </u>			proposed product.
				CO:1 Apply the fundamental
	1			concepts of vehicle safety to modern
11	I	MAT108	Automotive Safety	automobiles.
				CO:2 Discuss European NCAP-Test
	1			for automobiles.
	l .			

	1	1		I GO 2 G 1
				CO:3 Select appropriate crash test to
				be carried out for any particular
				collision.
				CO:4 Evaluate the level of comfort in
				any vehicle by developing
				ergonomics report.
				CO:5 Predict appropriate dummy to
				be used for a specific crash test.
				CO:6 Explain advanced safety
				systems and driver assistance
				systems.
				CO:1 Apply principles of
				anthropometry and ergonomics in
				design of automotive systems.
				CO:2 Design a vehicle control and
				operating system by automotive
				design standards with regard to
				ergonomics and aesthetics.
12	т т	MATIOO	Automotive Ergonomics and	CO:3 Design vehicle display,
12	I	MAT109	Aesthetics	instruments, interior, occupant
				position for comfort.
				CO:4 Analyze the vehicle design on
				the basis of ergonomic and comfort
				level.
				CO:5 Generate vehicle models by
				use of techniques in multiple
				materials.
				CO:1 Apply basic principles of
				aerodynamics for the design of
		I MAT110	Vehicle Aerodynamics	vehicle body.
				CO:2 Calculate lift and drag of
				automotive models
				CO:3 Discuss the physics of fluid
13	I			flow over vehicle body and its
				optimization techniques.
				CO:4 Use wind tunnels in testing the
				vehicles.
				CO:5 Apply computational fluid
				dynamics (CFD) tool for
	1			aerodynamics study.
	1			CO:1 Describe constructional and
	1			operational features of the farm
14 I	1			1 -
				tractor.
	1			CO:2 Evaluate the various
	I	MAT111	Tractors and Farm Equipments	mechanizations used in the farm.
		ı MAIIII		CO:3 Analyse the operational
				features of farm machineries
	1			CO:4 Troubleshoot and carry out
	1			basic maintenance of tractors and
				Farm Equipment's
				CO:1 Demonstrate the significance
	1		Automotive Noise, Vibration and	of experimentation and explore the
15	II	MAT114	Harshness	possibility of carrying out
	1		11di Silliess	
				engineering investigations

	_	T		
				CO:2 Measure the various technical
				parameters by instrument and by
				mathematical relationship
				CO:3 Validate actual performance of
				the system experimentally
				CO:4 Analyze experimental test data
				for further improvement of the
				-
				system
				CO:5 Identify the effect of various
				parameters on the system and co-
				relate them
				CO:1 Describe the working principle
				of electric vehicles.
				CO:2 Explain the construction and
				working principle of various motors
				used in electric vehicles.
				CO:3 Discuss working principle of
16	II	MAT115	Hybrid and Elastria Vahialas	electronics and sensor less controls
10	11	MATTIS	Hybrid and Electric Vehicles	
				in electric vehicles.
				CO:4 Describe the different types
				and working principle of hybrid
				vehicles.
				CO:5 Illustrate the various types and
				working principle of fuel cells.
				CO:1 Formulate a research problem.
				CO:2 Analyze research related
				information.
				CO:3 Use computing tools
				1 5
17	***	N/A/TI104	D 1 M (1 1 1 0 IDD	effectively.
17	II	MAT124	Research Methodology & IPR	CO:4 Describe nature and processes
				involved in development of
				intellectual property rights.
				CO:5 Prepare and present research
				proposal/paper by following research
				ethics.
				CO:1 Interpret the impact of
				different design parameters on
			electric vehicle performance.	
				CO:2 Explain the working principle
				of various motors used in electric
			***	
18	II	MAT125	Hybrid and Electric Vehicles	vehicles.
			Laboratory	CO:3 Examine the performance
				different types of Hybrid power
				trains.
				CO:4 Describe the different types
				and working principle of hybrid
				vehicles.
				CO:1 Demonstrate the significance
				of experimentation and explore the
		II MAT126		possibility of carrying out
19	II		Automotive Noise, Vibration and	engineering investigations
			Harshness Laboratory	CO:2 Acquire hands on experience
				on the various test-rigs, experimental
Ì				set up

	1	1	T	CO 2 M
				CO:3 Measure the various technical
				parameters by instrument and by
				mathematical relationship
				CO:4 Analyse experimental test data
				for further improvement of the
				system
				CO:5 Identify the effect of various
				parameters on the system and co-
				relate them
				CO:1 Identify a problem of small
				magnitude preferably in automotive
				domain.
				CO:2 Analyze the problem with
				certain objectives and within
20	11	MAT 107	Mini Davis at	applicable constraints.
20	II	MAT127	Mini Project	CO:3 Offer/Suggest/Implement
				innovative solution to the said
				problem and validate the solution.
				CO:4 Communicate the effort
				through presentation, display and
				technical report.
				CO:1 Explain the various automotive
			MAT116 Automotive Electrical and Power Electronics	sensors and actuators and their use in
				different automotive applications.
				CO:2 Differentiate various types of
				vehicle starting, charging system and
				ignition system.
				CO:3 Demonstrate the need and
		II MAT116		requirement of automobile batteries
21	II			-
				and its parameters.
				CO:4 Compare different automotive
				lighting systems.
				CO:5 Examine different automotive
				electrical system and auxiliaries.
				CO:6 Illustratedifferent
				communication protocols and
				functional safety in automobiles.
		1		CO:1 Describe requirements of
				automotive component/systems as
				per the standards.
				1
				CO:2 Demonstrate vehicle and
			Automotive Testing and	engine test procedures as per
22	II	MAT117	Certification	standards.
				CO:3 Explain testing of automotive
				components as per standards.
				CO:4 Describe xEV test
				requirements and procedure as per
				standards.
		+		CO:1 Explain the various
				-
				combustion processes in automotive
23	II	II MAT118	Engine Design and Development	engines.
				CO:2 Design and develop the engine
				using software virtually.
		•	•	· -

				CO:3 Differentiate the need of
				cooling systems in automotive
				engine design.
				CO:4 Demonstrate latest trends in
				designing and development of
				automotive engines.
				CO:1 Describe the types of ferrous &
				non-ferrous alloys.
				CO:2 Analyze the mechanical
				surface treatment and coatings done
				on materials.
				CO:3 Describe and syntheses the
24	II	MAT119	Automotive Materials and	need for modern materials and its
24	11	WIATTI	Manufacturing	alloys.
				CO:4 Discuss the materials used to
				manufacture engine and describe the
				manufacturing processes.
				CO:5 Illustrate materials used in
				Electric Vehicles.
	_			CO:1 Describe the working principle
				of networking protocols and ECU.
			Automotive Diagnostics	CO:2 Interpret different fault codes
				and diagnostics techniques used of
		MAT120		ECU.
				CO:3 Identify the use of different
25	II			•
				diagnostics tools.
				CO:4 Explain the approach
				techniques used to resolve the issues
				flagged
				CO:5 Illustrate OBD, its tools and
				techniques.
				CO:1 Identify the relation between
				system and signals.
				CO:2 Apply the knowledge of
				intelligence to automotive domain.
2.5	**	) (A TELO		CO:3 Explore various tools in the
26	II	MAT121	Automotive Intelligence	field of intelligence awareness.
				CO:4 Apply neural network for
				automotive application.
				CO:5 Analyze the different ways to
				extract and retrieve information from
				automobile.
				CO:1 Describe the types of
				Autonomous Vehicles.
				CO:2 Discuss Safety frameworks-
				ISO 26262.
25	**	) ( A TE 1 2 2		
27	II	MAT122	Autonomous & Connected Vehicles	CO:3 Analyze and syntheses
				Perception and Planning.
				CO:4 Discuss computer visions.
				CO:5 Discuss and describe recent
				trends in Autonomous Vehicles.
_	_	1		CO:1 Explain various physio-
28	II	MAT123	Hydrogen and Fuel Cell	chemical properties of hydrogen.
		1		anometa properties of flydrogen.

	ı	1	T	CO 2 Day 14 and 1 at 1
				CO:2 Describe various production
				techniques and storage methods of
				hydrogen.
				CO:3 Explain the concept- methods
				and various features related to usage
				of hydrogen in SI Engines.
				CO:4 Explain the concept- methods
				and various features related to usage
				of hydrogen in CI Engines.
				CO:5 Illustrate the technical features
				of fuel cells for automotive
				applications.
				Outline the design concepts of
				hydrogen fuel cell systems for road
				vehicles.
				CO:1 Acquire sufficient knowledge
				in the respective Industry.
				CO:2 Explain the various
				departments in the industry.
29	III	MAE3010	Industry Internship	CO:3 Identify problems in the
				process in Industry.
				CO:4 Suggest some remedies for the
				identified problems
				CO:1 Explain the contributions of
				various researchers in the field of
		III MAE3030	Dissertation Phase-I	
				design engg. after carrying out
				literature survey from reputed
				journals
30	III			CO:2 Recognize the gap in the
				research and define a problem
				statement

				CO:1 Design new methodology to
38				address the problem
	IV	IV MAE4020	Dissertation Viva-voce	CO:2 Justify the results obtained
	1,			from new methodology
				CO:3 Write technical report and
				defend work.

- Department Name :- Civil Engineering
- UG Program Name :- Civil Engineering
- **Vision:** -To be an outstanding department devoted to provide high end research and technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community.

#### • Mission: -

- 1. To design curriculum based on changing needs of stakeholders & provide excellence in delivery & assessment to ensure holistic development of civil engineering students.
- 2. To enhance research & consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.
- 3. To mentor students in pursuit of higher education, entrepreneurship and global professionalism.

Sr. No.	Program Outcomes
1.	Engineering knowledge: Apply the knowledge of mathematics, science, engineering
	fundamentals, and an engineering specialization to the solution of complex engineering
	problems.
2.	Problem analysis: Identify, formulate, review research literature, and analyze complex
	engineering problems reaching substantiated conclusions using first principles of
	mathematics, natural sciences, and engineering sciences.
3.	Design/development of solutions: Design solutions for complex engineering problems and
	design system components or processes that meet the specified needs with appropriate
	consideration for the public health and safety, and the cultural, societal, and environmental
	considerations.
4.	Conduct investigations of complex problems: Use research-based knowledge and research
	methods including design of experiments, analysis and interpretation of data, and synthesis
5.	of the information to provide valid conclusions
3.	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern
	engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6.	The engineer and society: Apply reasoning informed by the contextual knowledge to assess
0.	societal, health, safety, legal and cultural issues and the consequent responsibilities relevant
	to the professional engineering practice.
7.	Environment and sustainability: Understand the impact of the professional engineering
,.	solutions in societal and environmental contexts, and demonstrate the knowledge of, and
	need for sustainable development.
8.	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and
	norms of the engineering practice.
9.	Individual and team work: Function effectively as an individual, and as a member or leader
	in diverse teams, and in multidisciplinary settings.
10.	Communication: Communicate effectively on complex engineering activities with the
	engineering community and with society at large, such as, being able to comprehend and
	write effective reports and design documentation, make effective presentations, and give and
	receive clear instructions.
11.	Project management and finance: Demonstrate knowledge and understanding of the
	engineering and management principles and apply these to one's own work, as a member
12	and leader in a team, to manage projects and in multidisciplinary environments.
12.	Life-long learning: Recognize the need for, and have the preparation and ability to engage in
	independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
1.	Enhance employability and/or entrepreneur skills through in-house and onsite training.
2.	Provide solutions/procedures to societal and rural development problems through research and innovative practices.

Sr. No. Semester Course Code Course Name  1. III CE2012 Building Planning and Design	<ol> <li>Choose appropriate building materials for building construction applications.</li> <li>Prepare a functional design of components for residential buildings.</li> <li>Plan and design residential buildings.</li> <li>Choose the appropriate type of plumbing, electrification system and building finishes for residential buildings.</li> <li>Classify various forces and their effects,</li> </ol>
and Design	<ul> <li>building construction applications.</li> <li>2. Prepare a functional design of components for residential buildings.</li> <li>3. Plan and design residential buildings.</li> <li>4. Choose the appropriate type of plumbing, electrification system and building finishes for residential buildings.</li> </ul>
	for residential buildings.  3. Plan and design residential buildings.  4. Choose the appropriate type of plumbing, electrification system and building finishes for residential buildings.
	<ul><li>3. Plan and design residential buildings.</li><li>4. Choose the appropriate type of plumbing, electrification system and building finishes for residential buildings.</li></ul>
	4. Choose the appropriate type of plumbing, electrification system and building finishes for residential buildings.
	electrification system and building finishes for residential buildings.
	finishes for residential buildings.
	1 Classify various forces and their affects
2. III	1. Classify various forces and their effects,
	to analyze real life problems.
	2. Analyze engineering problems applying
	conditions of equilibrium
CE2032 Engineering	3. Apply fundamental concepts of
Mechanics Mechanics	Kinematics and Kinetics to the analysis
	of practical problems
	4. Determine Centroid & Moment of Inertia
	of the geometrical plane laminae
3. III	1. Analyze structural members for various
	types of stresses and strains.
Strength of	2. Determine shear and bending stresses for
CE2052 Strength of Material	determinate beams.
	3. Construct shear force and bending
	moment diagrams for determinate beams.
4. III	Solve problems on linear differential
"   III	equations with constant coefficients.
	2. Apply linear differential equations (LDP)
	to deflection of beams and Columns.
	3. Solve problems on linear partial
	differential equations with constant
SU2052 Engineering	coefficients.
SH2052 Engineering Mathematics III	4. Determine Fourier series of given
	function.
	5. Compute Karl Pearson's coefficient of
	correlation and determine regression
	lines.
	6. Use probability distributions to solve the
	engineering problems
5. III	Calculate reduced levels and prepare
	contour maps.
	2. Calculate the angular and linear
OF2072	measurements by using tachometry and
CE20/2 Surveying	trigonometry
	3. Design and Set out the curve on field.
	4. Illustrate the principles of advanced
	surveying techniques.
CE2072 Surveying	<ul><li>2. Calculate the angular and linear measurements by using tachometry and trigonometry</li><li>3. Design and Set out the curve on field.</li></ul>

Sr. No.	Semester	<b>Course Code</b>	Course Name	Course Outcome
6.	III			<ol> <li>Study the importance and sensitivity of environment.</li> <li>Interpret the over exploitation of natural</li> </ol>
		SH2172	Environmental Science (Mandatory Course)	resources and follow the environmental ethics.  3. Explain the methods to protect environment and prevent environmental pollution.  4. Apply their knowledge and skills to solve their environment related problems.
7.	Ш	CE2092	Building Planning and Design lab	<ol> <li>Explain properties and uses of different building materials.</li> <li>Draw various building components using AutoCAD software.</li> <li>Prepare submission drawing of residential building using AutoCAD.</li> <li>Prepare working drawings of residential building using AutoCAD.</li> <li>Draw line plan of various public buildings.</li> </ol>
8.	III	CE2112	Surveying Lab	<ol> <li>Calculate reduced levels and prepare contour maps by using theodolite.</li> <li>Design and Set out the curve on field.</li> <li>Perform setting out for various construction works.</li> <li>Apply tachometry and trigonometry concepts to calculate distances &amp; elevations.</li> <li>Prepare the layout map by using the Total Station.</li> </ol>
9.	III	CE2132	Strength of Material lab	<ol> <li>Demonstrate behavior of material under axial shear and bending forces.</li> <li>Identify various types of stresses in various structural elements.</li> <li>Determine various strengths of different construction materials</li> </ol>
10.	III	CE2172	Engineering Mechanics Lab	<ol> <li>Verify law of polygon of forces, law of triangle of forces and principle of moment.</li> <li>Compare coefficient of friction of various surfaces in contact.</li> <li>Correlate theoretical and practical results of support reactions and Centroid of plane lamina.</li> <li>Analyze a simple truss.</li> </ol>
11.	III	SH2602	Environment Project	Develop as an individual and in group leadership quality.

Sr. No. Semester Course Code Course Name	Course Outcome
2. Identify	and analyse social problems in
Civil I	Engineering.
3. Develop	p presentation skill through oral
and re	port writing.
4. Acquire	e theoretical knowledge regarding
	s problems in Civil Engineering.
12. III Open Elective –II	
SH**** Choice Based Soft	
Skill Program-I	
	op skills to build self-esteem and
positiv	ve attitude.
Personal 2. Discov	ver ways to overcome
SH254 Effectiveness and procra	stination.
Body Language 3. Demoi	nstrate responsiveness towards
(Lab Oriented) stress a	and health issues.
4. Interpr	ret the non-verbal behaviour of a
person	1.
14. III & IV 1. Exhibi	it interpersonal communication
skills.	
Interpersonal Skills 2. Demon	nstrate decision-making skills.
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	conflict resolution styles
	oriate in different situations.

	it the ability to work effectively in
team.	
	ibe the traits of a leadership through
Zoucotsinp uno	fe examples.
	the speech as per the audience and
	at requirements.
	ze public speeches.
	nstrate professional etiquette and
ethics.	
	various presentation tools.
Cornorato	m confidently in screenings of
I I Competency Lan	is placement drives.
	onstrate video and tele-conferencing
skills.	onstrate video and tele-conferencing
	in literary concents and the
	in literary concepts and the
	ying aesthetics of English literature.
1 CH358	nstrate reading skills.
	ret different types of text.
	use of newly learnt words in various
contex	
	fy common Earth materials and
	ret their composition, origin, and
Engineering uses.	
CE2022 Geology 2. Recog	
structu	ires, and be able to apply their
] ] ] ] 1 1	edge and skills to interpret earth
Knowl	to morphot turn

Sr. No.	Semester	<b>Course Code</b>	Course Name	Course Outcome
				3. Classify hydro geological properties of
				various rocks.
				4. Describe the processes operating at and
				beneath the Earth's surface.
				5. Compare the suitable site s for
				construction of dam, tunnel in different
				geological formation and geological
				structures.
				6. Interpret spatial relationships of
				geological and geographical features.
19.	IV			1. explain properties of various materials
				used in the manufacture of different kinds
				of concretes and role played by them in
				developing strong, durable concretes
				2. describe various properties of concretes in
				fresh and hardened state
				3. design concrete mixes of given grade
		CE2042	Concrete	using mix design procedures
		0220.2	Technology	recommended by IS Code and ASTM,
				ACI code. D
				4. escribe the properties of special types of
				concretes based on their material
				composition and method of manufacture.
				5. lustrate various mechanisms causing the
				deterioration of concrete /elements of
20	137			concrete structures
20.	IV			Analyze different physical properties of fluid.
				2. Calculate varies forces acting on
				submerged and floating bodies.
				3. Discriminate fluid kinematics and fluid
				dynamics.
		CE2062	Fluid Mechanics	4. Illustrate flow through pipe and flow
				through open channel.
				5. Prepare dimensional analysis using
				different theories and models.
				6. Explain terms used in hydraulic pumps.
<u></u>				
21.	IV			Analysis of circular shafts subjected to
				torsion.
				2. Compute slopes and deflections at
				various locations for determinate beams.
		CE2082	Mechanics of	3. Design axially loaded columns.
		222002	Structures	4. Construct ILD for determinate beams and
				2D trusses.
				5. Determine strain energy stored in the
				material due to gradual, sudden and
	13.7			impact loads. (Note – combine co)
22.	IV	CE2102	Human Values and	Practice the moral value in engineering  profession
			Professional Ethics	profession.

Sr. No.	Semester	<b>Course Code</b>	Course Name	Course Outcome
				<ol> <li>Resolve the moral issues in the profession.</li> <li>Justify the moral judgment concerning the profession.</li> </ol>
23.	IV	CE2122	Applications of Programming Language in Civil Engineering	<ol> <li>Formulate simple programs for arithmetic, logical and loops problems(in C language)</li> <li>Formulate simple programs for arithmetic, logical and loops problems(Microsoft excel).</li> <li>Test and execute the programs and correct syntax and logical errors.</li> </ol>
24.	IV	CE2142	Engineering Geology Lab	Recognize and describe common geological formations related to civil engineering.     Identify the different Rock types.     Implement various methods for water conservation techniques.     Use of electrical resistivity method for determining depth of bedrock or groundwater.
25.	IV	CE2162	Fluid mechanics Lab	<ol> <li>Determine metacentric height, type of flow, major losses, minor losses, coefficient of discharge, coefficient of contraction, and coefficient of velocity of liquid.</li> <li>Design most economical open channel section.</li> <li>Measure velocity of flow using wind tunnel.</li> </ol>
26.	IV	CE2182	Concrete Technology Lab	<ol> <li>Explain standard procedures for testing properties of various ingredients of concrete and concrete mixes/specimens</li> <li>Perform tests on ingredients of concrete and on fresh and hardened concrete to determine their properties using standard procedures</li> <li>Design the concrete mix for a given grade of concrete using guidelines of IS code</li> <li>Prepare the test set up for conducting various tests on concrete mixes / specimens</li> <li>Evaluate the quality of concrete specimens / elements using NDT equipments</li> </ol>
27.	IV	CE2202	Comprehensive Exam II	
28.	IV	CE2222	Internship	Make aware the responsibility of student on work site.

Sr. No.	Semester	<b>Course Code</b>	Course Name	Course Outcome
				2. Seek knowledge, information and details
				at site from live situations at field.
				3. Co relates practical and theoretical
				information and understand the concept
				of experienced learning.
29.	V	CE3012	Design of Steel	Refer and use design codes and hand
			Structures	book for design of steel structural
				elements.
				2. Analyse steel structural members.
		~~~~	~	3. Design steel structural members.
30.	V	CE3032	Geotechnical	1. Classify types of soil using different
			Engineering	index properties of soil.
				2. Calculate permeability of various types of soil using different methods.
				3. Analyse compressibility phenomenon of
				soil using Laboratory and field
				considerations.
				4. Determine settlement, shear strength and
				bearing capacity of soil.
31.	V	CE3052	Irrigation and	1. Discuss aspects of hydrology and ground
			Hydraulic	water flow.
			Structures	2. Estimate the parameters for water
				requirements of crop.  3. Explain importance of ground water
				resources.
				4. Design earthen/ gravity dam
32.	V	CE3072	Environmental	Analyze water and wastewater for
			Engineering	various parameters.
				2. Identify and value the effect of pollutants
				on the environment: atmosphere, water
				and soil.
				3. Prepare layout of water and wastewater
				treatment process. 4. Design water and wastewater Treatment
				Plant.
				5. Interpret the impact of humans on
				environment.
33.	V	CE3092	Transportation	1. Design of geometric components of
			Engineering	highway and railway.
				2. Determine traffic volume for design of
				road infrastructure
				3. Perform pavement design and different
				tests on highway materials
				4. Design rail transportation system
34.	V	CE3112	Geotechnical	1. Determine index and engineering
			Engineering	properties of soil.
			Laboratory	2. Classify soil based on its index properties.
				3. Analyze field conditions through
				Laboratory tests
35.	V	CE3132	Environmental	Analyse water and wastewater
			Engineering	characteristics.
			Laboratory	2. Prepare a layout of water and wastewater
			_	treatment plant.
				3. Design of water and wastewater
				treatment plant.

Sr. No.   Semester   Course Code   Course N	Tame Course Outcome
36. V CE3152 Transportation	on 1. Characterize the pavement materials
Engineering	2. Perform quality control tests on pavement
Laboratory	materials
	3. Design bituminous mixes for flexible
	pavement
	4. Design concrete mix for rigid pavement
	5. Calculate thickness of different layers of
	pavement
37. V SH3032 Aptitude Tra	
	understanding and develop a logical
	approach towards solving Aptitude and
	Reasoning problems.
	2. Understand usage of basic aptitude terms
	of percentages, averages, ratios and
	applications of business aptitude terms of
	profits and interests
	3. Develop a bridge in analogies, series and
	visualizing directions.
	4. Apply various short cuts & techniques to
	manage speed and accuracy to get
	equipped for various competitive and
	campus recruitment exams.
38. V CE 3172 Comprehens Exam III	ive Nil
39. V SH301 Constitution	of 1. Create awareness about law depiction and
India	importance of Constitution
	2. Define Fundamental Rights and
	Fundamental Duties of the Indian Citizen
	to instill morality, social values, honesty, dignity of life and their social
	Responsibilities.
	3. Create Awareness of their Surroundings,
	Society, Social problems and their
	suitable solutions while keeping rights and
	duties of the citizen keeping in mind.
	4. Recognize distribution of powers and
	functions of Local Self Government.  5. Comprehend the National Emergency,
	5. Comprehend the National Emergency, Financial Emergency and their impact on
	Economy of the country.
40. V CE3192 Structural A	
	strain energy method.
	2. Evaluate horizontal thrust, radial shear
	and normal of arches.
	3. Analyse beam by plastic analysis method.
	4. Determine bending stresses in beams due
	to unsymmetrical bending.
	5. Analyse building frames using
	approximate methods of analysis.
	6. Predict failure of structure by using
	o. Fredict failure of structure by using
	various theories of failure
41 V CE3212 Composite	various theories of failure.
41. V CE3212 Composite Materials	various theories of failure.  1. Explain the methods of manufacturing, properties and applications of various

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				<ol> <li>Determine stresses and strains in composites.</li> <li>Apply failure criteria and critically evaluate the results.</li> <li>Explain mechanical behavior of composites due to variation in temperature and moisture.</li> </ol>
42.	V	CE3232	Construction Safety and Quality Management	<ol> <li>Apply various quality improvement techniques.</li> <li>Diagnose problems in the quality improvement process</li> <li>Suggest safety precautions to be taken during the execution of various construction works</li> <li>Analyze possible hazards and accidents in construction projects</li> <li>Interpret various legal aspects of safety in construction.</li> </ol>
43.	V	CE3252	Advanced Construction Techniques	<ol> <li>Develop method statements for construction techniques.</li> <li>Select construction technique for activity.</li> <li>Justify application of construction technique for particular task.</li> <li>Justify construction safety needs and management on projects.</li> </ol>
44.	V	CE3272	Instrumental Monitoring of Environment and Modeling	Analyze the principles of volumetric and instrumental analytical methods in environmental monitoring     Evaluate statistical methods for evaluating and interpreting data of environmental interest     Describe various electrochemical methods     Summarize various material characterization techniques and its principles
45.	V	CE3292	Tunnel Docks and Harbors Engineering	<ol> <li>Develop method statement for given construction activity,</li> <li>Compare tunnel construction technologies</li> <li>Decides safety and ventilation system for tunnels,</li> <li>Suggest appropriate location for construction of docks and harbours</li> <li>Select dredging method for particular operation.</li> </ol>
46.	V	CE3312	Urban Transportation Systems	<ol> <li>Categorize the transportation problems in urban area</li> <li>Perform the transportation survey in urban area to predict the travel demand</li> </ol>

Sr. No.	Semester	<b>Course Code</b>	Course Name		Course Outcome
				3.	Explain different urban transportation
					planning methods
				4.	Predict rout and schedule for mass transit
					system
				5.	Explain different methods of preparation
					of transportation plan
47.	VI	CE3022	Theory of	1.	Analyse indeterminate
			Structures		structures using force methods-
					Consistent deformation method
				2	and three moment equation.
				2.	Apply energy
					principles/theorems for analysis
					of indeterminate beams, truss,
					portal frames and two hinged parabolic arches.
				3.	Analyse indeterminate
				3.	structures using displacement
					methods- Slope-deflection
					equation and moment
					distribution method.
				4.	Analyse indeterminate beam
					and portal frame using matrix
					methods of analysis- Stiffness
					and flexibility matrix method.
48.	VI	CE3042	Estimating and	1.	Apply standard requirements to prepare
			Costing		detailed estimate
				2.	Prepare detailed estimate of building,
					factory shed, road, canal and culvert.
				3.	Derive Rates for construction items,
				4.	Prepare tenders and contracts documents
				5.	Perform valuation of property.
49.	VI	CE3062	Design of Reinforced	1.	Analyze and design singly & doubly
			Concrete Structures		reinforced and flanged beams.
				2.	١
					R.C.C. staircase
				3.	Analyze and design R.C.C. columns,
					isolated pad footing and combined
					footing.
50.	VI	SH302	Biology for	1.	
			Engineers		procedures needed to solve real-world
				~	problems
				2.	C
				3.	systems  Analyze biological phenomena with math
				3.	and physics to gain important insights
				4.	
				4.	instruments
				5.	Select the sensors for given biological
					applications
				6.	1 1
					control process.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
51.	VI	CE3082	Estimating &	1. Explain mode of measurement and current
			Costing Laboratory	market rates of civil engineering materials
				and labours.
				2. Prepare detailed estimate of different
				structures like building, road, canal,
				culvert and factory shed etc.
				<b>3.</b> Prepare bar bending schedule of different
				RCC items.
52.	VI	CE3102	Design of Steel	Analyze and design steel industrial shed
			Structures	using STAAD-Pro software.
			Laboratory	2. Interpret the results obtained from the
				software.
				3. Prepare structural drawing of steel
				industrial shed.
53.	VI	CE3122	Comprehensive Exam IV	Nil
54.	VI	SH3042	Aptitude Training-	Develop a thorough conceptual
			II	understanding and develop a
				logical approach towardssolving Aptitude and Reasoning Problems
				2. Understand usage of aptitude terms of
				speed, time and distance and
				permutations, probabilities and
				applications.
				Understand blood relations and ways     of seating arrangements along with
				various geometrical figures
				4. Apply various short cuts & techniques to
				manage speed and accuracy to get equipped
				for various competitive and campus
55.	VI	CE3142	Mini Project	recruitment exams.
33.	V1	CE3142	Willin Floject	Develop as an individual and in group leadership quality.
				2. Identify and analyse social problems in
				Civil Engineering.
				3. Develop presentation skill through oral and
				report writing.
				4. Acquire theoretical knowledge regarding
				various problems in Civil Engineering.
56.	VI	CE3162	Design of Industrial	1. Design industrial buildings, beam
			Structures	columns 2. Design open web sections
				3. Design open web sections 3. Design steel towers, water tanks, truss
				bridge
57.	VI	CE3182	Repair and	1. Diagnose the causes of distress at
			Rehabilitation of	deterioration of concrete structure
			Structures	2. Describe the procedures of various repa
				techniques or methods 3. Suggest appropriate materials and techniqu
				for repair and strengthening
				structures/elements
				4. Prepare a report on condition assessment
<b>5</b> 0	VII	CE2202	Construction	of buildings based on observations
58.	VI	CE3202	Construction Economics and	1. Identify appropriate economic
			Finance	alternatives.
L	I	1	1	

Sr. No.	Semester	Course Code	Course Name		Course Outcome
				2.	Calculate depreciation and taxes for
					economic analysis.
				3.	Select appropriate alternative related to
					equipment.
				4.	Discuss methods of estimate.
				5.	Discuss basics of financial management.
59.	VI	CE3222	Disaster	1.	Analyze effects of natural and manmade
			Preparedness and		disasters.
			planning	2.	Demonstrate disaster management
					program.
				3.	Analyze vulnerable conditions and risk
					assessment.
				4.	Construct layout for sanitary landfill site
					and composting site
				5.	Describe stakeholder's role in disaster
				3.	response.
60.	VI	CE3242	Air Quality	1.	Illustrate structure of the atmosphere Air
			Monitoring and		Pollution, Scales of air pollution
			Modelling	2.	Interpret impact of air pollution on

				operation.
			Construction	<ol> <li>Perform economic analysis of equipment.</li> <li>Select earthwork equipment based on</li> </ol>
		CE 4032	Equipment and	3. Select earthwork equipment based on production and site requirements.
			Methods	4. Decide plant capacity required for a
				project.
				5. Select Equipment fleet for Project.
71.	VII			Construct ILD for indeterminate beams.
			A.1 1	2. Analyze and construct BMD, TMD for
		CE4092	Advanced	beams curves in plan.
			Structural Analysis	3. Analyze beam on elastic foundation
				under various loads.

Sr. No.	Semester	<b>Course Code</b>	Course Name	Course Outcome
				<ol> <li>Analyze beam-column with different support and loading conditions.</li> <li>Determine forces in space truss members.</li> <li>Evaluate various forces developed in cables and stiffening girder.</li> </ol>
72.	VII	CE4112	Finite Element Analysis	<ol> <li>Apply variational and direct approach method for 1D, 2D problems.</li> <li>Develop element stiffness matrix for 1D, 2D &amp; 3D problem.</li> <li>Describe Convergence and compatibility requirements.</li> <li>Generate relationship between natural and cartesian coordinate system.</li> <li>Formulate element stiffness matrix for axisymmetric elements.</li> </ol>
73.	VII	CE4132	Project Management	<ol> <li>Analyze impact of time, cost and scope on construction projects.</li> <li>Develop pre-feasibility report for construction project.</li> <li>Plan the project using various techniques.</li> <li>Develop project close out checklist for given project.</li> <li>Apply techniques for manpower planning.</li> </ol>
74.	VII	CE4152	Rock Mechanics	<ol> <li>Describe the theory and analysis of in-situ induced stresses in a rock mass and structurally controlled failure.</li> <li>Apply the principles of rock mechanics and excavation design to develop excavation proposals for given geologic environments.</li> <li>Analyze the rock and soil slope stability and rockfall hazards.</li> <li>Explain the principles and techniques of reinforcement design for the primary failure modes in underground rock excavations</li> </ol>
75.	VII	CE4172	Industrial Waste Management	<ol> <li>Apply various techniques of wastewater volume and strength reduction</li> <li>Analyze characteristics of Industrial wastewater.</li> <li>Suggest different wastewater treatment options for industrial wastewater.</li> <li>Design Effluent Treatment Plant for Industrial wastewater treatment.</li> </ol>
76.	VII	CE4192	Pavement Analysis and Design	<ol> <li>Suggest suitable materials for different types of pavements.</li> <li>Analyse the pavement components with respect to their material composition.</li> <li>Estimate the stresses induced due to wheel load and temperature.</li> <li>Design the pavement, flexible or rigid, for the conditions prevailing at site.</li> <li>Understand the variation in specification for pavement materials used in other countries.</li> </ol>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
77.	VII	CE4212	Advanced Structural Analysis Lab	<ol> <li>Analyze beams curved in plan, multistoried buildings, space frames using classical methods and software.</li> <li>Compare results of results of classical methods of structural analysis using software results.</li> <li>Critique on the analysis results obtained by software.</li> </ol>
78.	VII	CE4232	Finite Element Analysis Lab	<ol> <li>Illustrate terms used in Finite Element Method</li> <li>Analyse 1D &amp; 2D problems.</li> <li>Develop solution of 2D &amp; 3D problems using Finite Element software</li> </ol>
79.	VII	CE4652	Project Management Laboratory	<ol> <li>Develop a project charter for a construction project.</li> <li>Analyze feasibility of project.</li> <li>Determine optimum time and optimum cost of project through network compression.</li> <li>Develop project in Microsoft project tool.</li> <li>Plan resources required for execution of the project.</li> </ol>
80.	VII	CE4272	Rock Mechanics Laboratory	<ol> <li>Determine the physical and mechanical properties of rock sample.</li> <li>Identify various types of rock based on observations and laboratory testing.</li> <li>Prepare the site investigation report.</li> </ol>
81.	VII	CE4672	Industrial Waste Management Laboratory	<ol> <li>Analyse Industrial wastewater characteristics.</li> <li>Prepare a layout of wastewater treatment plants for Industrial wastewater.</li> <li>Design of Effluent Treatment Plant for Industrial wastewater.</li> <li>Prepare Field visit Report of ETP of Industry.</li> </ol>
82.	VII	CE4312	Pavement analysis and Design Laboratory	<ol> <li>Categorize bituminous materials.</li> <li>Analyse quality control of pavement materials</li> <li>Design bituminous mixes for flexible pavement.</li> <li>Design concrete mix for rigid pavement</li> </ol>
83.	VII	CE4392	Advanced Structural Design	<ol> <li>Analyze and design RC structures and their components like building frames, flat slab, retaining walls, water tanks and piles using relevant codes and applying codal provisions.</li> <li>Analyze the slabs of irregular shapes by yield line theory and design rectangular and circular slabs for yield moments.</li> <li>Sketching the detailing of reinforcement in structural components of building frames, flat slab, retaining walls, water tanks and</li> </ol>

Sr. No.	Semester	Course Code	Course Name	Course Outcome
				piles.
84.	VII	CE4412	Pre-Stressed Concrete Structures	<ol> <li>Explain the concept and importance of pre-stressing.</li> <li>Analyse the pre-stressed concrete sections.</li> <li>Design the pre-stressed concrete sections for flexure and shear.</li> <li>Design an end block for pre-stressed members.</li> <li>Design the pre-stressed concrete beams.</li> <li>Perform the structural analysis of determinate and indeterminate structures using classical methods, force and</li> </ol>
		CE4432	Matrix Methods of Structural Analysis	displacement methods.  2. Analyze the structures by using the stiffness & flexibility method.  3. Solve multiple degree of freedom two-dimensional problems involving trusses & beams.
86.	VII	CE4452	Construction Resource Planning and Management	<ol> <li>Codify materials for construction resource planning and management.</li> <li>Select vendor for material purchase in construction resource planning.</li> <li>Manage inventory for construction resource planning and management.</li> <li>Describe employee development and welfare.</li> <li>Design performance appraisal matrix construction resource planning and management,</li> </ol>
87.	VII	CE4472	Total Quality Management	<ol> <li>To identify basic requirements for applying TQM in construction.</li> <li>To prepare the TQM framework.</li> <li>To apply seven QC tools of quality assurance.</li> <li>To use six sigma techniques to improve quality.</li> </ol>
88.	VII	CE4492	Air Pollution and Control	<ol> <li>Examine structure of the atmosphere air pollution, scales of air pollution.</li> <li>Interpret on sources of air pollution natural and artificial, air pollution Episodes</li> <li>Analyse effect of different air pollutants on man, animals and plants.</li> <li>Design Stack height and explain meteorology, transport and control mechanism.</li> <li>Evaluate effects of noise pollution.</li> </ol>
89.	VII	CE4512	Fundamentals of Urban and Regional Planning	<ol> <li>To apply international planning and design theories in a development design.</li> <li>To measure the impact of manmade activities on urbanization.</li> <li>To evaluate the impact of urban development plans in regards to sustainable urban development and urban quality.</li> </ol>

				<ul> <li>4. Apply basic principles of marketing for various products.</li> <li>5. Prepare market survey.</li> <li>6. Apply knowledge of marketing management for selected business.</li> </ul>

- Department Name :- Department of Civil Engineering
- PG Program Name: M Tech Structural Engineering
- Vision and Mission :-

# **Department Vision:**

To be an outstanding department devoted to provide high end research, technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community.

# **Department Mission:**

- To design curriculum based on changing needs of stakeholders & provide excellence in delivery & assessment to
  ensure holistic development of civil engineering students.
- To enhance research & consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.
- To mentor students in pursuit of higher education, entrepreneurship and global professionalism.

Sr. No.	Program Outcomes
1.	PO1: An ability to independently carry out research /investigation and development work to solve practical problems.
2.	PO2: An ability to write and present a substantial technical report/document.
3.	PO3: Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.

Sr.	Program Specific Outcomes
No.	
1.	PSO 1:An ability to design civil engineering structures and execute the projects.
2.	PSO2 :An ability to use modern tools and techniques, skills, instrumentation and software packages necessary
	to predict and solve complex engineering problems.
3.	PSO3: An ability to perform efficiently with others as part of collaborative and/or multidisciplinary team
	with ethics.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	CES1012	Advanced structural	1. Construct of ILD for reactions, S.F. and
			analysis	B.M. for indeterminate structures.
				2. Draw SFD, BMD and TMD for beams
				curved in plan for various loading and
				support condition.
				3. Analyze the beam-columns.
				4. Analyze the skeleton <b>structures</b> by using
				matrix method.

		T	<u> </u>	
				5. Solve civil engineering boundary value problems.
2.	I	CES1022	Advanced solid mechanics	<ol> <li>Analyze bodies for stresses and strains.</li> <li>Analyze prismatic bars and tubes subjected</li> </ol>
				to torsion. 3. Analyze beams and thick cylinders for
3.	Ī	CEC1022	Store strengt	elasto-plastic loading.  1. Analyze single and multi-degree freedom
3.	1	CES1032	Structural Dynamics &	systems by fundamental theory and
			Earthquake Engineering	<ul><li>equations of motion.</li><li>2. Analyze single and multi-degree freedom</li></ul>
				systems by numerical methods.
				3. Apply principles of planning, structural systems for seismic resistant to structures.
				4. Determine causes of earthquake and its effect on human.
				5. Evaluate lateral loads developed on multi-
				storied structures by the Response Spectrum Analysis Method and Static
4.	I	CES1042	Structural Design	Equivalent Method.  1.Analyze and design of the steel structures
٦.	1	CES1042	Lab – I	such as truss, Towers, Steel Building
				Frame and Hoarding Board etc. using standard software packages.
				2.Interpret the results of analysis and design obtained from the software.
				3. Prepare drawings of detailing of structural
				elements.
5.	Ι	CES1052	Advanced Concrete Technology Lab	Perform quality control tests on various ingredient of concrete and special
			reemology 240	concrete.
				2. Design ordinary and special concretes using existing and new methods of mix
				design.
				<ul><li>3. Evaluate quality of concrete using NDT.</li><li>4. Recommend appropriate methods /</li></ul>
				techniques for repair and strengthening
	Ī	CEC10/2	Mini Ducio et I	works.
6.	1	CES1062	Mini Project I	<ol> <li>Identify research problem.</li> <li>Prepare and present statement of Purpose.</li> </ol>
				3. Perform analysis work.
				<ul><li>4. Communicate with outside agencies.</li><li>5. Write report and Present the work carried</li></ul>
				out.
7.	I	CES1072	Advanced Design of	<ul><li>6. Develop self-learning ability</li><li>1. Design steel structures and frames by</li></ul>
			Steel Structures (PE I)	varying methods.
	I			2. Design various connectivity of structure as
				per code provisions.
8.	I	CES1092	Advanced concrete	per code provisions.  1. Illustrate the micro-structural aspects
8.	I	CES1092	Advanced concrete technology	Illustrate the micro-structural aspects associated with concrete/concrete
8.	I	CES1092		1. Illustrate the micro-structural aspects

			T	
				<ol> <li>and new methods of mix design.</li> <li>Explain various types of special concretes, their properties and methods of manufacturing and placing.</li> <li>Describe various special processes and new techniques involved in various concreting jobs.</li> <li>Analyze qualities of fresh and hardened concrete / concrete elements using appropriate destructive or non-destructive testing methods for evaluating quality.</li> <li>Identify and discuss various mechanisms affecting durability of concrete / concrete structures /elements</li> </ol>
9.	I	SHP517	Numerical Methods for Structural Engineers	<ol> <li>Estimate the error.</li> <li>Apply the relevant numerical method for interpolating the polynomial</li> <li>Develop the equation to be fitted and fit the curve for given data</li> <li>Estimate numerically the solution of given algebraic equation.</li> <li>Use the relevant method for solving the simultaneous linear equations and compute the Eigen values.</li> <li>Construct the fuzzy set for given linguistic variable and apply fuzzy logic.</li> </ol>
10.	I	SHP551	Technical Communication	<ol> <li>Acquire skills required for good oral and written communication.</li> <li>Demonstrate improved writing and reading skills.</li> <li>Ensure the good quality of oral and written communication.</li> </ol>
11.	П	CES2012	Finite Element Analysis in Structural Engineering	<ol> <li>Analyze structure using finite element method.</li> <li>Solve continuum problems using finite element analysis.</li> <li>Execute the Finite Element Program/Software.</li> </ol>
12.	II	CES2022	Research Methodology& Intellectual Property Rights(IPR)	<ol> <li>Formulate a research problem.</li> <li>Analyze research related information.</li> <li>Prepare and present research proposal/paper by following research ethics.</li> <li>Make effective use of computers and computing tools to search information, Analyze information and prepare report.</li> <li>Describe nature and processes involved in development of intellectual property rights.</li> </ol>
13.	II	CES2032	Structural design LabII	1. Analyze and design of the RCC structures such as building, retaining wall, flat slab and foundations using standard software packages.

	ı	T	T	
				<ul><li>2. Interpret the results of analysis and design obtained from the software.</li><li>3. Prepare drawings of detailing of structural</li></ul>
				elements.
14.	II	CES2042	Structural Dynamics and	<ol> <li>Examine damping effect on beam model.</li> <li>Perform testing of various models of</li> </ol>
			Earthquake Engineering Lab	structures for dynamic loading
15.	II	CES2052	Mini project II	1. Identify research problem
				<ul><li>2. Prepare and present statement of Purpose</li><li>3. Perform analysis work.</li></ul>
				4. Communicate with outside agencies.
				5. Write report and Present the work carried
				Out.
16.	II	CES2062	Advanced	6. Develop self-learning ability  1. Design RCC structural elements for
10.	, n	CLSZVOZ	Earthquake Engineering (PE-II)	ductility requirements as per IS 13920 2916.
				2. Apply new techniques for controlling the vibrations of the structures.
				3. Evaluate natural frequency of continuous
				elements/systems. 4. Design elevated water tank for dynamic
				loading.
				5. Apply IS code clauses masonry structures for improving resistance to earthquake
				forces.
17.	II	CES2072	Theory and Applications of	1. Formulate constitutive behavior of composite materials – Ferro cement,
			Cement	SIFCON and Fiber Reinforced Concrete -
			Composites(PE-II)	by understanding their strain- stress behavior.
				2. Classify the materials as per orthotropic and anisotropic behavior.
				3. Estimate strain constants using theories
				applicable to composite materials.
				Analyze and design structural elements made of cement composites
18.	II	CES2082	Structural	1. Use variational principle for optimization.
			Optimization (PE-II)	2. Apply optimization techniques to structural steel and concrete members.
			11)	3. Design using frequency constraint
19.	II	CES2092	Design of Bridges	1. Study various components and loadings on
			and Flyovers (PE- III)	bridge. 2. Analyze and design of super-structure of
				various bridges and flyovers.
				3. Analyze and design of sub-structure of various bridges and flyovers.
20.	II	CES2102	Design of Pre-stress	1. Explain the concept of pre-stressing,
			Concrete Structures(PE-III)	behavior of the pre-stressed structures vis- à-vis that of the RCC structure.
				2. Choose the decision with respect to the
				choice of pre-stressed section over RCC.  3. Describe the application of these
				techniques in civil engineering
				construction.

r			T	
				4. Analyze the various pre-stressed components of the structures and design the same.
				5. Design the various pre-stressed components of the structures and design the same.
21.	II	CES2122	Design of Advanced Concrete Structures (PE-IV)	Analyze the special R.C.C. structures.     Design and prepare detail structural drawings.
22.	II	CES2132	Design of Industrial Structures(PE-IV	<ol> <li>Design the Steel Gantry Girders.</li> <li>Design the Steel Portal, Gable Frames.</li> <li>Design Steel Bunkers and Silos.</li> <li>Design Chimneys and Water Tanks</li> </ol>
23.	Ш	CES3011	Industrial Training	<ol> <li>Identify training area.</li> <li>Prepare on site work report of training.</li> <li>Perform analysis work.</li> <li>Communicate with agencies.</li> <li>Generate report and Present the work carried out</li> </ol>
24.	III	CES3021	Certificate course	<ol> <li>Develop technical competence in skills of structural engineering field.</li> <li>Apply the techniques for structural engineering practice.</li> <li>Develop oral and written presentation skills for structural engineering projects.</li> <li>Design and interpret data for structural engineering projects.</li> </ol>
25.	Ш	CES3031	Dissertation Phase-I	<ol> <li>Identify research problem from literature survey.</li> <li>Prepare research design for identified problem.</li> <li>Prepare synopsis report.</li> <li>Present the work plan to be carried out.</li> </ol>
26.	III	CES3051	Dissertation Phase-II	1. Prepare the set up for experimentation/ develop/ learn software. 2. Perform experimental/software analysis for validation of research work. 3. Generate report of work carried out. 4. Present the work carried out.
27.	IV	CES4011	Dissertation phase- III	<ol> <li>Perform experimental/software analysis for developing research work.</li> <li>Generate report work carried out.</li> <li>Present the work carried out</li> </ol>
28.	IV	CES4021	Dissertation phase-IV	<ol> <li>Perform experimental/software analysis for developing research work.</li> <li>Generate report work carried out.</li> <li>Publish a research paper in journals/conference.</li> <li>Prepare report using total work done as dissertation report.</li> <li>Present the work carried out.</li> </ol>

- Department Name :- Department of Civil Engineering
- PG Program Name: M Tech Construction Management
- Vision and Mission :-

# **Department Vision:**

To be an outstanding department devoted to provide high end research, technical education in Civil engineering which will produce socially aware professionals to provide solutions to global community.

# **Department Mission:**

- To design curriculum based on changing needs of stakeholders & provide excellence in delivery & assessment to
  ensure holistic development of civil engineering students.
- To enhance research & consultancy resulting in solving problems related to civil engineering infrastructure as well as society at large.
- To mentor students in pursuit of higher education, entrepreneurship and global professionalism.

Sr. No.	Program Outcomes
1.	An ability to independently carry out research /investigation and development work to
	solve practical problems.
2.	An ability to write and present a substantial technical report/document.
3.	Students should be able to demonstrate a degree of mastery over the area as per the
	specialization of the program. The mastery should be at a level higher than the
	requirements in the appropriate bachelor program.
4.	An ability to Analyze, evaluate, and select computer applications for the purpose of
	efficient and effective construction project management.
5.	An ability to Analyze construction projects relative to fundamental aspects of construction
	management (i.e., cost, schedule, quality, safety, ethics) and develop appropriate solutions
6.	Apply ethical business principles and Demonstrate responsibility for safety planning and
	productivity in construction management settings.

Sr. No.	Program Specific Outcomes
1.	Enhance employability and/or entrepreneur skills through in-house and onsite training.
2.	Provide solutions/procedures to societal and rural development problems through research
	and innovative practices.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	CCM1014	Construction	1. Implement project management
			Project	framework.
			Management	2. Develop time schedules for projects.

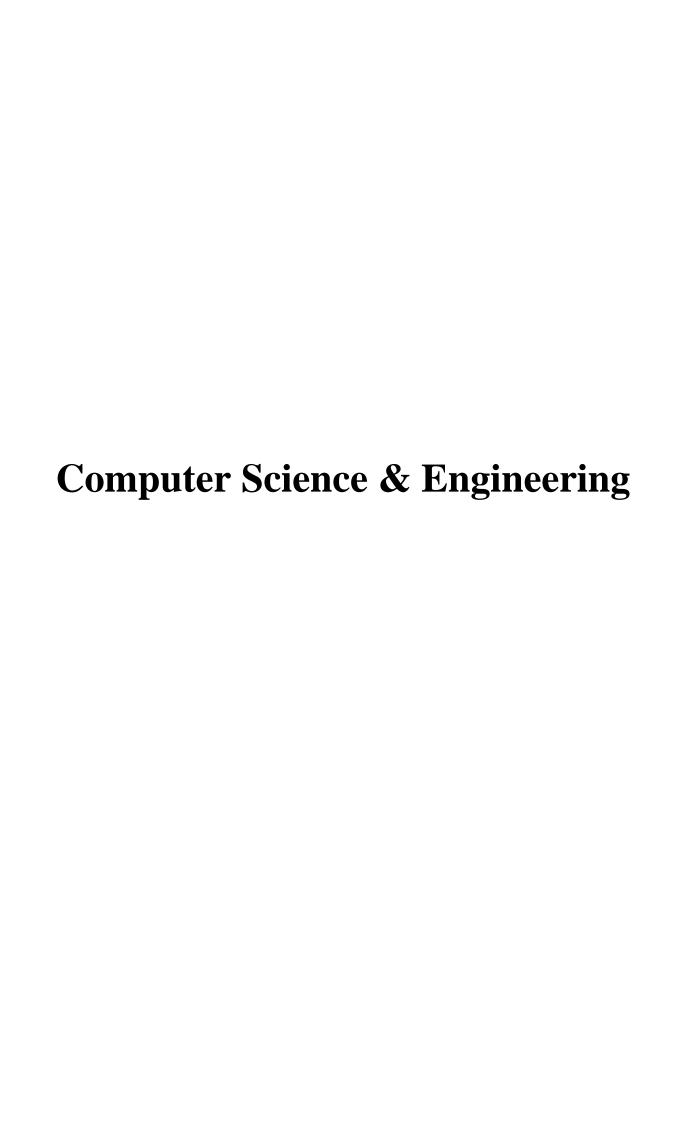

quality, human resources and communications. 4. Apply project management information system for construction projects.  2. I CCM1024 Construction Equipment & Techniques  Techniques  3. 16.	II	CCM2014	Project Economics & Financial	1. Select the best project of different
			Management	alternatives.
			Management	2. Analyze projects using different
				techniques.
				3. Identify and suggest sources
				of finance.
				4. Analyze different financial
				statement.
				5. Prepare and maintain different
				site accounts for civil
				engineering projects
17.	II	CCM2024	Construction	1. Identify applications of contract types
			Contracts	for construction projects.
				2. Develop tender document for
				construction project.
				3. Perform comparative analysis of types
				of contract.
				4. Analyze arbitration documents for
				construction project.
18.	II	CCM2034	Special	Select proper technique and
			Construction	equipment for a project,
			Methods	2. Decide type of pile
				foundation for a project,
				3. Plan site investigation.
19.	II	CCM2044	Health & Safety	1. Classify hazards to employees on
			Management	construction site
				2. Determine safe practices necessary for a
				project site
				3. Identify the causes of accidents and
				suggest preventive measures to avoid
				accident.
				4. Prepare safety management plan.
20.	II	CCM2054	Lean Construction	1. Compare lean and conventional
				production management.
				2. Develop framework for lean
				construction application.
				3. Apply lean construction techniques to
				construction projects.
				4. Analyze and present case studies.
21.	II	CCM2074	Value Engineering	1. Perform value analysis,
				2. Develop life cycle process of a project,
				3. Apply Value Engineering methods,
				4. Perform valuation of an asset.
22.	II	CCM2084	Building	Investigate design factors influencing
		J C.1.1200-1	Maintenance	services selection,
				2. Select sustainable building services for
				a project.
				commissioning of building service
				system.

32. IV	CCM4022	Dissertation Phase-	1. Compile the work done in appropriate
		IV	sequence.
			2. Derive conclusion of the work done of
			the project.
			3. Analyze proposed system.
			4. Perform plagiarism analysis of
			compiled report.
			5. Prepare and present the final
			dissertation report in desired format.

**Department Name :-**Computer Science & Engineering **UG Program Name :-** B. Tech in Computer Engineering

Vision and Mission :-

#### Vision:

To excel in the computer science engineering discipline through continuous research, innovation and industry-oriented curriculum leading to responsible IT professionals.

#### Missions

- 1. To inculcate teaching and learning process promoting state-of-the-art IT industry practices in computer science engineering and technology to address global challenges.
- 2. To integrate academics, research and entrepreneurship skills to address present and future challenges of the society and industry.
- 3. To develop professionalism with strong foundations adapting to changing technology.

Sr. No.	Program Outcomes
1.	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2.	<b>Problem analysis:</b> Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3.	<b>Design/development of solutions</b> : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4.	<b>Conduct investigations of complex problems</b> : Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5.	<b>Modern tool usage</b> : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6.	<b>The engineer and society</b> : Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7.	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8.	<b>Ethics</b> : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9.	<b>Individual and team work</b> : Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10.	<b>Communication</b> : Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11.	<b>Project management and finance</b> : Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12.	<b>Life-long learning</b> : Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes				
1.	Apply knowledge of database management systems, data mining and analytics techniques to solve real world problems				
2.	Apply knowledge of machine learning and intelligence to identify, formulate and solve complex engineering problems				
3.	Design, develop and deploy software using emerging IT technologies like open source tools, mobile application development platforms, web technologies and cloud computing				

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	(CS2012)	Computer Organization	CO 1. To conceptualize basics of organizational and architectural issue ,functional unit of processor in digital computer and apply in computer organization
				CO 2. Construct the ability to perform computer arithmetic operations such as binary, signed, decimal, hexadecimal, floating point numbers.
				CO 3. Interpreting memory organization that uses banks for different word size operations and cache mapping techniques including translation, allocation.
				CO 4. Ability to understand input/output organization, data transfer techniques for computer.
				CO 5. To analyze processor performance improvement using instruction level parallelism in digital computer.
2.		(CS2032)	Data Structure & Algorithms	CO1: Compare between linear and nonlinear data structures.
				CO2: Describe the characteristics of various data structure such as stacks, queues, trees, graphs and Hash tables.
				CO3: Analyze various searching and sorting algorithms and apply it to solve particular problem.
				CO4: Determine a suitable data structure and algorithm to solve a real world problem.
3.		(CS2052)	Digital Electronics	CO1: Perform various arithmetic operations on different number system
				CO2: Apply Boolean algebra to solve logic functions  CO3: Design, implement, and analyse various logic circuits
				CO4: Apply the programming techniques in developing the assembly language program for microprocessor system
4.		(CS2072)	Discrete Mathematics	CO1: Express mathematical statements using logical connectives.
				CO2: Analyze and perform operations associated with sets.  CO3: Distinguish between relations and
				functions.  CO4: Describe the concept of lattices and Boolean algebra.
				CO5: Apply graph theory concepts to solve problems of connectivity.

-	(CS2091)	Onanatina System	CO1. Explain basis concents of anomating
5.	(CS2091)	Operating System	CO1: Explain basic concepts of operating system like memory management.
			· · ·
			CO2: Apply scheduling techniques to solve real world problems.
			CO3: Calculate average waiting time, page
			faults.
			CO4: Differentiate different operating systems
			according to their features.
			CO5: Solve scheduling problem using
			different scheduling algorithms.
6.	(CS2112)		CO1: Learn advanced C topics like command
0.	(652112)		line arguments, file handling, pointers,
		Advanced C	dynamic memory allocation, and Macros.
		Programming Lab	CO2: Implement. Compile and Debug
		1 Togramming Lab	complex C programs.
			CO3: Solve tricky questions on C
			programming.
			CO4: Analyze given C program carefully and
			guess the output of same.
			CO5: Develop problem solving skills among students using C programming.
7.	(CS2132)	Data Structure &	CO1: Implement various data structures in C
7.	(CS2132)	Algorithms Lab	Language.
		Algoriums Lab	
			CO2: Write and execute basic algorithms in C
			language.
			CO3: Choose appropriate data structure to
			develop a real time application.
			CO4: Analyze and compare the static and
			dynamic implementations of various data structures
8.	( CS2152)	Digital Electronics Lab	
0.	(CS2132)	Digital Electronics Lab	CO2: Design various large signation
			CO2: Design various logic circuits
			CO3: 3. Draw flowchart and apply assembly
			language programming techniques to develop the assembly language program for
			microprocessor system.
9.	(CS2172)	Comprehensive Exam-	CO1: Choose proper techniques to find
9.	(CS2172)	I	solution for engineering problems
		1	
			CO2: Solve various types of problems
			CO3: Develop ability to face competitive examinations
			CO4:Inspect the problem & conclude with
10	(SH 2502)	Cl	proper solution
10.	(SH 2592)	Choice based soft skill	CO1: Develop skills to build self-esteem and
		Program-I & II Personal Effectiveness	positive attitude
			CO2: Discover ways to overcome
		and Body Language  Lab	procrastination.
		Lau	CO3: Demonstrate responsiveness towards
			stress and health issues.
			CO4: Interpret the non-verbal behaviour of a
11.	(SH 2612)		person.
11.	(SH 2012)		CO1: Exhibit interpersonal communication skills.
		Interpersonal Skills (	CO2: Demonstrate decision-making skills.
		Work life Balance)	
		WOLK HIC Dalance)	CO3: Apply conflict resolution styles
			appropriate in different situations.
	1	İ	CO4: Demonstrate leadership skills.

10	T	(011.0(22)		CO1. F. 1.11.14 dec. 1.1114 dec
12.		(SH 2632)		CO1: Exhibit the ability to work effectively in
			Leadership and Public	team.
			Speaking	
			Speaking	
				CO2: Describe the traits of a leadership
				through real life examples.
				CO3: Plan the speech as per the audience and
				context requirements.
				CO4: Analyze public speeches.
13.		(SH2692)		CO1: Learn structured approach to define the
				problem with every possible detail, identify
			Innovation Tools &	conflicts and solve them
			Methods for	CO2: Apply User Journey Map to the selected
				problem to show user interaction at various
			Entrepreneurs	stages
				CO3: Analyze the solutions provided by
				competitors for effectiveness and gaps if any
14.	1	(SH 2732)	German Language-	CO1: Introduce herself or himself in German.
- ' '		(=11=,02)	Basic Level	
			Dasic Level	CO2: Can listen and understand alphabets,
				numbers in German language.
				CO3: Make basic and easy sentences required
				in day to day situations.
				CO4: Read, write, speak and listen basic and
	4	/ GXX 0=10)		simple text in German.
15.		(SH 2712)		CO1: To get the students acquainted with
				foreign language.
			Japanese Language-	CO2: To gain knowledge of basic Japanese
			Basic Level	grammar.
				CO3: To acquire basic Japanese language
				skills (listening, speaking, writing, and
				reading).
				CO4: To enable students, demonstrate an
				awareness of the relevance of Japanese
				language to professions and careers.
				CO5: To make students understand the
				cultures and civilizations of the country of
				Japan.
				CO6: To enable the students to function in an
				environment where Japanese is used
				exclusively.
16.	IV	(CS2002)		CO1: Identify and explain the modulation
	(022002)	(		techniques, components used in a
			communication system.	
			CO2: Identify different Network models and	
			Computer Networks	protocols of different layers
				CO3 Discuss the concept multiplexing &
				switching.
				CO4: Recognize and discuss the functions the
				different protocols in network layer
				CO5: Identify the proper transmission control
				protocol for given applications
				CO6: Explain the different services at
				application layer.
17.	7	(CS2022)	Formal Language &	CO1: Apply the mathematical techniques for
			Automata Theory	solving the automata problem.
			110011111111111111111111111111111111111	
				CO2: Implementation of compiler with the
				help finite machine model.

			CO3: Build regular expressions for the regular
			languages.
			CO4: Design a various computation machines
			like finite automata, pushdown automata, and
			I uring machines.
			CO5: Analyze the finite machine model.
18.	(CE2062)	Engineering Mechanics	CO1: Identify various forces and their effects,
10.	(CL2002)	Engineering weenames	to analyze real life problems.
			CO2: Analyze engineering problems applying
			conditions of equilibrium.
			CO3: Determine Centroid & Moment of
			Inertia of the geometrical plane lamina
			CO4: Apply fundamental concepts of
			Kinematics and Kinetics to analyze practical
			problems.
19.	(SH2022)	Engineering	CO1: Compute Karl Pearson's Product
		Mathematics-III	moment correlation Coefficient and tit the
			lines of regression.
20.			CO2: Compute discrete probability
			distribution. Continuous probability
			distributions and Joint probability
			distributions.
			CO3: Apply specific probability distributions
			to real-life examples.
			CO4: Compute the Mathematical formulas for
			the given fuzzy set.
			CO5: Prove additional properties of alpha-cuts
			and use extension principle to fuzzy sets.
			CO6: Apply extension principle to fuzzy
	(222212)		arithmetic and solve fuzzy equations.
21.	(CS2042)		CO1: Define and apply architectural principles
			and mechanisms for data exchange among
			computer
			CO2: Design, implement and analyse simple
			computer networks.
			CO3: Identify& analyse the performance of
		Computer Network	different network layer protocols to formulate
		Lab	and solve network-engineering problems.
			CO4: Identify Operations of TCP/UDP, FTP,
			HTTP, SMTP, SNMP etc.
			CO5: Analyse to compare performance of
			different routing protocols.
			CO6: Compare different networking models.
			CO7: Ability to use techniques, skills, and
			modern networking tools necessary for
			engineering practice.
			CO8: Demonstrate an understanding of
- 22	(000000)		computer communications standards
22.	(CS2062)		CO1. Understand object-oriented design
			concepts and apply them in software system
			design.
		Object Oriented Design	CO2. Implement basic oop concepts like class
			& object, inline functions, dynamic memory
		and Programming Lab	allocations etc
			CO3. Use constructors, destructors, function
			overloading, operator overloading, and friend
			functions in c++.
			CO4. Use c++ for implementing different
			types of inheritance and virtual functions.
1	1		1 types of innertance and virtual functions.

			T
			CO5. Apply advanced features of c++
			programming like exception handling,
			templates etc.
23.	(CE2282)	Engineering Mechanics	CO1: Compare coefficient of friction of
		Lab	various surfaces in contact.
			CO2: Correlate theoretical and practical
			results of support reactions and Centroid of
			plane lamina.
			CO3: Verify law of polygon of forces, law of
			triangle of forces and principle of moment.
24.	(SH2172)		CO1: Study the importance and sensitivity of
			environment.
		Environmental Science	CO2: Interpret the over exploitation of natural
			resources and follow the environmental ethics.
			CO3: Explain methods to protect environment
			and prevent environmental pollution
			CO4: Apply their knowledge and skills to
			solve their environment related problems.
	(SH2602)		CO1: Utilize scientific methods to solve
			environmental problems
		Environmental Science	CO2: Examine technologies for restoration of
			degraded environment
		Project	
			CO3: Develop presentation and report writing
			skills
			CO4: Develop as an individual and in group
			leadership quality
25.	CS2082	Comprehensive Exam	CO1: Choose proper techniques to find
	002002	- II	solution for engineering problems
		11	CO2: Solve various types of problems
			CO3: Develop ability to face competitive
			examinations
			CO4: Inspect the problem & conclude with
			proper solution
26.	(SH 2592)	Open Elective-III	CO1: Develop skills to build self-esteem and
	(322 25 2)	Choice based Soft	positive attitude.
			CO2: Discover ways to overcome
		Skills Program-II	procrastination.
		Personal Effectiveness	CO3: Demonstrate responsiveness towards
		and Body Language	stress and health issues.
		Lab	CO4: Interpret the non-verbal behaviour of a
			person.
27.	SH2612	Interpersonal Skills (	CO1: Exhibit interpersonal communication
	2112012	Work life Balance)	skills.
		,	
			CO2: Demonstrate decision-making skills.
			CO3: 3. Apply conflict resolution styles
			appropriate in different situations.
			CO4: Demonstrate leadership skills.
28.	(SH 2632)		CO1: Exhibit the ability to work effectively in
	(511 2032)		,
		Landarship and D. Li	team.
		Leadership and Public	CO2: Describe the traits of a leadership
		Speaking	through real life examples.
			CO3: Plan the speech as per the audience and
1			
			r context reduirements
			context requirements.  CO4: Analyze public speeches.

29.	( SH2692)	Innovation Tools & Methods for Entrepreneurs	CO1: Learn structured approach to define the problem with every possible detail, identify conflicts and solve them  CO2: Apply User Journey Map to the selected problem to show user interaction at various stages  CO3: Analyze the solutions provided by competitors for effectiveness and gaps if any
30.	(SH 2642)	German Language- Advanced Level	CO1: Introduce herself or himself in German.  CO2: Can listen and understand alphabets, numbers in German language.  CO3:Make basic and easy sentences required in day to day situations  CO4: Read, write, speak and listen basic and simple text in German.
32.	(SH 2622)	Japanese Language-Advanced Level	CO1: To get the students acquainted with foreign language.  CO2: To gain knowledge of basic Japanese grammar.  CO3: To acquire basic Japanese language skills (listening, speaking, writing, and reading).  CO4: To enable students, demonstrate an awareness of the relevance of Japanese language to professions and careers.  CO5: To make students understand the cultures and civilizations of the country of Japan.  CO6: To enable the students to function in an environment where Japanese is used exclusively.
33.	(CS3012)	Database Management Systems	CO1: Express terms related to database design and management.  CO2: Apply the relational algebra structured query language (sql ) for database definition and manipulation.  CO3: To use concept of functional dependency and decompose schema by applying certain normal forms.  CO4: Apply ethical computing concepts and practices to design database and implementation (security, concurrency control , recovery, deadlock handling)

				CO5: To design and create database to solve
				real world problem.
2.4	X 7	(002022)		-
34.	V	(CS3032)		CO1: Explain the role of system programs in
			System Software	development phase and able to apply
				appropriate knowledge of computing
				CO2: Illustrate the logical analysis & design
				aspect of macro with macro pre-processing activities
				CO3: Determine the aspect of language
				processing from linker and loaders perspective
				CO4: Analyze different phases of compilers
				and practice the compiler construction tools
				such as LEX and YACC to build systems
				program modules
				CO5: Design an effective intermediate and
				optimized code generator
				CO6: Describe the various properties of
				optimization and generation
35.	+	(CS3051)		CO1: Explain basic concepts of operating
33.		(C33031)		system like memory management.
			On anatin a Cantana	, ,
			Operating System	CO2: Apply scheduling techniques to solve
				real world problems.
				CO3: Calculate average waiting time, page
				faults.
				CO4: Differentiate different operating systems
				according to their features.
				CO5: Solve scheduling problem using
				different scheduling algorithms.
36.		(CS3052)		CO1: Explain the basic concepts of time and
				space complexity, divide-and-conquer
			Design and Analysis of	strategy, dynamic programming, greedy and
			Algorithm(CS3052)	approximate algorithms, amortized analysis
				and computational geometry.
				CO2: Prove the correctness and analyze the
				running time of the basic algorithms for those
				classic problems in various domains.
				CO3: Identify and apply appropriate algorithm
				design techniques for solving problems.
				CO4: Design an algorithm to solve problem in
				different domains.
				CO5: Explain non-deterministic and
				_
	_	(55555)		randomized algorithms
37.		(CS3072)	Program Elective – I	CO1: Apply fundamentals of Python to solve
			Open Source	real world problems
			Technologies (CS3072)	CO2: Use appropriate control structures in
				Python to optimize the program
				CO3: Apply the knowledge of File Operations
				to read and write files using Python
				CO4: Apply Object Oriented Programming
				concepts using Python for real world problems
				CO5: Develop a program in Python to handle
				the exceptions
				the exceptions

	<u> </u>		1
			CO6: Demonstrate the knowledge of RDBMS
			and Python programming to build database-
			based applications
38.	(CS3092)		CO1: Design static and dynamic web pages
			using scripting languages like HTML and CSS
39.			CO2: Develop a dynamic web application
			using JavaScript and jQuery to demonstrate
			data validation
		Program Elective – I	CO3: Demonstrate knowledge of Angular JS
		Web Technology	by designing dynamic web applications
			CO4: Develop a server-side web application
			using PHP
			CO5: Implement advanced PHP libraries for
			_
			feature rich web application
			CO6: Demonstrate the knowledge of advanced
			PHP using standard PHP frameworks
40.	(CS3112)		CO1:Setup the Android development
		Program Elective – I	environment
		Mobile Application	CO2:Utilize the appropriate User Interface
		Development (	controls in Android app
		CS3112)	controls in Android app
			CO3: Implement SQLite and Shared
			Preferences concepts to store data in Android
			app
			COAL 1 A A A A A A A A A A A A A A A A A A
			CO4:Implement Location and Notification
			based functionalities in Android app
			CO5: Design and develop a Web View based
			Android app
			CO6: Build and deploy Android app on
			Google Play Store
41.	( CS3132)		CO1: Show various concepts related with
71.	( C53132)		network programming using C, C++,
		Program Elective – I	CO2: Implement Socket programming in C++
		•	using different Socket options.
		Network Programming	CO3: Exhibit TCP Client Server
			communication using network programming.
			CO4: Demonstrate UDP socket programming
			and Name resolutions.
			CO5: Apply inter-process communication and
			RPC in given context.
42.	(CS3172)		CO1: Sketch E-R diagram for given Case
.2.	(053112)		Study/ Problem Statement.
			CO2: Design relational database using
			Normalization and Functional Dependency.
			CO3: Implement SQL query for various
		Database Management	operations like retrieval, insertion and
		Systems Lab	manipulation of data etc.
			CO4: Implement PL/SQL cursor, procedure,
			function and trigger
			CO5: Apply hashing mechanism to build hash
			index file on given records.
		1	maca me on given records.

			CO6: Develop a program to connect database
			to an application program
	(CS3152)		CO1: Demonstrate OO features by
	(CS3132)		implementing Java programs.
			CO2: Use Java Language for various
			programming constructs/technologies.
		Java Programming Lab	CO3: Choose an engineering approach to solve problem based on the knowledge of Programming and Operating System.
			CO4: Build GUI to meet user's GUI requirements.
43.	(SH3032)		CO1: Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.
		Aptitude Training I	CO2: Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests
			CO3: Develop a bridge in analogies, series and visualizing directions.
			CO4: Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams.
44.	(CS3192)		CO1: Choose proper techniques to find solution for engineering problems
			CO2: Solve various types of problems
		Comprehensive Exam - III	CO3: Develop ability to face competitive examinations
			CO4: Inspect the problem & conclude with proper solution
45.	(SH301)		CO1: Create awareness about law depiction and importance of Constitution
			CO2: Define Fundamental Rights and Fundamental Duties of the Indian Citizen to instill morality, social values, honesty, dignity of life and their social Responsibilities.
		Indian Constitution	CO3: Create Awareness of their Surroundings, Society, Social problems and their suitable solutions while keeping rights and duties of the citizen keeping in mind.
			CO4: Recognize distribution of powers and functions of Local Self Government.

		Advanced Algorithms	
		Tid (will be a rigorium)	recurrences, which are useful for describing
			the running times of recursive algorithms
			CO2: Formulate the graph search algorithms
			and network flow problems
			CO3:Analyze the knowledge about number -
			theoretic algorithms
			CO4:Articulate the string - matching
			algorithms
			CO5: Introduce the probabilistic analysis and
			randomized algorithms
51.	( CS3242)		CO1: Apply mathematical background for
			analysis of algorithm
			CO2: Explore the concept of designing an
			algorithm.
		Program Elective-II	CO3: Implement various algorithms of
		Advanced Algorithms Lab	graphs, theoretical foundations and
			approximations.
			CO4: Implement the concept of pattern
			matching algorithms.
			CO5: Implement polynomial and FET
52.	( CS3042)		algorithms.
			CO1: Identify compute intensive part from
			sequential algorithm.
		Program Elective-II Parallel Programming	CO2: Design parallel algorithm from given
			sequential algorithm.
			CO3: Develop parallel programs to use multi-
			core processors using OpenMP
			CO4: Write parallel programs to demonstrate
			various features of CUDA C/C++
			CO5: Explore different compute intensive
			applications.
53.	(CS362)		CO1: Design different parallel algorithms to
		Program Elective-II	solve compute intensive problems.
		Parallel Programming Lab	
			CO2: Use different parallel programming
			languages on multi-core and many-core

			systems.
			CO3: Perform the analysis with different
54.	(CS3062)		performance metrics.
54.	( C33002)		CO1: Describe fundamental concepts of cloud
			computing and its Architecture
			CO2: Explain the core concepts of
			Virtualization
		Program Elective-II	CO3: Differentiate and analyze the
		Cloud Computing	components of various cloud platforms
			CO4: Explain the key components of Amazon
			web Services
			CO5: Analyze the applications of Cloud
			Computing in different domains
55.	( CS3282)		CO1: Implement Infrastructure, storage as a Service
			CO2: Design and deploy a web application in a PaaS environment
		Program Elective-II Cloud Computing Lab	CO3: Install and use a generic cloud environment that can be used as a private cloud
			CO4: To gain competence in evaluating the performance and identifying bottlenecks when mapping applications to the cloud
56.	(CS3082)		CO1: Explain the principles and basic
			concepts of Soft Computing techniques
			CO2: Identify the logic of fuzzy rule-set and
			its reasoning
			CO3: Classify the need for supervised —
		Program Elective-III	unsupervised neural models and its
		Soft Computing	application
			CO4: Analyze the Evolutionary techniques
			with traditional techniques
			CO5: Apply the hybrid learning techniques
			for providing computationally intelligence
57.	( (22202)		solutions CO1: Imparting the architectural concepts of
51.	( CS3302)	Program Elective-III Soft Computing Lab	traditional algorithms for NP problems

	<del>,                                      </del>		
			CO2: Introducing membership concepts
			required for logical programs
			CO3: Analyzing neural network libraries for
			model formations
			model formations
			CO4: Applying Fuzzy Control Design for real
			world scenarios
			CO5: Experimenting genetic/evolutionary
			operators for various NP problems
			•
58.	( CS3102)		CO1: Evaluate and describe the fundamental
			theories and requirements that influence the
			design of modern database systems.
			CO2: Describe and compare client-server,
		Program Elective-III	distributed & parallel database.
		Advanced Database	CO3: Make use of object relational database
		System	and xml for different application in database.
			CO4: Demonstrate handling and
			administration of real time systems.
			CO5: Discuss concept of data warehousing,
			security and different case studies like
			PostgreSQL etc.
59.	( CS3322)		CO1; Implement various partitioning
			techniques in parallel database environment
		Program Elective-II Advanced Database	CO2: Implement various operations of
			database using parallelism approach
			CO3: Implement inheritance concept in
		System Lab	parallel database
			CO4: Implement the query for complex
			database
			CO5: Implement object-oriented database
60.	( CS3122)		CO1: Comprehend basics of object oriented
			modelling and compare the need of object-
			oriented modelling with traditional methods.
			CO2: Propose software system using
			requirements/feature lists, use cases, and
			simple structural of UML models.
			CO3: Demonstrate knowledge of functional
			and behavioural modelling techniques.
		Program Elective-III	CO4: Design a software system based on
		Object Oriented	advanced static/dynamic UML models.
		Modelling and Design	CO5: Analyze the application domain and
			requirements of the problem. Develop the
			skills to determine which processes and
			OOAD techniques should be applied to a
			given project.
			CO6: Able to work in teams to perform the
			above techniques as well as the ability to
			translate UML models into code using an OO
			programming language.
61.	( CS3342)		CO1: Comprehend basics of object-oriented
		Program Elective-III	modeling and compare the need of object-
			oriented modeling with traditional methods
			offened modeling with traditional methods

		Object Oriented Modelling and Design Lab	CO2: Propose software system using requirements/feature lists, use cases, and simple of structural UML models  CO3: Demonstrate knowledge of functional and behavioural modelling techniques  CO4: Design a software system based on advanced static/dynamic UML models  CO5: Develop the skills to determine which processes and OOAD techniques should be applied to a given project  CO6: Able to work in teams to perform the above techniques as well as the ability to translate UML models into code using an OO programming language
62.	( CS3142)		CO1: Explore LAN design.  CO2: Describe the functions of spanning tree
		Program Elective-III Technology Trends	protocols.
			CO3: Explore the functionality of network
			layer
			CO4: Synthesize the functionality of Ether
			Channel, HSRP and Dynamic Routing
			CO5: To learn Internet of Things Technology
			CO6: Contrast the concept of software defined
- 62	( (((((((((((((((((((((((((((((((((((((		networking
63.	( CS3362)		CO1: Explore LAN design
			CO2: Understand the functions of spanning
			tree protocols
			CO3: Understand the functionality of network
		Program Elective-III Technology Trends	layer
		Lab	CO4: Understand the functionality of Ether
			Channel, HSRP and Dynamic Routing
			CO5: To learn Internet of Things Technology
			CO6: Understand Software Defined
64.	(C\$2162)		Networking CO1: Analyze different methods of Data
04.	( CS3162)		Encryption and Decryption; their advantages
		Information Security	& limitations.  CO2: Use different key distribution methods for distribution of Public/Private & Secret keys

			CO3: Apply message authentications techniques for implementing security during message communication CO4: Create and use digital signatures CO5: Discuss different security attacks & security solutions for e-mail & web
65.	(SH3	602)	applications  CO1: Apply biological engineering principles,
			procedures needed to solve real-world problems
			CO2: Demonstrate the functions of biological systems
		Dieless for Engi	CO3: Analyze biological phenomena with
		Biology for Engi	math and physics to gain important insights
			CO4; Explain working of different biomedical instruments
			CO5: Select the sensors for given biological
			applications
			CO6: Explain relevant aspect of movement
			control process
66.	(CS3	182)	CO1: Apply knowledge of computer science
			for real world problem.
			CO2: Possess Professional, Practical and
			reflective practitioner skills.
			CO3: Upgrade and apply the knowledge
			through continuous learning.
		Capstone Project	CO4: Effectively apply Design Thinking
		Phase-I	Processes and Template to structure learning
			lifecycle in the development of a prototype.
			CO5: To develop project management and
			time management skills
			CO6: To formulate a process whereby to keep
			the end-user or customer in mind throughout
		200)	the project lifecycle.
67.	(CS3	202)	CO1: Explain the most important features of .NET Framework technology
		.Net Programmir	CO2:Developing Console and Windows
			application by using C# language

	1	1		CO2 I 1 + COD + 1"1 1 +
				CO3:Implement OOP concepts like data
				encapsulation, data hiding, inheritance and polymorphism using C# language
				CO4:Analyze and implement advanced
				features of C# language like multithreading,
				exceptions and delegates
				CO5:Developing projects in C# that include
				control structure, looping, file handling event
				handling, ADO.NET, multithreading etc
68.		(SH3042)		CO1: Develop a thorough conceptual
				understanding and develop a logical approach
				towards solving Aptitude and Reasoning
				Problems
				CO2: Understand usage of aptitude terms of
				speed, time and distance and permutations,
			Aptitude Training- II	probabilities and applications.
			Aputude Training- II	CO3: Understand blood relations and ways of
				seating arrangements along with various
				geometrical figures
				CO4: Apply various short cuts & techniques
				to manage speed and accuracy to get equipped
				for various competitive and campus
				recruitment exams
69.		( CS3382)		CO1: Choose proper techniques to find
				solution for engineering problems
			Comprehensive Exam	CO2: Solve various types of problems
			- IV	CO3: Develop ability to face competitive
				examinations
				CO4: Inspect the problem & conclude with
				proper solution
70.		( CS4012)		CO1: Identify and describe the characteristics
	VII			of machine learning that make it useful to the real-world problems.
				CO2: Apply clustering and bayesian decision
			Machine Learning	theory to classify given data.
				CO3: Sketch decision tree using various
				decision tree building algorithms.
				CO4: Describe inference and learning
				algorithms for the hidden Markov model.
	]	<u> </u>		

			CO5: Explain different reinforcement learning algorithms.
71.	(CS4032)		CO1: Analyze the aspect of mining data over the statistical techniques for selected applications CO2: Justify the usage of various classification/clustering algorithms
		Program Elective-IV Data Mining	CO3: Apply knowledge to build association based rules technique for real world case studies
			CO4: Explore data warehousing and OLAP concepts
			CO5: Experiment the advancement in mining techniques for wide variety of areas
72.	(CS4292)		CO1: Analyze the aspect of Weka tool over the statistical techniques
		Program Elective-IV Data Mining Lab	CO2: Demonstrate various classification/clustering algorithms on huge data sets
			CO3: Implement association based rules mining approaches on real world case studies
			CO4: Instrument data warehousing and OLAP concepts on complex data objects
			CO5: Experiment the advancement in mining techniques for wide variety of areas
73.	(CS4052)		CO1: Demonstrate various terms and technologies used in testing domain.
			CO2: Apply the software testing techniques in commercial environments.
		Program Elective-IV Software Testing & Quality Assurance	CO3: Design different test plan and test cases for software quality improvement.
		Quanty Assurance	CO4: Choose suitable open source testing & automation tools.
			CO5: Use various types of software tests and quality control standards
74.	(CS4312)		CO1: Describe the fundamental concepts of software testing and quality assurance.
		Program Elective-IV Software Testing &	CO2: Create and implement an effective software testing strategy.
		Quality Assurance Lab	CO3: Implement various lest processes and continuous quality improvement.

			CO4: Apply application of software testing techniques in commercial environments.
75.	(CS4072)		CO1: Differentiate between Wired Networks and Wireless Networks.
			CO2: Identify challenges in designing wireless networks and discuss possible solutions to overcome these challenges.
		Program Elective-IV Wireless Networks	CO3: Review architectures of various wireless technologies like 3G,4G, WiFi etc.
			CO4: List issues in working of Wireless adhoc networks and discuss techniques to address these issues.
			CO5: Demonstrate working of different networking applications.
76.	(CS4332)		CO1: Comment on difference between wireless and wired networks and possible challenges in the design of wireless networks.
		Program Elective-IV Wireless Networks Lab	CO2: Identify design issues in various wireless technologies and discuss possible solutions for them.
			CO3:Review architectures of various access technologies such as 3G, 4G, WiFi etc.
			CO4: List challenges and possible solutions in various layers for Ad hoc networks
			CO5; Demonstrate working of different types of wireless network applications.
77.	( CS4092)		CO1: Apply Artificial Intelligence techniques for problem solving
			CO2: Comprehend the abstractions and reasoning for Intelligent Agents
		Program Elective – V Artificial Intelligence	CO3: Analyze and design a real-world problem for implementation
			CO4: Develop knowledge of decision making and learning methods
			CO5: Select appropriately from a range of techniques when implementing intelligent systems
78.	( CS4352)		CO1: Apply Artificial Intelligence techniques for problem solving
		Program Elective – V Artificial Intelligence Lab	CO2: Comprehend the abstractions and reasoning for Intelligent Agents
			CO3; Analyze and design a real-world problem for implementation

			CO4: Develop knowledge of decision making
			and learning methods
			CO5: Select appropriately from a range of techniques when implementing intelligent systems
79.	( CS4372)		CO1: Identify requirements and apply process model to selected case study.
		Program Elective – V Software Engineering	CO2: Analyze and design models for the selected case study using UML modeling.
			CO3: Use various software engineering tools.
80.	Lab ( \$4372)		CO1: Identify requirements and apply process model to selected case study.
		Program Elective – V Software Engineering	CO2; Analyze and design models for the selected case study using UML modeling.
			CO3: Use various software engineering tools.
81.	( CS4132)		Co1; A recapitulation of software engineering process models.
			Co2: A recapitulation of the basic techniques for requirements engineering and design.
		Program Elective – V Advanced Software Engineering	Co3; Project management, Maintenance and re-engineering.
		Software Engineering	CO4: Process and project metrics.
			CO5: Estimation for software projects and Project scheduling.
82.	( CS4392)		CO1: A recapitulation of software engineering process models.
			CO2: A recapitulation of the basic techniques for requirements engineering and design.
		Program Elective – V Advanced Software Engineering Lab	CO3: Project management, Maintenance and re-engineering.
			CO4: Process and project metrics.
			CO5: Estimation for software projects and Project scheduling.
83.	(CS4152)		CO1: Identify the various components of IoT.
			CO2: Design a middleware for IoT.
		Program Elective – V Internet of Things	CO3: Identify the issues to address the security, intelligence in IoT.
			CO4: Describe various protocols used in IoT.

			CO5: Establish the communication between
			IoT devices and cloud server using wireless technology.
			CO6: Develop IoT application to solve real world problems.
84.	(CS4412)		CO1: Identify the components of IoT
			CO2; Design a middleware for IoT
		Program Elective – V Internet of Things Lab	CO3: Develop IoT application to solve social problems
		Internet of Things Lab	CO4: Analyze various protocols for IoT
			CO5: Establish the communication to the cloud through Wi-Fi / Bluetooth
85.	( CS4172)		CO1: Acquire knowledge of the fundamental mathematical models and algorithms in the field of NLP.
		Program Elective – VI Natural Language Processing	CO2: Apply these mathematical models and algorithms in applications in software design and implementation for NLP.
			CO3: Apply deep learning models to solve machine translation and conversation problems.
			CO4: Apply deep structured semantic models on information retrieval and natural language applications.
			CO5: Acquire knowledge of the design and implementation issues in various NLP applications such as information extraction and Machine translation.
86.	( CS4192)		CO1: Identify big data for business
			intelligence
			CO2: Explore the fundamental concepts of big
			data and its analytics
		Program Elective – VI Big Data Analytics	CO3: Analyze the big data using Hadoop and
			intelligent techniques
			CO4: Apply NoSQL big data management
			underlying analytics framework
			CO5: Recognize the suitable secure models
87.	( CS4212)	Program Elective – VI	for building competitive business decisions
	( /	r rogram Elective – VI	CO1: To describe concepts of requirement

88.	(CS4232)	Principles and Practices for IT Management	analysis, risk, budgeting a project, creating a work breakdown structure.  CO2: Apply critical path method for project tracking and progress project.  CO3: To demonstrate resource allocation and scheduling concepts.  CO4: To apply strategies, policies and strategic management in project development.  CO5: To classify Intellectual Property Rights and related laws.  CO6: To develop IT application for marketing, health care, insurance, banking, agriculture and service sector.
88.	( CS4232)	Program Elective – VI Computer Graphics & Virtual Reality	CO1: Apply the mathematical techniques for representing points, lines, curves and surface in graphics  CO2: Design algorithms to draw lines, circle, polygons, etc  CO3: Demonstrate the knowledge of projections  CO4: Learn the basics of OpenGL and emerging technologies using openGL and GLUT libraries  CO5: Design a virtual environment  CO6: List and describe graphic devices used in virtual reality system
89.	(CS4252)	Finance & Accounting	CO1: Explain the Indian financial system with its components.  CO2: Evaluate financial and management accounting.  CO3: Develop the ability in participants" to use financial statements to assess a company's performance.  CO4: Estimate the software cost using various models.
90.	(CS4272)	Machine Learning Lab	CO1: Explore dataset and it associated

	T	Γ	1	T
				characteristics using python libraries.
				CO2: Implement various supervised learning
				algorithms on given dataset.
				CO3: Propose solution for real world problem
				by implementing ML algorithms.
				CO4: Find the hidden patterns from given
				dataset by applying unsupervised learning
				algorithms.
91.		( CS4432)		CO1: Apply knowledge of computer science
				for real world problem.
				CO2: Possess Professional, Practical and
				reflective practitioner skills.
				CO3: Upgrade and apply the knowledge
				through continuous learning.
			Capstone Project Phase – II	CO4: Effectively apply Design Thinking
				Processes and Template to structure learning
				lifecycle in the development of a prototype.
				CO5; To develop project management and
				time management skills
				CO6: To formulate a process whereby to keep
				the end-user or customer in mind throughout
				the project lifecycle.
92.	VIII	( IP4022)		CO1: Examine the functioning of the
			company on the terms of inputs,	
				transformation process and the outputs
				(products and services)
				CO2: Develop an attitude to adjust with the
			company culture, work norms, code of	
			Track I Industry Internship and	conduct.
			Project	CO3: Recognize and follow the safety norms,
				Code of conduct.
			CO4: Demonstrate the ability to observe,	
				analyse and document the details as per the
				industry practices.
				J P
				CO5: Interpret the processes, systems and

			concepts- studies.
			CO6: Improve the leadership abilities,
			communication.
			CO7:Demonstrate project management and
			finance sense
93.	(OE438) (IP4022)		CO1: Examine the functioning of the company on the terms of inputs, transformation process and the outputs (products and services)
		Track I Finance for Engineers	CO2: Develop an attitude to adjust with the company culture, work norms, code of conduct.
		Timunee for Engineers	CO3: Recognize and follow the safety norms, Code of conduct.
			CO4: Demonstrate the ability to observe, analyse and document the details as per the industry practices.
94.	(OE436)		CO1: Develop administrative, organizational and planning skills to execute engineering project.
		Track I Engineering Management &	CO2: Develop bar chart/mile stone chart for the project.
		Economics ( Online Course)	CO3: Analyze profit/cost data and carry out economic analysis to take optimal decision.
			CO4: Calculate depreciation as per various methods.
95.	(URE)		CO1: Investigate the technical literature.
	(RE4042)		CO2: Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature.
			CO3: Design a research problem and
			develop a methodology.  CO4: Develop and implement an advanced
		Track- II Undergraduate	original research or creative project.
		Research Experience	CO5: Develop the ability to explain the conceptual viability of the project and describe
			the major components involved.
			CO6: Develop the ability to explain how the project will impact the relevant body of work.
			CO7: Develop advanced discipline-relevant skills and competencies.

			CO8: Construct an accurate record of research performed.  CO9: Write a research report and paper.
96.	(ED4082)	Track -III Entrepreneurship Development	CO1: Apply knowledge of engineering, economics, marketing and finance for preparation of project report.
			CO2: Make commercial, technical and financial appraisal of project.

Department Name: Computer Science and Engineering PG Program Name: Computer Science and Engineering Vision and Mission:-

## Vision:

To excel in the computer science engineering discipline through continuous research, innovation and industry-oriented curriculum leading to responsible IT professionals

## Mission:

- To inculcate teaching and learning process promoting state-of-the-art IT industry practices in computer science engineering and technology to address global challenges.
- To integrate academics, research and entrepreneurship skills to address present and future challenges of the society and industry.
- To develop professionalism with strong foundations adapting to changing technology.

Sr. No.	Program Outcomes
1.	Independently carry out research and development work to solve practical problems
	related to the Computer Science and Engineering domain
2.	Write and present a substantial technical report/document
3.	Demonstrate a degree of mastery over the area as per the CSE specialization of the
	program. The mastery should be at a level higher than the requirements in the appropriate
	bachelor program
4.	Apply knowledge of database management systems, data mining and analytics techniques
	to solve real world problems
5.	Apply knowledge of machine learning and intelligence to identify, formulate and solve
	complex engineering problems
6.	Design, develop and deploy software using emerging IT technologies like open source
	tools, mobile application development platforms, web technologies and cloud computing

Sr. No.	Semester	Course	Course Name	Course Outcome
		Code		
1.	I	SHP5153	Linear Algebra	Co: 1 Use relevant probability distribution to solve the
			and Probability	engineering problems.
			Distributions	Co: 2 Compute the rank of a matrix and solve the system of
				linear equations.
				Co: 3 Examine for dependency and determine the dimensions
				of vector space.
				Co: 4 Use different mathematical techniques to model and
				solve the problem
2.	I	CSE1014	Machine	Co: 1 Set necessary mathematical background to understand
			Learning	Machine Learning concepts.

	1	1	T	T =
				Co: 2Recognize and appreciate need of Machine Learning in
				various applications.
				Co: 3Apply Classification and Regression techniques for
				decision making.
				Co: 4Use probabilistic graphical models to represent given
				problems.
				-
				Co: 5Apply sequential data processing algorithms to solve
				problems
3.	I	CSE1024	Advanced Algorithm	Co: 1 Select appropriate algorithm design techniques such as greedy method, dynamic programming, backtracking and heuristic algorithms.
				Co: 2 Apply backtracking algorithm to solve real world problems.
				Co: 3 Explore different NP problems and approximation algorithmic solutions.
				Co: 4 Apply and design parallel algorithms to solve fundamental problems.
				Co: 5 Apply and compare performance of local search techniques algorithms for solving fundamental combinatorial problems.
				Co: 6 Compare and design global search techniques for solving engineering/real-world combinatorial problems.
				Co: 7 Identify the new trends and research directions in algorithms
4.	I	CSE1034	Program	CO 1 Analyze big data for business intelligence
			Elective-I (Big	CO 2 Learn business case studies for big data analytics
			Data)	CO 3 Implement map-reduce analytics using hadoop related
				tools
				CO 4 Apply NoSQL big data management
				CO 5 Manage big data with aspects of Privacy and ethic
5.	I	CSE1044	Program	CO1. Compare cloud computing with other computing
			Elective-I	technologies.
			(Cloud	CO2. Illustrate the virtualization technologies and its role in
			Computing)	enabling the cloud computing system model.
				CO3. Identify and compare different cloud service and
				deployment models for scientific, business and consumer
				applications.
				CO4. Describe Aneka platform as a service to design different
				applications.  CO5. Compare different cloud services with pros and cons
				from multiple cloud providers.
				CO6. Describe recent advances in cloud framework/services
				for solving scientific and business applications.
6.	Ι	CSE1054	Program	CO1. Demonstrate the configuration of software services on
0.	•	CDE1034	Elective-I	servers.
			(Open Source	
			Technologies)	CO2. Exercise the FOSS tools for the software development.
				CO3. Contribute to existing FOSS in FOSS environment
7.	I	CSE1064	Program	CO1. Acquire knowledge of the fundamental mathematical
'.		222001	Elective-II	models and algorithms in the field of NLP.
			(Natural	CO2. Apply these mathematical models and algorithms in
			Language	applications in software design and implementation for NLP.
			Processing)	CO3. Apply deep learning models to solve machine translation
			<i>3</i> ′	and conversation problems.
				CO4. Apply deep structured semantic models on information
				retrieval and natural language applications.
			-	

		1	1	005 4 1 1 1 01 1 1 1 1 1
				CO5. Acquire knowledge of the design and implementation
				issues in various NLP applications such as information
	_		_	extraction and Machine translation.
8.	I	CSE107	Program	CO1. To implement fundamental image processing techniques
			Elective –II	required for computer vision
			(Computer	CO2. Understand Image formation process
			Vision)	CO3. To perform shape analysis
			,	CO4. Extract features form Images and do analysis of Images
				CO5. Generate 3D model from images
9.	I	CSE1084	Program	CO1. Discuss the design and research issues in wireless
			Elective-II	networks
			(Advanced	CO2. Demonstrate the working of 802.11 a/g/n wireless
			Networks)	standard
			Networks)	CO3. Apply the different types of routing protocols in ad-hoc
				networks.
				CO4. Analyze different protocols in MAC, Routing and
				TransCOrt Control for Sensor Networks
10.	I	CSE1094	Research	CO1.Formulate a research problem.
			Methodology	CO2. Analyze research related information.
				CO3.Prepare and present research proCOsal / paper by
				following research ethics.
				CO4.Make effective use of computers and computing tools to
				search information, analyze information and prepare reCOrt.
				CO5.Describe nature and processes involved in development
				of intellectual property rights.
11.	I		Machine	CO1. Set necessary mathematical background to understand
11.	1	CSE1104		
		CSEII04	Learning	Machine Learning concepts.
			Laboratory	CO2. Recognize and appreciate need of Machine Learning in
				various applications.
				CO3. Apply Classification and Regression techniques for
				decision making.
				CO4. Use probabilistic graphical models to represent given
				problems.
				CO5. Apply sequential data processing algorithms to solve
	_			problems.
12.	I	CSE1114	Advanced	CO1. Select appropriate algorithm design techniques such as
			Algorithm	greedy method, dynamic programming, backtracking and
			Laboratory	heuristic algorithms.
				CO2. Apply backtracking algorithm to solve real world
				problems.
				CO3. Explore different NP problems and approximation
				algorithmic solutions.
				CO4. Apply and design parallel algorithms to solve
				fundamental problems.
				CO5. Apply and compare performance of local search
				techniques algorithms for solving fundamental combinatorial
				problems.
				CO6. Compare and design global search techniques for solving
				engineering/real-world combinatorial problems.
				CO7. Identify the new trends and research directions in
				algorithms.
13.	I	CSE1124	Program	CO1. Identify and investigate the distributed underlying
			Elective-I	experimental bed of Hadoop
			Laboratory	CO2. Compare the attributes of different Hadoop versions and
			(Big Data	their artifacts
			Laboratory)	CO3. Determine the usage of Map-reduce paradigm for
			• •	parallel execution
				CO4. Recognize the NoSQL prototype to build the big data
				Imanagement
			L	

	1			CO5. Apply the skills to construct NoSQL designs and its
				manipulation
14.	I	CSE1134	Program	CO1. Configure various virtualization tools such as Virtual
			Elective-I	Box, VMware workstation.
			Laboratory: (Cloud	CO2. Illustrate the design and development process involved
			Computing	in creating a cloud based application.  CO3. Design and deploy application in a Aneka PaaS
			Laboratory)	environment.
				CO4. Simulate a cloud environment to implement new
				schedulers
15.	I	CSE1144	Program	CO1. Demonstrate the configuration of software services on
			Elective-I	servers.
			Laboratory:	CO2. Exercise the FOSS tools for the software development.
			(Open Source	
			Technology	
1.5	**	00=11=	Laboratory )	CO3. Contribute to existing FOSS in FOSS environment
16.	II	CSE115	Deep Learning	CO1.Compare Machine Learning and Deep Learning
				approaches to solve problems; understand usefulness of each
				one. CO2.To get knowledge about introduction to Deep Learning
				and understand how Deep Learning solves problems which
				Machine Learning cannot.
				CO3.To implement analyse and evaluate Convolutional
				networks, RNNs, LSTM, Adam, DroCOut, BatchNorm,
				vier/He initialization, and more.
				CO4.To apply deep learning concept for different real-time
				applications.
17.	II	CSE1164	Data Analytics	CO1.Explore the fundamental concepts of big data and its
				analytics
				CO2. Analyze the big data using Hadoop and intelligent techniques
				CO3.Investigate big data solutions using Hadoop eco system
				CO4.Identify and formulate various techniques for mining data
				stream
				CO5.Recognize the suitable secure models for building
				competitive business decisions
18.	II	CSE1174	Program	CO1.Gain technical competencies in web application
			Elective-III:	development and maintenance.
			(Web	CO2.Implement interactive web pages and apply validation
			Application	checks using client side programming languages like HTML,
			Development)	CSS, Java Script and AngularJS. CO3.Process the business data and generate resCOnses
				dynamically using PHP.
				CO4.Design and develop web services.
				CO5.Use Django Python framework to design interactive web
				applications
19.	II	CSE1184	Program	CO1.Explain how massive parallelisms are implemented in
			Elective –III:	accelerator architectures.
			( Parallel	CO2.Design and implement parallel algorithms for GPGPU.
			Computing)	CO3.Demonstrate parallel patterns for performance
				improvement.  CO4.Analyze the parallel programming and computational
				thinking strategies.
				CO5.Compare different Parallel algorithms from various
				application domains for performance analysis.
				1
· · · · · · · · · · · · · · · · · · ·				

_	1	T	T	
20.	II	CSE1194	Program	CO1. Identify the comCOnents of IoT
			Elective-III:	CO2. Design a middleware for IoT
			(Internet of	CO3. Develop IoT application to solve social problems
			Things)	CO4. Analyze various protocols for IoT
			Timigs)	CO5. Establish the communication to the cloud through Wi-Fi
				/ Bluetooth
21.	II	CSE1204	Program	CO1.Illustrate the concepts of optimization and its
			Elective-	terminologies.
			IV:(Optimizatio	CO2.Apply and compare the biology-based algorithms.
			n Techniques)	CO3.Explore different physics-based algorithms for
				optimization problems.
				CO4.Design efficient parallel and hybrid algorithms for
				complex problem solving.
				CO5.Formulate multi-objective optimization problems and
				categories the multi-objective optimization algorithms.
				CO6.Analyze performance of different algorithms for single
				and multi-objective mathematical and real-world optimization
				problems
22.	II	CSE1214	Program	CO1. Understand OSI security architecture and classic
			Elective-IV:(	encryption techniques
			Cryptology and	CO2. Acquire fundamental knowledge on the concepts of
			Network	finite fields and number theory
			Forensics)	CO3. Understand various block cipher and stream cipher
			_ = ===================================	models
				CO4. Describe the principles of public key cryptosystems,
				hash functions and digital signature
				CO5. Understand and the principles of network forensics and
				investigate network frauds
23.	II	CSE1224	Program	CO1.Recognize major software architectural styles, design
23.	11	CSE1224	Elective-IV:	patterns, and frameworks
			(Software	CO2.Describe a software architecture using various
			Architecture)	documentation approaches and architectural description
			111 011100 00011 0)	languages
				CO3.Design and develop software architecture for large scale
				software systems
				CO4.Formulate architectural alternatives for a problem and
				select among them
				CO5.Apply well-understood paradigms for designing new
				systems
24.	II	CSE123	Deep Learning	CO1. To get knowledge about introduction to Deep Learning
			Laboratory	and understand how Deep Learning solves problems which
				Machine Learning cannot.
				CO2 .To acquire knowledge about advanced Machine
				Learning concept and relevant topics of Linear Algebra and
				Statistics.
				CO3.To implement analyze and evaluate Convolutional
				networks, RNNs, LSTM, Adam, DroCOut, BatchNorm,
				Xavier/He initialization, and more.
				CO4.To apply deep learning concept for different real-time
25	11	CCE1044	Da4a A1 41	applications.
25.	II	CSE1244	Data Analytics	CO1.Imparting the architectural concepts of Hadoop and
			Laboratory	introducing map reduce paradigm
				CO2.Introducing Java concepts required for developing map
				reduce programs
	l			CO3.Derive business benefit from unstructured data

Γ	1	1	T	T
				CO4.Experimenting programming tools PIG & HIVE in
				Hadoop echo system
				CO5.Developing Big Data applications for streaming data using Apache Spark
26.	II	CSE1254	Program	CO1.Gain technical competencies in web application
			Elective-III	development and maintenance.
			Laboratory: (	CO2.Implement interactive web pages and apply validation
				checks using client-side programming languages like HTML,
			Web	CSS, Java Script and AngularJS.
			Application	CO3.Process the business data and generate resCOnses
			Development	dynamically using PHP.
			Laboratory)	CO4.Design and develop web services.
				CO5.Use Django Python framework to design interactive web
				applications.
27.	II	CSE1264	Program	CO1.Design different parallel algorithms suitable for multi-
			Elective -III	core and many-core systems.
			Laboratory:- (	CO2.Implement different parallel algorithms on multi-core and
			Parallel	many-core systems.
			Computing	CO3.Solve compute intensive problems/develop applications
			Laboratory)	using accelerators.
				CO4.Perform the analysis with different performance metrics.
28.	II	CSE1274	Program	CO1.Identify the comCOnents of IoT
			elective-III	CO2.Design a middleware for IoT
			Laboratory:	CO3.Develop IoT application to solve social problems
			(Internet of	CO4.Analyze various protocols for IoT
			Things	
			Laboratory)	CO5.Establish the communication to the cloud through Wi-Fi /
29.	II	CSE1284	Mini Project	Bluetooth CO1. Identify and formulate research problem.
29.	11	CSE1204	Willia Froject	CO2.Identify and implement suitable techniques for research
				problems.
				CO3. Analyze the results with appropriate tools and techniques
				available.
				CO4.Present the finding of experimental details and result.
30.	II	SHP551	Technical	CO1.Acquire skills required for good oral and written
			Communicatio	communication.
			n	CO2.Demonstrate improved writing skills and level of
				readability.
				CO3.Ensure the good quality of technical reCOrts at very first-
				time submission
31.	III	CSE2014	Industry	CO1.Acquire sufficient knowledge in respective Industry /
			Internship	advanced IT Technology.
			_	CO2.Identify problems in the process in industry and provide
				solution to the same / Implement small demonstrative module
	ļ	1		using learning got through the professional certification.
32.	III	MOE2010	Artificial	CO1.Describe central machine learning methods and
			Intelligence -	techniques and how they relate to artificial intelligence
			Machine	CO2.Differentiate between supervised and unsupervised
			Learning	learning techniques
				CO3.Apply the ML algorithms to a real-world problem,
				CO4.Optimize the models learned and reCOrt on the expected
				accuracy that can be achieved by applying the models.
				CO5.Evaluate a given problem and apply appropriate machine
22	TIT	MOESSOS	G 4	learning technique
33.	III	MOE2020	Creative	CO1.Comprehend imCOrtance in tackling global challenges
			Thinking: Tools	as well as in everyday problem-solving scenarios
			& Techniques	CO2.Apply different brainstorming techniques in group
				activities

-				
				CO3.Be proficient in the application of the 6 thinking hats tool
				in different life scenarios
				CO4.Develop a systematic approach to idea generation through
				the use of morphological analysis
				CO5.Innovate on an existing product, service or situation
				applying the SCAMPER method
				CO6.Get confident with the theory of inventive problem
				solving, called TRIZ
				CO7.Select and apply the appropriate technique based on the
				opCOrtunity to seize or the problem to tackle
34.	III	MOE2030	MOOC Course	CO1.Identify the real application and practices of the courses
		1.1022000	NIO O C COUISC	studied, at the industry level.
				CO2.Recognize various modeling ,analysis and validation
				techniques adopted at industries.
				CO3.Demonstrate the issue at design, manufacturing and
				assembly level.
				CO4.Summarize and persent technical data in reCOrt format.
35.	III	MOE2040	Condition	CO1.Identify the maintenance scheme, their scope and
33.	111	WIOL2040		limitations – apply the maintenance strategies to various
			Monitoring and	problems in the industrial sectors.
			Signal	CO2. Analyze for machinery condition monitoring and explain
			Processing	how this compliments monitoring the condition.
				CO3.Develop an appreciation for the need of modern
				technological approach for plant maintenance to reduce the
				maintenance expenditure.  CO4.Emphasizes on case studies that require gathering
				information using the modern testing equipment and
				processing it to identify the malfunction in that system.
2.5	TIT	MOEGOSO	4 • 64	CO5.Identify vibration measurement, lubrication oil analysis.
26				
36.	III	MOE2050	Aircraft	CO1. Understand the design process of aircraft and decide the
36.		MOE2050	Conceptual	aircraft configuration.
36.	III	MOE2050		aircraft configuration. CO2. Choose type of COwer plant as per flight regime.
36.		MOE2050	Conceptual	aircraft configuration.  CO2. Choose type of COwer plant as per flight regime.  CO3. Decide the fuselage layout as per type of aircraft.
36.	III	MOE2050	Conceptual	aircraft configuration.  CO2. Choose type of COwer plant as per flight regime.  CO3. Decide the fuselage layout as per type of aircraft.  CO4. Design the wing for type of aircraft and its wing loading.
36.	III	MOE2050	Conceptual	aircraft configuration.  CO2. Choose type of COwer plant as per flight regime.  CO3. Decide the fuselage layout as per type of aircraft.  CO4. Design the wing for type of aircraft and its wing loading.  CO5. Accurately evaluate lift, drag and mass for design
36.	111	MOE2050	Conceptual	aircraft configuration.  CO2. Choose type of COwer plant as per flight regime.  CO3. Decide the fuselage layout as per type of aircraft.  CO4. CO5.Write synopsis using standard format with technical aspects and language  CO1.Design and develop bench-marking system which complies expectations and technical specifications mentioned in the Synopsis.  CO2.Perform experimental observation and analysis of the bench-marking system.  CO3.Identify gap and proCOse COssible improvements in the implemented bench-marking system.  CO4.Submit an research article to reputed international
37.	III	CSE2034  Course Code:	Conceptual Design  Dissertation Phase –I  Course Name: Dissertation	aircraft configuration.  CO2. Choose type of COwer plant as per flight regime.  CO3. Decide the fuselage layout as per type of aircraft.  CO4. Design the wing for type of aircraft and its wing loading.  CO5. Accurately evaluate lift, drag and mass for design synthesis process.  CO6. Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design CO1. Identify domain, sub-domain and problem statement for the Study.  CO2.Perform a literature survey and identify COssible gaps in the existing work in context with identified problem statement.  CO3.Formulate the problem statement and its objectives of project.  CO4.Selection of suitable methodology, techniques and dataset for the research work.  CO5.Write synopsis using standard format with technical aspects and language  CO1.Design and develop bench-marking system which complies expectations and technical specifications mentioned in the Synopsis.  CO2.Perform experimental observation and analysis of the bench-marking system.  CO3.Identify gap and proCOse COssible improvements in the implemented bench-marking system.

				CO5.Prepare a comprehensive, technically and grammatically correct Dissertation Phase 2 reCOrt describing the work done.
39.	IV	Course	Course Name:	CO1.Identify research gap or opCOrtunities for novel work in
		Code:	Dissertation	selected problem statement or domain.
		CSE2054	Phase –III	CO2.Define the problem based on identified research gap.
				CO3.Develop algorithm/ methodology to address the identified
				research gap/ provide solution to the selected problem.
				CO4.Write pseudo code/develop flow-chart/ develop working
				flow of proCOsed system.
				CO5.Implement the proCOsed approach using required tools.
40.	IV	Course	Course Name:	CO1.Develop / simulate / implement the proCOsed system by
		Code:	Dissertation	complying with desired technical specifications.
		CSE2064	Phase -IV Viva-	CO2.Compare working and experimental results of the
			Voce	proCOsed system with the existing system.
				CO3. Analyze and synthesize obtained results in theoretical and
				practical context.
				CO4.Present findings in logical order and write Dissertation
				ReCOrt on basis of work done, results and observations,
				findings, and contributions.
				CO5.Submit an research article to reputed international
				conference which should be based on work done.

- Department Name :-\_Electrical Engineering
- UG Program Name :- B. Tech Electrical Engineering
- **Vision of the Department**: Develop globally competent electrical engineers to serve future needs and challenges of the society

## **Mission of the Department**:

- 1. To inculcate teaching and learning processes to promote state-of-the-art service in electrical industries to address local and global challenges.
- 2. To integrate academics, research, and entrepreneurship skills in the domain of electrical engineering to address the present and future challenges of society.
- 3. To develop professionalism with strong foundations in adapting to changing technology to cater to environmental needs

Sr. No.	Program Outcomes
1.	<b>Engineering knowledge:</b> Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems
2.	<b>Problem analysis:</b> Identity, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences
3.	<b>Design/development of solutions:</b> Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and the cultural, societal, and environmental considerations
4.	<b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions
5.	<b>Modern tool usage:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations
6.	<b>The engineer and society:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7.	<b>Environment and sustainability:</b> Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development
8.	<b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice
9.	<b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings
10.	<b>Communication:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11.	<b>Project management and finance:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12.	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Sr.	Program Specific Outcomes				
No.					
1.	Apply knowledge of circuits, machines, power electronics, power systems for the industrial				
	automation and control applications				
2.	Operate and control wind power, solar power and electric vehicle systems				

Sr. No.	Semester	Course Code	Course Name	Course Outcome
			DC Machines &	Co:1 Explain the working principle and operation of single phase and three phse transformer.
1.	Ш	EE2031		Co:2 Identify various industrial application for single phase and three phase transformer.
1.	***	222031	Transformer	Co3: Describe behavior of dc machines.
				Co4: Interpret characteristics of dc machines.
				Co5: Identify the importance of testing and control of dc machines with suitable industrial applications.
2.	III	EE2051	Electrical Circuit Analysis	Co1: Apply knowledge of mathematics, science, and engineering to the analysis and design of electrical circuits  Co2: Identify, formulate, and solve engineering problems in the area circuits and systems  Co3: Coordinate various components and process of electrical system to meet desired needs within realistic constraints  Co4: Explain importance of various network topology methods for computer analysis of large networks  Co5: Implement network reduction techniques to solve power system networks  Co6: Construct and organize various filter for specific circuits

				Co1: Explain the fundamentals of solid state electronics including diode, BJT, JFET & MOSFET.
3.	III	EE2071	Analog Electronics	Co2: Apply DC & AC (small signal) analysis to solid state electronic circuits.
			<u> </u>	Co3: Design solid state electronic circuits.
				Co4: Analyze operational amplifier application circuits.
				Co5: Classify power amplifier circuits.

Г				Co1: Distinguish conventional and non-
				conventional energy sources
				Co2: Identify variable load on power
				*
				stations and factors associated for per unit cost of energy generation.
4	III	EE2001	Power System	Co3: Choose various factors for cost of
4.	III	EE2091	Economics	
				energy in terms different tariff.
				Co4: Determine different methods of
				power factor improvement
				Co5: Compare different supply systems
				used in power system
				Co1: Perform various experiments on
				DC machines
				Co2: Perform various experiments on
				Transformer.
			DC Machines &	Co3: Find out the characteristics of
5.	III	EE2511	Transformers Lab	various machines along with their
			Transformers Eab	efficiencies
				Co4: Analyze various parameters and
				predict the durability of the machines
				Co5: Compare the performances of the
				machines by referring relevant standards
				Co1: Analyze responses of electrical
				circuits in real time
				Co2: Design electrical networks using
				MATLAB/PSPICE etc.
				Co3: Compare responses of real-time
_	***	FF2524	Electrical Circuits &	electrical networks with simulations.
6.	III	EE2531	Simulation Lab	Co4: Explain the importance of the
				virtual environment to analyze electrical
				networks
				Co5: Implement various network
				reduction techniques for power system
				analysis and modeling
				Build and analyze electronic circuits as
				per requirement
				Observe input and output waveform at
				various test points
7			Analog Electronics	Plot the input & output response of
/ / l	III	EE2551	Lab	electronic circuits.
			Lau	Interpret results of experiment and
				compare with theoretical values  Improve the ability to communicate
-				effectively through written lab journals
0				Solve linear differential equations &
8				problems related to application by using various methods
				Determine expansion of functions by
				using Fourier series.
				Solve problems on probability
	***	GYYZOG	Engineering	distribution by using different formula.
	III	SH2091	Mathematics-III	Determine Laplace transform & inverse
			1.12.110.1114.10.0 111	Laplace transform of various functions
				by using properties.
				Laplace transform & apply Laplace
		1	į.	transform to solve linear differential
				transform to solve finear differential
				equations

				transform
9	IV	EE2021	Alternating Current Rotating Electrical Machines	Explain different types, construction, working principle & characteristics of three phase induction motors  Apply the knowledge gained through characteristics of three phase induction motor.  Explain various types, construction, principle of operation, & application of single phase induction motor  Describe construction, working principle along with winding details of synchronous generator.  Analyze performance, characteristics and testing of synchronous machine.
10	IV	EE22041	Power Transmission & Distribution System	Explain structure of power systems  Analyze various transmission line parameters and its mathematical modelling  Discover various design aspects of overhead transmission lines  Explain construction & classification of various underground cables  Classify various types of A.C and D.C. distribution systems
11	IV	EE2101	Signals and Systems(EE2101)	Classify various signals and systems.  Analyze linear time invariant systems using different tools.  Apply time and frequency domain analysis techniques to different signals and systems.  Evaluate discrete time Fourier transform of a set of well-defined signals.  Explain the need of signal processing techniques for various engineering fields.
12	IV	EE2061	Electrical and Electronic Measurements	Demonstrate basic concept of calibration, statistical evaluation of measurement data.  Explain construction & working of various electrical measuring instruments.  Identify and demonstrate both electrical and electronic measuring instruments.  Determine R, L, C parameters using AC and DC bridges.  Explain construction and working of digital instruments
13	IV	EE2081	Digital Electronics	Describe the fundamental concepts and techniques used in digital electronics.  Formulate the logic expressions using Boolean laws & K-map.  Design and verify combinational logic circuits  Design and verify sequential logic circuits.  Perform various experiments on AC rotating machines.

		1		
				Analyze the characteristics of various ac machines along with their efficiencies.
14	IV	EE2521		Analyze various parameters and predict
			A.C. Rotating	the durability of the machine.
			Electrical Machines	Compare the performances of the
			Lab	machines by referring relevant standards.
				Identify proper machine for particular application.
				Study the constructional details of various electrical motors.
				Demonstrate calibration of various
				measuring instruments using statistical
				evaluation of measurement data.
15				Determine power and energy for the
	***	EE2544	Electrical and	given system using various
	IV	EE2541	Electronic	measurement techniques.
			Measurements Lab	Explain construction and working of
				various instruments
				Calculate R, L, C parameters using AC
			and DC bridges	
				Verify the truth table of digital
				electronic components
				Implement desired Boolean functions
16	IV	EE2561	Digital Electronics	using digital electronic components
1 4	EE2501	LAB	Design and verify combinational logic	
				circuits.
				Design and verify sequential logic
				circuits
				Utilize scientific methods to solve
				environmental problems
17			Mini Dunings	Examine technologies for restoration of degraded environment
17	IV	EE2581	Mini Project Environmental Science	Develop presentation and report writing
			Environmental Science	skills
				Develop as an individual and in group
				leadership quality.
				Understand the behavior of
				semiconductor devices operated as
				power switches.
				Explain operation, waveform and
				performance parameters of phase
18				controlled converters, uncontrolled
10				rectifiers.  Analyze and design ac-dc converters
				•
	V	EE3031	Power Electronics	Explain the basic topologies of dc-dc
	V	EE3U31	Fower Electronics	converters analyze and design dc-dc
				converters.
				Explain different modulation techniques
				of pulse width modulated inverters and
				to understand the harmonic reduction
				methods. Analyze and design dc-ac inverters.
				Apply the electronic devices for
				conversion, control and conditioning of
				power.
				Identify the basic elements and
	V	EE3071	Feedback Control	structures and demonstrate an
	•	223371	System	understanding of the fundamentals of
		1	1	or the randullentum of

1				feedback control systems.
19				•
1)				Develop the mathematical models of
				any physical systems such as: state
				space, transfer function
				Determine the response of different
				order systems for various standard
				signals.
				Interpret and analyze time domain
				systems using virtual environment.
				Interpret and analyze frequency domain
				systems using virtual environment.
				Analyze symmetrical faults in power
				systems
				Apply symmetrical components method
20				for fault analysis
			Power System Stability	Interpret the necessity of automatic
	V	EE3051	and Control	generation control and excitation
				control.
				Analyze the optimal operation of power
				system.
				Analyze power system stability.
				Describe the architecture of
				microprocessor and micro-controller.
				Write assembly language programs for
21				8085.
21				Explain a typical input-output interface.
				Identify instruction addressing modes
			Microprocessors and	and syntax for 8051.
			Micro controller	Create an assembly language or C
	V	EE3091	(EE3091)	program for 8051 that performs a
	,	EE3071	(EE30)1)	prescribed task.
				Design and implement a micro-
				controller-based embedded system.
				Define electric and magnetic fields
				according to their force effect.
				Understand the physical meanings of the
				differential equations for electrostatic
				and magneto static fields
				Calculate the electric field from the
				stationary charge distributions and
				magnetic fields from steady current
	V	EE3011	Electromagnetic Field	distributions
22	,		Theory	Describe and use simple models of
				electric and magnetic field interactions
				with materials
				Explain the concept of electromotive
				force, Maxwell's equations and their
				physical meanings
				Analyze energy transportation and wave
				propagation in an electromagnetic field.
				Understand the behavior, turn on & turn
				off schemes of semiconductor devices
				operated as power switches.
	V	EE3511	Power Electronics Lab	Analyze, sketch, examine waveforms,
				and calculate, measure performance
				fortone of automatic for the 1
				factors of output of ac-to-dc converters.
23				Analyze, sketch, examine waveforms, and calculate, measure performance

				factors of output of dc-to-dc converters.
				Analyze, sketch, examine waveforms, and calculate, measure performance factors of output of dc-to-ac inverters.  Simulate, analyze and design power electronic circuits using MATLAB software.
24	V	EE3531	Feedback Control Systems Lab(EE3531)	Solve the mathematical model of different electromechanical systems  Model any given electrical, mechanical system with respect to transfer function and state space domain  Classify appropriate feedback signal, synthesis feedback gains and analyze their results and deduce the first and second order responses.  Draw the root locus and analyze the system  Plot the bode, polar and Nyquist plots and analyze frequency domain
25	V	EE3551	Microprocessors and Micro controller Lab(EE3551)	Create a template program, compile it, and then build the executable file.  Examine the effects of executing many of the 8085 and 8051 instructions by tracing the execution of a program in GNU Simulator and Keil for microprocessor and microcontroller respectively.  Write their own program in assembly language for 8085 and 8051.  Write the steps they go through to perform their tasks  Apply their programming knowledge (assembly and C) for real time applications.
26	V	SH3191	Scholastic Aptitude I	Develop a thorough conceptual understanding and develop a logical approach towards solving aptitude and reasoning problems  Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests  Develop a bridge in analogies, series and visualizing directions  Apply various short cuts & techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams
27	VI	EE3021	Switch Gear and Protection	Explain different types of protective devices and relay systems.  Classify circuit breakers and relays  Suggest suitable protection scheme for a particular power system component  Discuss under voltage and overvoltage protection scheme  Design a protection scheme for power system

28	VI	EE3041	Control System Design	Design and tune proportional, integral and derivative controllers for given specifications  Design a suitable compensator using root-locus technique for the given specifications  Design a suitable compensator in frequency domain for the given specifications  Design state feedback controller and observer for given system  Construct MATLAB models for the implementation of closed-loop systems.
29	VI	EE3101	Restructured Power System	Explain restructuring of power system and related fundamentals of economics  Analyze role of independent system operator in deregulated power system  Analyze transmission congestion management and ancillary services in deregulated power system  Explain Indian electricity act in context with deregulated power market  Compare different organizations in Indian power sector in view of Indian electricity grid.
30	VI	EE3081	Electrical Drives and Control	Analyze stability, moment of inertia, speed and torque in drive systems  Compare various control strategies for electrical drive systems  Discuss starting, braking and speed control for AC and DC drives.  Explain vector control of induction motor drives.  Explain the speed control of synchronous motor and special motor drives.
31	VI	EE3541	Switchgear and Protection Lab	Identify different switches and circuit breakers Observe and explain MCCB. Plot characteristics of Relays. Assure working of Relays based on their technology and characteristics. Discuss different protection schemes. Demonstrate for Transformer and Generator protection
32	VI	EE3561	Electrical Drives and Control Lab	Demonstrate AC and DC drives fed from various power electronics converter.  Examine closed loop control of electrical drive systems.  Analyze performance of electrical drives by plotting speed-torque characteristics.  Compare performance of electrical drive systems according to speed-torque characteristics.  Simulate AC and DC drives fed from various power electronic converters.

	1	1		
				Design and implement PID controller
				for a closed-loop system
				Design a suitable compensator using
				root-locus technique.
	VI	EE3521	Control System Design	Design a suitable compensator in
33	*1	LL3321	Lab	frequency domain.
				Develop state feedback controller and
				observer for SISO system.
				Demonstrate control of closed-loop
				systems using MATLAB.
				Describe basic concepts of
				instrumentation and characteristics of
				instruments.
				Explain selection factors and application
				of transducers and sensors.
				Discuss different types of signal
34				conditioning devices
				Explain different data conversion
	VI	EE3061	Instrumentation	techniques and digital instruments
			Techniques	Describe different type of industrial
				process controllers
				Develop a thorough conceptual
				understanding and develop a logical
		SH3222	Scholastic Aptitude	approach towards
				Solving aptitude and reasoning
				problems
				Understand usage of aptitude terms of
				speed, time and distance and
				permutations, probabilities and
35	VI			applications.
33				Understand blood relations and ways of
				seating arrangements along with various
				geometrical figures
				Apply various short cuts & techniques
				to manage speed and accuracy to get
				equipped for various competitive and
				campus recruitment exams
				Apply the industrial management
				concepts, financial management
				concepts
				Contribute to the development,
				implementation, and evaluation of
				employee recruitment, selection, and
				retention plans and processes.
				Explain the importance of materials
36	VII	EE4021	Industrial organization	management function in an
50	V 11	EE4021	and management	
				organization, and how it can help in integrating various plans and reduce the
				material related costs
				Design a marketing research study that
				will act as a key resource in the
				development of a marketing plan
				Explain industrial psychology and solve
				the industrial problems.
				Describe the need of industrial
				automation and their functions.
				Make use of standard IEC programming
				languages.
				Design relay/RLL based control logic
<u> </u>	l .	L	L	1

37	VII	EE4041	Automation and	for Boolean expressions.
			Control(EE4041)	Construct relay logic ladder diagram for the given application.
				Develop GUI for monitoring system of the given real time applications using
				SCADA/HML.  Explain the need of power system
				expansion
				Analyze the given power system for
				determining optimal values of decision variables.
38	VIII	EE4091	Power System	Apply mathematical tools to solve
36	VII	EE4081	Planning	multi-objective optimization problems in expansion planning and reliability
				studies.
				Explain long term and short term planning.
				Discuss various economic analysis
				methods.
				Calculate MMF and thermal rating of various types of electrical machines
				Design armature and field systems for
				DC machines
39	VIII	EE4021	Electrical Machine	Design core, yoke, windings and
39	VII	EE4031	Design	cooling systems of transformers.  Design stator and rotor of induction
				machines.
				Design stator and rotor of synchronous
				machines and study their thermal behavior.
				Understand the importance of
				controllable parameters and benefits of facts controllers.
				Analyze the functional operation and
				control of series and shunt
40				compensation.
40	VII	EE4071	FACTS and HVDC	Describe the principles, operation and control of multi-functional facts
				controller.
				Identify significance of DC over AC transmission system, types and
				application of HVDC links in practical
				power systems.
				Apply various methods of grid control for HVDC systems.
				Design relay logic control system for
				given application using relays.
				Develop RLL for Boolean expressions.
	VII	EE4521	Automation and Control Lab	Develop RLL using timer and counter instructions.
41			Condoi Lau	Develop RLL using math instructions.
				Develop GUI using SCADA/HMI for
				given application
			Electrical Machine	Calculate design parameters of an electric machine
	VII	EE4531	Design lab	Analyze the effect of calculated design
42				parameters electrical machines

Posign electrical machine using design software   To acquire and apply fundamental principles of engineering.   Become updated with all the latest changes in technological world					
VII					
Write technical review paper.  Identify the liberal learning online course from the NPTEL platform Describe the online course given by the institute Apply the concept understand through the course in day to day life Generate & identify different business ideas.  Make analysis of different ideas.  Select proper business idea to suit his personality & competencies.  Apply knowledge of modern power electronics or converters and its application in modern power electronics  Analyze resonant converters and their topologies  Analyze resonant converters and their topologies  Analyze resonant converters and their topologies  Analyze and power converters. Iflers, ups systems  Develop mathematical models of various equipment used in power system to analyses both AC and AC-DC power system network.  Model single and three phase power system network components by using linear transformation and compound admittance technique.  Formulate AC and AC-DC power system network.  Apply various methods of load flow studies to analyze AC power system network.  Apply various methods of load flow studies to analyze AC power system network.  Analyze AC-DC power system network by using power flow analysis method				Training  Research UROP Phase	To acquire and apply fundamental principles of engineering.  Become updated with all the latest changes in technological world  Develop ability to communicate efficiently  Improve ability to identify, formulate and model problems and find engineering solution based on a systems approach  Develop awareness of the social, cultural, global and environmental responsibility as an engineer  Perform literature review and identify research topic.  Write synopsis of the research work that

				Apply fundamental principles of
				thermodynamics, fluid mechanics and
		OE432	Wind Energy Engineering	mechanical systems to wind turbine
				engineering.
51	VIII			Calculate various parameters related to
				wind turbine.
				Design of wind turbine components.
				Design in virtual environment.
				Work on team-based projects.
				Evaluate different DC-DC regulators
	VIII			Simulate and analyze resonant
				converters
		EE4511	Advanced Power	Select appropriate phase shifting
52			Electronics Laboratory	converter for multiphase converter
32				Evaluate various multi-level inverter
				configuration
				Compare various facts devices for VAR
				compensation
				Develop admittance matrix for the given
				power system network by using linear
				transformation technique and inspection
				method
				Analyzing HVDC conversion plant by
53				simulating power electronic conversion
			Computer Modelling	system.
	VIII	EE4531N	of Electrical Power	Apply various power flow analysis
			System Lab	method to solve AC and AC-DC power
				system network.
				Develop MATLAB program to solve
				the defined power system problem.
				Use various application software
				packages to perform power flow study
				of given power system network.
				Devise sound technical knowledge, for
				identified problem of project

54	VIII	EE4541A	Project Phase II	Propose engineering solution to complex problems.  Demonstrate the skills and attitude in professional way in a team  Illustrate the component and cost optimization solutions wherever applicable  Develop skills towards the use of modern tools and presentations  Justify outcomes through simulation/experimentation in environmental and sustainable way
				Summarize project report in an ethical way

- Department Name: Electrical Engineering
- PG Program Name: Power Systems and Power Electronics
- Vision: Develop globally competent electrical engineers to serve future needs and challenges of the society
- **Mission:** To impart technical education and research skills in close interaction with industry and society for the development of young minds, sensitive to ethical and environmental issues.

Sr. No.	Program Outcomes
1.	To independently carry out research /investigation and development work to solve practical
	problems.
2.	To write and present a substantial technical report/document.
3.	To demonstrate a degree of mastery over the area of power systems and power electronics.
4.	To collaborate, work harmoniously in teams and address multidisciplinary issues with
	consideration of professional, legal, and ethical concerns.
5.	To use advanced techniques, skills, and modern engineering tools with financial aspects.
6.	To learn continuously, independently and update knowledge & skills

Sr. No.	Program Specific Outcomes		
3.	Demonstrate skills in the area of power systems and power electronics for industrial		
	applications.		
4.	Investigate and conduct research in the area of power & energy systems and electric mobility		

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
1.	I	SHP5151	Numerical Computational Technique	<ol> <li>Estimate the error.</li> <li>Apply the relevant numerical method for interpolating the polynomial</li> <li>Develop the equation to be fitted and fit the curve for given data</li> <li>Estimate numerically the solution of given algebraic equation.</li> <li>Use the relevant method for solving the simultaneous linear equations and compute the Eigen values.</li> <li>Construct the fuzzy set for given linguistic variable and apply fuzzy logic.</li> </ol>
2.	I	EPP1011	Computer aided Power System Analysis	Model different components of power system     Carry out contingency analysis of power system     Analyze power network by conducting power flow studies     Model and simulate generator excitation system     Estimate state of power system using state estimation theory
3	I	EPP1021	Electric and Hybrid Electric Vehicles	Discuss the trends and philosophy of electric vehicles     Analyze Conventional Vehicles and Powertrains     Discuss the electric drive mechanism.     Classify hybrid electric vehicles     Differentiate Electric and range-extended electric vehicles     Describe plug-in hybrid electric vehicles and electrical infrastructure
4	I	EPP1031	Wind and Solar energy Technology	Describe the principle of energy generation from wind and solar PV systems     Formulate wind and solar energy systems by mathematical equations

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
				<ul><li>3. Assess energy produced from wind and solar energy systems.</li><li>4. Compare the different methods of energy generation</li></ul>
				from wind and energy systems  5. Develop economic analysis of a wind turbine and solar PV systems
5	I	EPP1041	Advanced Power Electronics	Classify different type's converters with respect to power output, configuration and application.
			Systems	Compare different types of power converters     Describe the working principle of different types of power converters
				4. Model different types of power converters mathematically.
	<b>T</b>	EDD1051	D' 4 'I 4'	5. Design pore converter for specific application.
6	I	EPP1051	Distribution	1. Prepare layout of the substations and feeders
			Automation	considering load and desired voltage  2. Design distribution system and associated
				equipment and devices.
				3. Identify an appropriate method of communication
				for any particular distribution system with a view of
				automation and SCADA
				4. Analysis distribution feeder components.
7	Ť	EDD1061	HVDC	5. Model the different distribution feeder components.
7	I	EPP1061	HVDC Transmission	Justify the need of HVDC Transmission system for power transmission
			Transmission	Analyze different working modes of converters used
				for HVDC transmission
				Compare different control schemes employed for controlling HVDC system
				4. Compute the filter parameters for elimination of
				voltage and current harmonics in HVDC system
		FDD1051		5. Draw and compare different configuration multi- terminal HVDC system
8	I	EPP1071	Power Electronics Application to Power Systems	<ol> <li>Justify need of reactive power compensation schemes</li> <li>Classify different power electronics based reactive</li> </ol>
			rower systems	power compensation systems
				Identify suitable reactive power compensation system for specific power system problems.
				4. Compare performance of different power electronics based reactive power compensation
				systems
				5. Design suitable power electronic based reactive power compensation system for specific power
9	I	EPP1081	Smart Grid	system problem
9	1	EFF1U81	Technologies	<ol> <li>Discuss the smart grid in Indian perspective</li> <li>Explain various smart grid technologies.</li> </ol>
				Describe smart meters and advance metering infrastructure.
				Compare Smart grid and microgrid
				5. Apply power quality management in smart grid
				6. Identify communication technologies for smart grid
10	I	EPP1091	Power System	1. Develop script to analyze symmetrical components
			Steady State Analysis Lab	using power system software.
			Analysis Lau	2. Analyze load flow and fault studies of given power system network using power system software.

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
				3. Develop program for power system optimization problem
				4. Develop estimation algorithm using least square methods.
				5. Use various power system software packages to
				analyze power system networks
11	I	EPP1101	Renewable Energy	1. Prepare report on wind resource assessment
			Lab	2. Operate and maintain squirrel cage and DFIG based systems.
				3. Compute reactive power requirement for standalone wind turbine system
				4. Demonstrate the effects of shadowing on PV
				modules
				5. List the installation materials for off grid PV systems
12	II	EPP2011	Power System	1. Describe power system operating states and control
			Dynamics and Stability	2. Analyze synchronous machine models
			Stability	3. Model excitation and prime mover system
13	II	EPP2021	Advanced Control	<ul><li>4. Describe the power system stability</li><li>1. Justify the need of closed loop drive system for</li></ul>
13	11	EFF 2021	of Electrical Drives	industrial applications.
			of Electrical Drives	Explain the working principle of different types of
				drive system.
				3. Compare different types of electric drives.
				4. Develop mathematical models of electric drive
				system for specific application.
				5. Design controllers for closed-loop operation of
14	II	EPP2031	Cuid Internation of	different types of electrical motors.
14	11	EFF2031	Grid Integration of Renewable Energy	1. Summarize the grid codes for integration of renewable energy sources
			Sources	2. Explain the working principle of different power
				electronic topologies and controllers.
				3. Model mathematically renewable energy sources and associated control system
				4. Design systems to reduce impact of renewable
				energy fluctuations on grid
15	II	EPP2041	Digital Protection	<ul><li>5. Develop simulation systems using MATLAB</li><li>1. Discuss the importance of power electronics devices</li></ul>
13	11	E112041	of Power System	in power system protection.
			, and a grant	2. Distinguish between conventional relays and
				modern relays  3. Apply mathematical approach towards protection
				Develop algorithms for numerical protection
				5. Explore recent advances in digital protection of
				power systems
16	II	EPP2051	Power System	1. Explain the need of power system optimization
			Optimization	2. Formulate power system optimization problem
				3. Apply numerical and heuristic technique to solve power system optimization problem.
				Solve power system optimization problem
				5. Assess the impact of parameters on defined
				optimization problem.
17	II	EPP2061	Power System	1. Describe the new dimensions associated with the
			Restructuring	power systems.
				2. Determine transmission congestion management
				3. Discuss pricing of transmission network

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
				4. Explain ancillary service management in electrical market
				5. Justify the role and functions of PX, IEX and various organization in Indian restructured power market
18	II	EPP2071	Power Quality and	1. Discuss various power quality problems and their
			Harmonics	analysis.  2. Classify various voltage quality issues and
				solutions.  3. Describe Power Quality Standards and Monitoring.
				4. Asses sources of harmonic in power system
				<ul><li>5. Analyze effects of Harmonics on Power system</li><li>6. Design of harmonic filters.</li></ul>
19	II	EPP2081	Electrical Energy	1. Discuss the energy storage as a structural unit of a
			Storage Systems	power system.  2. Compare various energy storage technologies for
				power systems.
				3. Apply battery energy storage and management for power system.
				4. Describe hydrogen energy storage for power system.
				5. Discuss short-term, mid-term and long-term
				<ul><li>applications of power system.</li><li>6. Analyze economics and reliability of energy storage</li></ul>
20	II	EPP2091	Research	Systems 1. Formulate a research problem.
20	11	2112071	Methodology &	Analyze research related information
			IPR	3. Prepare and present research proposal/paper by following research ethics
				4. Make effective use of computers and computing
				tools to search information, analyze information and prepare report.
				Describe nature and processes involved in development of intellectual property rights
21	II	EPP2101	Advanced Power	Analyze characteristics of digital relays
			System Protection Lab	2. Demonstrate fault simulation on different protection panels
				3. Develop an algorithm for different protection
				schemes 4. Simulate protection models
				5. Interpret the simulation results
22	II	EPP2111	Advanced Drives	Demonstrate control of Induction motor drive.
			Lab	<ol> <li>Experiment with chopper fed DC drive system.</li> <li>Experiment with three phase half and full converter</li> </ol>
				fed DC motor drive.
				4. Demonstrate control of BLDC, servo and stepper motor drive system.
				5. Demonstrate control of AC and DC drives using MATLAB/SIMULINK
23	II	SHP551	Technical Communication	Acquire skills required for good oral and written communication
			Communication	Demonstrate improved writing and reading skills
				3. Ensure the good quality of oral and written communication
24	II	EPP2121	Mini Project	Formulate a real-world problem.
				2. Design solution for a set of requirements.
				3. Use software packages available to analyze the proposed theory.

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
				4. Explain technical ideas, strategies and methodologies in written form and oral presentations
25	III	EPP3010	Industry Internship	<ol> <li>Apply engineering knowledge learned during the program.</li> <li>Apply his/her technical skills to solve industrial problem.</li> <li>Work in multi-disciplinary environment.</li> </ol>
26	III	MOE2010	Artificial Intelligence - Machine Learning	Describe central machine learning methods and techniques and how they relate to artificial intelligence     Differentiate between supervised and unsupervised learning techniques     Apply the ML algorithms to a real-world problem,     Optimize the models learned and report on the expected accuracy that can be achieved by applying the models.     Evaluate a given problem and apply appropriate machine learning technique
27	III	MOE2020	Creative Thinking: Tools & Techniques	Comprehend importance in tackling global challenges as well as in everyday problem- solving scenarios     Apply different brainstorming techniques in group activities     Be proficient in the application of the 6 thinking hats tool in different life scenarios     Develop a systematic approach to idea generation through the use of morphological analysis     Innovate on an existing product, service or situation applying the SCAMPER method     Get confident with the theory of inventive problem solving, called TRIZ     Select and apply the appropriate technique based on the opportunity to seize or the problem to tackle
28	III	MOE2030	MOOC Course	Identify the real applications and practices of courses studied, at industry level     Recognize various modeling, analysis and validation techniques adopted at industries.     Demonstrate the issues at design, manufacturing and assembly levels.     Summarize and present technical data in report format.
29	III	MOE2040	Condition Monitoring and Signal Processing	<ol> <li>Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.</li> <li>Analyze for machinery condition monitoring and explain how this compliment monitoring the condition.</li> <li>Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.</li> <li>Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to identify the malfunction in that system.</li> <li>Identify vibration measurement, lubrication oil analysis.</li> </ol>

Sr. No.	Semester	Course Code	Course Name	Course Outcome (CO)
30	III	MOE2050	Aircraft Conceptual Design	<ol> <li>Understand the design process of aircraft and decide the aircraft configuration.</li> <li>Choose type of power plant as per flight regime.</li> <li>Decide the fuselage layout as per type of aircraft.</li> <li>Design the wing for type of aircraft and its wing loading.</li> <li>Accurately evaluate lift, drag and mass for design synthesis process.</li> <li>Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.</li> </ol>
31	Ш	EPP3031	Dissertation Phase - I	1. Identify research opportunities in his/her domain or multidisciplinary domains  2. Formulate the problem statement and its objectives correctly  3. Apply the principles of project management during development of the project  4. Present synopsis in logical order  5. Write synopsis of the proposed system
32	III	EPP3041	Dissertation Phase - II	<ol> <li>Identify research opportunities in his/her domain or multidisciplinary domains.</li> <li>Formulate the problem statement and its objectives correctly</li> <li>Develop, simulate and implement the system by complying with desired technical specifications</li> <li>Analyze and synthesize obtained results in theoretical and practical context</li> <li>Present report in logical order</li> <li>Write report of the system implementation</li> </ol>
33	IV	EPP4011	Dissertation Phase - III	Formulate the problem statement and its objectives correctly     Develop, simulate and implement the system by complying with desired technical specifications     Analyze and synthesize obtained results in theoretical and practical context     Present report in logical order     Write report of the system implementation     Apply the principles of project management during development of the project
34	IV	EPP4021	Dissertation Stage IV	Formulate the problem statement and its objectives correctly     Develop, simulate and implement the system by complying with desired technical specifications     Analyze and synthesize obtained results in theoretical and practical context     Present report in logical order     Write report of the system implementation     Apply the principles of project management during development of the project

## **Electronics & Telecommunication Engineering**

- Department Name: Electronics & Telecommunication Engineering
- UG Program Name: Electronics & Telecommunication Engineering
- Vision and Mission: -

**Vision: -** Promote excellence in the field of Electronics & Telecommunication Engineering and allied areas through quality education

## Mission: -

- To provide quality education through need based curriculum, effective teaching learning process and state-of-art infrastructure.
- To inculcate research aptitude leading to patents and publications in refereed journals.
- To imbibe professional ethics, leadership skills, social, cultural & environmental awareness with a passion for lifelong learning.
- To strengthen relationships with industry, society, government bodies and alumni.

Sr.	Program Outcomes
No.	ě
1.	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an
	engineering specialization to the solution of complex engineering problems
2.	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering
	problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and
	engineering sciences
3.	<b>Design/development of solutions</b> : Design solutions for complex engineering problems and design system
	components or processes that meet the specified needs with appropriate consideration for the public health
	and safety, and the cultural, societal, and environmental considerations
4.	Conduct investigations of complex problems: Use research-based knowledge and research methods
	including design of experiments, analysis and interpretation of data, and synthesis of the information to
	provide valid conclusions
5.	<b>Modern tool usage</b> : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of
	the limitations
6.	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health,
0.	safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering
	practice
7.	<b>Environment and sustainability</b> : Understand the impact of the professional engineering solutions in
	societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable
	development
8.	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the
	engineering practice
9.	<b>Individual and team work</b> : Function effectively as an individual, and as a member or leader in diverse
	teams, and in multidisciplinary settings
10.	<b>Communication</b> : Communicate effectively on complex engineering activities with the engineering
	community and with society at large, such as, being able to comprehend and write effective reports and
	design documentation, make effective presentations, and give and receive clear instructions
11.	Project management and finance: Demonstrate knowledge and understanding of the
	Engineering and management principles and apply these to one's own work, as a member and leader in a
12	team, to manage projects and in multidisciplinary environments
12.	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life long learning in the broadest context of technological change.
	and life-long learning in the broadest context of technological change

Sr.	Program Specific Outcomes
No.	
1.	Analyze, design and develop electronic systems for communication applications by using appropriate
	modern tools and techniques
2.	Demonstrate the knowledge of the state of art tools and apply for the development of VLSI
	circuits/systems

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	H2113	Engineering Mathematics –III	Apply various transformation techniques to solve engineering problems
				Solve linear differential equations & problems related to engineering application in electronics
				Determine expansion of functions by using Fourier series  Apply the statistical techniques to
				solve various problems
2.	III	EC2013	Electronic Devices	Describe fundamentals of
				semiconductor devices.
				Explain working principle of various
				solid state devices
				Illustrate various applications of electronic devices.
				Interpret results of various electronic
				circuits
				Analyze different biasing circuits, frequency models
3.	III			State fundamental knowledge of digital
				design
				Apply knowledge for real-time
		EC2033		application
				3. Illustrate combinational and
			Digital System Design	sequential circuits
			8	Design combinational and sequential
				circuits
4.	III	EC2053		Describe concepts in analog
			Analog Communication	communication system
				Solve numerical based on various
				communication systems
				Analyze different modulation and
				demodulation techniques
				Compare the performance of modulation techniques
5.	III			Apply circuit analysis techniques to
		EC2073	Network Theory	simplify dc and ac circuits.
				Analyze steady state and transient
				responses of the networks.
				Determine parameters, functions and
				stability of the networks.

				Design circuits for the given requirements
6.	Ш	EC2093	Electronic Devices Lab	Sketch and analyze electronic circuits as per requirement conduct an experiment to observe response calculate different parameters from experimental results and plot the response interpret results of experiment and compare with measured values improve the ability to communicate effectively through written lab journals
7.	III	EC2113	Digital System Design Lab	Apply Boolean laws and k-map to design digital circuits.  Demonstrate the operation of combinational and sequential circuits for various practical applications.  Interpret results and compare with experimental values.  Communicate effectively through lab journals
8.	III	EC2133	Analog Communication Lab	Build different analog communication system  Demonstrate different modulation and demodulation methods  Develop different communication system using software tools  Conduct experiments in group and write reports
9.	III	EC2153	Technical Aptitude-I	Choose proper techniques to find solution for engineering problems  Solve various types of problems  Develop ability to face competitive examinations  Inspect the problem & conclude with proper solution
10.	III	SH2633	Professional Leadership Skills	Explain the traits of a leadership through real life examples  Exhibit the ability to work effectively in team  Prepare a presentation as per the audience and context requirements
11.	III	SH2613	Interpersonal Skills ('Jeevanvidya' for Work life Balance)	Exhibit interpersonal communication skills  Demonstrate decision-making skills  Apply conflict resolution styles appropriate in different situations

_	ı	1	1	
				Demonstrate skills to manage balance in work and life
				Apply Jeevanvidya wisdom in day life
12	111	C112602	Innovation Tools and	Evaloin atmostymed assessed to define
12.	III	SH2693	Innovation Tools and Methods for	Explain structured approach to define the problem with every possible
			Entrepreneurs	details, identify conflicts and solve
			Zimopronours	them
				Apply User Journey Map to the
				selected problem to show user
				interaction at various stages
				Analyze the solutions provided by
				competitors for effectiveness and gaps
				if any
13.	III	SH2593	Personal Effectiveness	Develop skills to build self-esteem, and
			and Body Language	positive attitude
				Develop interpersonal skills
				characterized by effective communication and conflict resolution
				Discover ways to overcome
				procrastination
				Demonstrate responsiveness towards
				stress and health issues
				Interpret the non-verbal behavior of a
				person
14.	III	SH2733	German Language- Basic	Interpret the language if the next
			Level	person is speaking slowly and clearly
				Make use of the language in routine
				life with routing topics like family,
				shopping, work etc.  Demonstrate the language by self-
				introduction in German with simple
				sentences
15.	III	SH2712	Japanese Language-	Make use of basic conversations in
			Level III	various situations
				Identify the sentence patterns
				Explain insight about the
				communication required for living in
				Japan
				Interpret Japanese work ethics required
16.	IV	CE2263	Engineering Mechanics	in their professional career  Classify various forces and their
10.	1 V	CE2203	Engineering Mechanics	
				effects, to analyze real life problems.
				Analyze engineering problems
				applying conditions of equilibrium.
				Determine Centroid & Moment of
				Inertia of the geometrical plane lamina
				Apply fundamental concepts of
				Kinematics and Kinetics to analyze
				practical problems.

		T C C C C		
17.	IV	EC202	Linear Integrated Circuit	Analyze different parameters of
			and Applications	various configurations of operational
				amplifier
				Design different applications of
				operational amplifier
				Classify various oscillators and active
				filters
				Illustrate different applications of
				operational amplifier and special ICs
18.	IV	EC2043	Microcontroller	Describe basic fundamentals of PIC
				microcontroller
				Write programs for PIC
				microcontroller
				Interface peripheral with PIC
				microcontroller
				Develop an embedded application
19.	IV	EC2063	Digital Communication	using PIC microcontroller
19.	1 V	EC2003	Digital Communication	Explain different concepts of digital
				communication systems.
				Calculate various parameters on
				statistical theory, source coding and
				channel coding.
				Apply various theorems of encoding
				and error control on signals.
				Analyze various digital modulation and
				channel coding techniques
20.	IV	EC2083	Signals and Systems	Classify continuous and discrete time
				signals and systems.
				Illustrate use of convolution and
				impulse response in LTI systems.
				Apply mathematical techniques to
				manipulate signals and systems.
				Make use of transform theory
				techniques for system analysis in time
				and frequency domain
21.	IV	SH2173	Environmental Science	Discuss the importance and sensitivity
				of environment.
				Interpret the over exploitation of
				natural resources and follow the
				environmental ethics.
				Explain methods to protect
				environment and prevent environmental pollution.
				Apply their knowledge and skills to
				solve environment related problems
22.	IV	CE2283	Engineering Mechanics	Compare coefficient of friction of
-	•		Lab	various surfaces in contact.
				Correlate theoretical and practical
				results of support reactions and
				Centroid of plane lamina.
			-	
				Verify law of polygon of forces, law of
				triangle of forces and principle of moment.
23.	IV	EC210	Linear Integrated Circuit	
25.	1 4	20210	and Applications Lab	Design different applications of
				integrated circuits

		1		
				Implement application circuits
				Interpret theoretical and practical results
				Communicate effectively through lab journals
24.	IV	EC2142	Microcontrollers Lab	Install configure and utilize the
				MPLAB tools for PIC microcontroller
				programming
				Write programs for PIC
				Microcontroller  Compile debug and test programs for
				PIC microcontroller
				Develop application using PIC
				microcontroller
25.	IV	EC2143	Digital Communication	Write MATLAB code for given
			Lab	specifications
				Demonstrate different digital
				communication techniques.
				3. Analyze the results by comparing
				with interpreted values
				Communicate effectively through lab
				write-ups
26.	IV	SH 2603	Environmental Science	Utilize scientific methods to solve
			project	environmental problems.  Evaluate technologies for restoration of
				degraded environment.
				Develop presentation and report writing
				skills.
				Develop as an individual and in group
27.	IV	EC215	Technical Aptitude-II	leadership quality  Choose proper techniques to find
27.	1 4	Lezis	recimear ripittude ii	solution for engineering problems
				Solve various types of problems
				Develop ability to face competitive
				examinations
				Inspect the problem & conclude with
				proper solution
28.	IV	SH2593	Personal Effectiveness &	Develop skills to build self-esteem and
			Body Language	positive attitude.
				2. Develop interpersonal skills characterized by effective
				communication and conflict resolution.
				3. Discover ways to overcome
				procrastination.
				4. Demonstrate responsiveness towards
				stress and health issues.
				5. Interpret the non-verbal behavior of a person
30	IV	SH2613	Interpersonal Skills ('Jeevanvidya' for Work	Exhibit interpersonal communication skills.
			life Balance)	2. Demonstrate decision-making skills.
				3. Apply conflict resolution styles
				appropriate in different situations.
				4. Demonstrate skills to manage
				balance in work and life.

				5. Apply Jeevanvidya wisdom in day to day life
31	IV	SH2633	Professional Leadership Skills	1. Explain the traits of a leadership through real life examples.
				2. Exhibit the ability to work
				effectively in team.
				3. Prepare a presentation as per the
32	IV	SH2693	Innovation Tools and	audience and context requirements.  Explain structured approach to define
32	1 4	5112073	Methods for Entrepreneurs	the problem with every possible detail, identify conflicts and solve them
				Apply User Journey Map to the selected
				problem to show user interaction at various stages
				Analyze the solutions provided by
				competitors for effectiveness and gaps if any
33	IV	SH2643	German Language-	Interpret the language if the next person
			Advanced Level	is speaking slowly and clearly.
				Make use of the language in routine life
				with the routing topics like family,
				shopping, work etc.
				Demonstrate the language by self-
				introduction in German with simple
				sentences
34	IV	SH2623	Japanese Language-	To be able to make basic conversations
			Advanced Level	in various situations.
				To recognize the sentence patterns.
				To improve Japanese Language
				proficiency.  To give students insights about the
				communication required for living in
				Japan.
				5)To expose students to the Japanese
				work ethics required in their
				professional careers
35	V	EC3012	Digital Signal Processing	Apply basic techniques of signals and
				system for implementation of digital
				signal processing system.
				Describe techniques available for
				implementation of digital signal
				processing system.
				Explain techniques available for
				implementation of digital signal
				processing system.
				Design and simulate the working of
				given digital signal processing system.
				Realize the given digital signal processing system
36.	V	EC3032	Power Electronics	Discuss characteristics, ratings and
				drive circuits of the power devices.
				Analyze the operation of power
				electronics converters, inverters and
				drives.
			}	Determine performance parameters of
				the converters and inverters.
				and converters and inverters.

				Design switching control circuit to
				meet desired specifications
37.	V	EC3052	Product Design	Describe the stages of product design
				and development
				Apply various concepts for product
				design.
				Devise product testing methods.
				Explain the processes and importance
20	**	7.00.72	777	of documentation
38.	V	EC3072	Electromagnetic Waves &	Apply the knowledge of vector algebra
			antenna Theory	and co-ordinate system to formulate and
				solve electromagnetic field problems.
				Use and apply basics of electric and
				magnetic fields to solve the
				electrostatics and magneto-statics
				problems.  Solve transmission line and Wave
				propagation problems.
39.	V	EC3092	Information Theory and	Explain basics of antennas  Explain different concepts in
37.	•	1203072	Coding	information theory and coding.
				Solve numerical on information theory,
				source coding and channel coding and
				error control coding.
				Apply various theorems of encoding,
				error control etc. on signals.
				Analyse various channel coding and
				error control techniques
40.	V	EC3112	Mixed Mode Controller	Explain the basic concepts of MSP430.
				Write Assembly and C programs for
				MSP430
				Interface Peripherals with MSP430
				Design low power Embedded system using MSP430
41.	V	EC3132	Audio Video Engineering	Design and construct the audio-
	•	200102	Tradio Trado Engineering	amplifier with various controls.
				Analyze comprehensive of television
				systems.
				Select television standards.
				Differentiate different television
				receivers.
				Summarize consumer Applications
42.	V	EC3152	RTL Simulation and	Describe fundamentals of HDL
			Synthesis with PLDs	Convert combinational and sequential
				modules into RTL form
				Choose proper coding technique to
				solve problems
				Design and synthesize various digital
	••	EG2155	G . 16	modules
43.	V	EC3172	Control System	Identify the mathematical models of
				different type of the control systems.
				Design and analyze the system
				parameters to meet performance

	I	1		· C' 1 . C
				specifications in time and frequency domain.
				Comment about stability of control
				system.
				Distinguish different control system and compensators
44.	V	EC3192	Comprehensive Exam -	Choose proper techniques to find
			III	solution for engineering problems
				Solve various types of problems
				Develop critical thinking and reasoning skills
				Develop ability to face competitive
				examinations
				Inspect the problem & conclude with proper solution
45.	V	EC3212	Digital Signal Processing	Design and simulate the working of
			Lab using MATLAB	given digital signal processing
				techniques
				Evaluate the performance of designed
				digital signal processing system
				Write relevant conclusion on the
				performance of designed digital signal
				processing system
				Present and write laboratory reports
				in desired format in grammatically
				correct language
46.	V	EC3232	Power Electronics Lab	Interpret V-I characteristics of power
				electronics devices
				Experiment power electronics
				converter for various conditions
				Design and analyze power electronic
				converter
				Create documentation report of the
47.	V	EC3252	Object Oriented	experiment Write, debug, and test basic C++ codes

49.	V	SH3032	Aptitude Training I	Develop a thorough conceptual
				understanding and develop a logical
				approach towards solving Aptitude and
				Reasoning problems.
				Understand usage of basic aptitude terms
				of percentages, averages, ratios and
				applications of business aptitude terms of
				profits and interests
				Develop a bridge in analogies, series and
				visualizing directions.
				Apply various short cuts & techniques to
				manage speed and accuracy to get
				equipped for various competitive and
7.0		7.7.2.2		campus recruitment exams.
50.	V	EC3292	Summer Internship	Demonstrate skills to use modern
			(4 Weeks)	engineering tools, software, and
				equipment to solve real world problems.
				Apply knowledge of professional and
				ethical responsibilities.
				Communicate in verbal and written
				form.
				Write a detailed report on Summer
				Internship
51.	V	SH301	Indian Constitution	Create awareness about law depiction
				and importance of Constitution
				Define Fundamental Rights and
				Fundamental Duties of the Indian
				Citizen to instill morality, social
				values, honesty, dignity of life and
				their social Responsibilities.
				Create Awareness of their
				Surroundings, Society, Social problems
				and their suitable solutions while
				keeping rights and duties of the citizen
				keeping in mind.
				Recognize distribution of powers and
				functions of Local Self Government.
				Comprehend the National Emergency,
				Financial Emergency and their impact
				on Economy of the country
52.	VI	EC3022	CMOS VLSI Design	Describe fundamentals of MOS circuits
				Apply knowledge of MOS circuits and
				fabrication process to solve problems
				Analyze combinational and sequential
				MOS VLSI circuits
				Design various digital modules using
				MOS technology
53.	VI	EC3042	Robotics	Describe robot mechanism with
				necessary hardware and software
				Design and control robot mechanism
				Analyze interfacing between Fire Bird
				V Robot with different wired and
				wireless communication modules

				Describe robot mechanism with
				necessary hardware and software
54.	VI	EC3062	Artificial Intelligence	Describe fundamentals of artificial
34.	V I	EC3002	Artificial intenigence	intelligence
				Explain various algorithms in machine
				and deep learning
				Analyze different architectures and
				basic techniques used in AI
				Apply mathematical models and
				algorithms to solve real-world problems
				Design and implementation issues in various AI applications
55.	VI	EC3082	Scientific Computing	Describe the significance of computing
				methods
				Apply method strengths in the
				application areas
				Perform the computations on various
				data using appropriate computation
				tools
56.	VI	EC3102	MEMS	Describe MEMS material and
				fabrication techniques.
				Discuss various sensors and actuators
				used in MEMS.
				Analyze various applications of
				MEMS to disciplines beyond Electrical
				and Mechanical
57.	VI	EC3122	Wavelets	Design filter banks
				Analyze filter banks and wavelets
				Apply wavelets for engineering and
				scientific applications
58.	VI	EC3142	Nano Electronics	Describe basic and advanced concepts
				of nanoelectronic devices.
				Illustrate different application of
				nanoelectronics.
				Interpret the results of various
				applications
59.	VI	EC3162	Automotive Electronics	Draw section blocks of automotive
				electronics systems.
				2. Interpret components of automotive
				electronics system.
				3. Develop microcontroller based
				automotive electronics system
				4. Examine safety and comfort features
				of automobile
60.	VI	OE3142	Mechatronics	Evnlain machatronias system
ου.	V I	OE3142	iviechauomes	Explain mechatronics system
				Identify electrical, hydraulic and
				pneumatic components
				Analyze the mechatronics based
				system

61.	VI	SH302	Biology for Engineers	Apply biological engineering
				principles, procedures needed to solve
				real-world problems
				Demonstrate the functions of biological
				systems
				Analyze biological phenomena with
				math and physics to gain important
				insights
				Explain working of different
				biomedical instruments
				Select the sensors for given biological
				applications
				Explain relevant aspect of movement
				control process
62.	VI	EC3182	Comprehensive Exam -	Choose proper techniques to find
			IV	solution for engineering problems
				Solve various types of problems
				Develop critical thinking and reasoning
				skills
				Develop ability to face competitive
				examinations
				Inspect the problem & conclude with
				proper solution
63.	VI	EC3202	CMOS VLSI Design Lab	Design and simulate schematic of
				various digital circuits
				Sketch layout of various digital block
				in CAD Tools
				Analyze various parameters of VLSI
				logic circuits
				Interpret results and compare with
				measured values
				Improve the ability to communicate
				effectively through written lab journals
64.	VI	EC3222	Python Programming Lab	Describe various features and
				programming aspects of Python
				Demonstrate various functions and
				operators in Python programming
				Differentiate modular programming
				approaches through use of functions
				and modules.
				Implement machine learning algorithms
				with Tenser Flow
				Solve real world problems using Deep
	***	EG224	Til	Learning with Tenser Flow
65.	VI	EC324	Electronics Product	Develop different modules of
			Design Lab	electronics product Write embedded c-code for electronic
				product
				Interpret and verify the results
				,
66.	VI	EC3262	Capstone Project Phase-I	Apply knowledge of mathematics,
				science, physics, engineering and

				management principles to solve
				complex engineering problems.
				Identify, formulate and analyze
				engineering problem based on
				experimental, statistical and
				computational methods to meet desired
				_
				needs.
				Design a system, component or process
				to meet desired needs within realistic
				constraints.
				Work as a leader or productive member
				of multi-disciplinary and multi-cultural
				team.
				Design, simulate, analyze and implement desired systems (hardware and software) by
				using modern and appropriate tools and
				techniques
67.	VI	SH3042	Aptitude Technical -II	Develop a thorough conceptual

				design and development process of
				Information Systems
				99. Design appropriate security
				technologies and policies to protect
				computers and digital information
77.	VII	EC4192	Computer Architecture	Describe computer architecture
				concepts and mechanisms related to the
				design of modern processors,
				memories, and networks and explain
				how these concepts and mechanisms
				interact.
				Evaluate various design alternatives and
				make a compelling quantitative and/or
				qualitative argument for why one
				design is superior to the other
				approaches.
				Demonstrate the ability to implement
				and verify designs of varying
				complexity at the register-transfer-
				level.
				Expose the students with different ways
				of communicating with I/O devices and
				standard I/O interfaces.
				Create new designs at the register- transfer-level and the associated
				effective testing strategies.
78.	VII	EC4212	Embedded Linux	Describe basic fundamentals of Embedded
				Linux
				Write applications in Linux for various
				peripherals
				Develop a device driver for Embedded
				Linux
				Design an embedded system using
				Embedded Linux OS.
79.	VII	EC4232	Computer Networks and	Develop logic for different network
			IoT Lab	algorithms
				Implement and test different algorithm
				codes
				Build and test Internet of Things
				applications
80.	VII	EC4252	Microwave Theory and	Illustrate operation of microwave sources,
		<b>-</b>	Techniques Lab	description of components and guide lines
				to operate microwave instruments.
				Measure various microwave parameters.
				Design microwave circuit using microwave
				components

81.	VII	EC4272	System Verilog Lab	Write system Verilog code for given specification
				Interpret the results as per specification
				Use tools for simulation and verification of
				digital modules
				Analyze the results by comparing with
				interpreted values
				Demonstrate and communicate effectively through lab journals
82.	VII	EC4292	Programmable Logic	Simulate different industry problems using
02.	, 11	20.272	Controller (PLC) Lab	ladder diagram.
				Implement the programs in plc hardware.
				Analyze different analog and digital control
				techniques with the help of ladder logic
83.	VII	EC4312	Capstone Project Phase II	Analyze result of implemented system
				to reach proper conclusions.
				Inculcate professional, ethical and
				moral responsibilities.
				Communicate effectively through
				reports, presentations and discussions
				within both the technical domain and
				the community at large.
				Apply the principles of project
				management both as a member and a
				team leader for project development.
				Learn independently and be ready for a
				lifelong learning to face increasing
84.	VIII	OE438	Finance for Engineers	challenges and responsibilities.  Discuss the fundamental aspects of
04.	VIII	OL438	(Online Course)	accounting and finance.
			(	Apply rules of accounting while
				recording transactions.
				Prepare financial statements and
				analyze financial position of the firm by
				applying various techniques.
				Describe the various long term sources of finance available for the business
				organization
				Ŭ
85.	VIII	OE436	Engineering Management	Develop administrative, organizational
			and Economics (Online	and planning skills to execute
			Course)	engineering project.
				Develop bar chart/mile stone chart for
				the project.  Analyze profit/cost data and carry out
				economic analysis to take optimal
				decision.
				Calculate depreciation as per various
				methods.
0.0	<b>37777</b>	ID4022	Intermedia and D. 1	Francisco de Control Co

				transformation process and the
				outputs (products and services)
				(T = 5 (T = 5 = 5 = 5 = 5 = 5 = 5 = 5 = 5 = 5 =

				Develop an attitude to adjust with the company culture, work norms, code of conduct.  Recognize and follow the safety norms, Code of conduct.  Demonstrate the ability to observe, analyse and document the details as per the industry practices.  Interpret the processes, systems and procedures and to relate to the theoretical concepts- studies.  Develop the leadership abilities, communication.  Demonstrate project management and finance sense
87.	VIII	OE438	Finance for Engineers (Online Course)	Discuss the fundamental aspects of accounting and finance.  Apply rules of accounting while recording transactions.  Prepare financial statements and analyze financial position of the firm by applying various techniques.  Describe the various long term sources of finance available for the business organization
88.	VIII	OE436	Engineering Management & Economics (Online Course)	Develop administrative, organizational and planning skills to execute engineering project.  Develop bar chart/mile stone chart for the project.  Analyze profit/cost data and carry out economic analysis to take optimal decision.  Calculate depreciation as per various methods
89.	VIII	RE4042	Research Project	Investigate the technical literature.  Recognize and evaluate theories, practices, and/or research on a chosen topic by conducting a thorough literature review and submitting a written integrative, critical summary of the current literature.  Design a research problem and develop a methodology.  Develop and implement an advanced original research or creative project.  Develop the ability to explain the conceptual viability of the project and describe the major components involved.  Develop the ability to explain how the project will impact the relevant body of work.

90.	VIII	ED4102	Project Management	Develop advanced discipline-relevant skills and competencies.  Construct an accurate record of research performed.  Write a research report and paper Prepare business Plan for selected business.  Make risk analysis& market analysis of selected project.  Make risk analysis& market analysis of selected project  Make financial appraisal of selected
91.	VIII	ED4042	Commercial Aspects pf the Project	Interpret basic Financial Terminologies.  Prepare & analyze financial statements.
				Prepare financial Plan for venture.  Apply basic principles of marketing for various products.  Prepare market survey.  Apply knowledge of marketing
92.	VIII	ED4062	Entrepreneurship Development Program (EDP)	management for selected business  Apply knowledge of engineering, economics, marketing and finance for formulation of business plan, starting & managing new business
93.	VIII	ED4082	Entrepreneurship Development Project	Apply knowledge of engineering, economics, marketing and finance for preparation of project report.  2. Make commercial, technical and financial appraisal of project

- Department Name: Electronics & Telecommunication Engineering
- PG Program Name: M. Tech Electronics Engineering
- Vision and Mission: -

Vision: - Promote excellence in the field of Electronics & Telecommunication

Engineering and allied areas through quality education

## Mission: -

- To provide quality education through need based curriculum, effective teaching learning process and state-of-art infrastructure.
- To inculcate research aptitude leading to patents and publications in refereed journals.
- To imbibe professional ethics, leadership skills, social, cultural & environmental awareness with a passion for lifelong learning.
- To strengthen relationships with industry, society, government bodies and alumni.

Sr. No.	Program Outcomes
1.	Demonstrate a degree of mastery over electronics engineering
2.	Independently carry out research/investigations and development work to solve practical
	problems of society and industry
3.	Write and present a substantial technical report/document
4.	Adapt professional, ethical and moral responsibilities
5.	Use knowledge of Project Management and Finance to tackle administrative responsibilities
6.	Explore ideas and engage in lifelong learning

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	EEE1014	Advanced Digital Signal Processing	Explain techniques available for implementation of digital signal
			Signal Processing	processing system
				2. Design and simulate the working of given digital signal processing
				system

Г		T	1	
				3. Evaluate performance of digital
				signal processing system
				4. Interpret the performance of digital
				signal processing system
2.	I	EEE1034	VLSI Design	Describe VLSI front end and back
				design of combinational and
				sequential systems
				2. Model VLSI circuits and System
				using Verilog HDL
				3. Analyze various parameters of MOS
				VLSI Circuits
				4. Design circuits and Layout of
2	τ.	EEE1174	D 1	digital VLSI systems
3.	I	EEE1174	Research	1. Formulate a research problem.
			Methodology & IPR	2. Analyze research related
				information
				3. Use computing tools effectively
				4. Describe nature and processes
				involved in development of
				intellectual property rights
4.	I	EEE1194	Advanced Digital	1. Design digital signal processing
			Signal Processing Lab	system based on given specifications
			Lau	2. Develop MATLAB program to
				simulate the working of designed
				digital signal processing system
				3. Analyze performance of digital
				signal processing system
				5. Demonstrate effectively though
5.	I	EEE1214	VLSI Design Lab	oral/lab report
3.	1	EEE1214	VESI Design Lau	1. Design circuits and Layout of
				digital VLSI systems
				2. Model VLSI circuits and Systems
				using Verilog HDL
				3. Use of Tools and techniques to
				perform experiment and verify the
				results
				4. Demonstrate effectively though
				oral/lab report
6.	I	EEE1054	Wireless Sensor	1. Analyze single node network
			Networks	architecture of WSN
				2. Classify routing and MAC layer
				protocol in WSN
				3. Develop specific requirements of
				applications in wireless sensor
				networks for energy efficiency,
				computing, storage and
	<b>Y</b>	EEE1074	A.11.D.	transmission
7.	I	EEE1074	Advanced Power Electronics	1.Describe operation and applications
			Electronics	of converters
				2.Design magnetic components, heat
				sinks and converters
			•	•

				3.Illustrate methods of high power
				parameters measurements
				4. Justify requirement of power factor correction in utility interface
8.	I	EEE1094	Advanced	1. Describe advanced concepts of
			Computer Architecture	computer architecture
			Architecture	2. Differentiate of RISC and CISC
				architectural characteristics
				3. Design structures of Pipeline and Multiprocessor systems
				4. Classify recent computer architectures and I/O devices
9.	I	EEE1114	Soft Computing	1. Describe soft computing techniques
				and their roles in building intelligent
				machines
				2. Apply neural networks to pattern
				classification and regression problems
				3. Solve engineering problems using
				fuzzy logic
				4. Develop genetic algorithms to
				combinatorial optimization
10.	I	EEE1134	Biomedical Signal	problems  1. Analyze genesis of biomedical
10.	1	LLL1134	Processing	signals such as the action potential,
			8	EMG, ECG, EEG, and heart sound
				signals
				2. Describe signal processing
				techniques for filtering, noise removal,
				and cancellation of interference and
				characterization of signals
				3. Design and implement techniques
				for the detection of events such as
				the QRS complex, heart sounds
				and murmurs and the dichotic notch
11.	I	EEE1154	Industrial	Apply necessary learning directions
			Automation	to deal with the field of industrial
				automation
				2. Illustrate independent and outside-
				the-box creative thinking for
				automation
				3. Develop functional solutions to industrial problems
12.	II	EEE1004	Numerical	1. Apply the relevant numerical
			Computation	methods for interpolating the
			Techniques	polynomial
				2. Solve engineering problems using
				ordinary differential equations and
				statistical techniques
				3. Use the relevant method for solving
				the simultaneous linear equations
				and compute the Eigen values

				4.	Estimate numerically the solution
13.		EEE1024	Embedded System	1.	for given algebraic equation  Describe basic fundamentals of
13.		EEE1024	Design	1.	ARM processors
			D cong.	2.	
				۷.	1 0
				2	controller
				3.	Demonstrate the methods of
					interfacing peripherals with
					LPC2148
				4.	Design an embedded application using LPC2148
14.	II	EEE1044	Antennas and	1.	Explain different concepts of
			Microwave		Antenna and Microwave
			Engineering		Engineering
				2.	Apply the basic Principles of
					Antenna and Microwave
					Engineering
				3.	Design and assess the performance
					of various antennas
				4.	Develop microwave systems for
					various applications
15.	II	EEE1184	Technical	1.	Acquire skills required for good oral
			Communication		and written communication
				2.	Demonstrate improved writing skills
					and level of readability
				3.	Ensure the good quality of technical
					reports at very first-time submission
16.	II	EEE1204	Embedded System	1.	Write programs for ARM and DSP
			Design Lab		controllers
				2.	Compile debug and test programs for
					ARM and DSP controller
				3.	Develop application using ARM or
					DSP controller
				4.	Demonstrate through oral/reports
17.	II	EEE1224	Antennas and Microwave	1.	Identify different parameters of
					Antennas and Microwave structures
			Engineering Lab	2.	Design and Simulate different types
					of antennas and Microwave
					structures in Electromagnetic Field
					solver
				3.	Compare the performance of
					different types of antennas and
					Microwave structures
				4.	Write necessary reports
18.	II	EEE1244	Mini Project	1.	Select title of mini-project and
					formulate its objectives correctly
				2.	Develop, simulate and implement
					the system by complying with
					desired technical specifications
				3.	Analyze and synthesize obtained
					results in theoretical and practical
					context
	İ		1	4	Dragant findings in logical ander
				4.	Present findings in logical order

				5. Write a report to document his/her
				findings
19.	II	EEE1064	Internet of Things	Describe the structure of the Internet
				of thing
				2. Explore to the interconnection and
				integration of the physical world
				with cyber space
				3. Develop IOT based application
20.	II	EEE1084	Automotive	1. Describe components of automotive
			Electronics	electronics, its evolution, trends,
				safety standards and advances
				towards autonomous vehicles
				2. Develop automotive grade
				microcontroller based system
				3. Design and model various
				automotive control systems
21.	II	EEE1104	Network Security	1. Explain network security, services,
				attacks, mechanisms, types of attacks
				on TCP/IP protocol suite
				2. Apply network layer security
				protocols, Transport layer security
				protocols, Web security protocols
				3. Illustrate authentication services,
				algorithms
				4. Describe wireless network security
22.	II	EEE1124	Machine Learning	threats  1. Describe basic concepts and
22.	11	LEET124	and Artificial	techniques of Machine Learning
			Intelligence	2. Develop skills of using recent
				machine learning software for
				solving practical problems
				3. Build AI and ML applications
23.	II	EEE1144	VLSI Verification	Write system verilog test benches
			and Testing	2. Develop verification and testing
				algorithms
				3. Identify faults/bug in the design
				4. Analyze code coverage and
				functional coverage
				5. Create reusable verification
				environment
24.	II	EEE1164	Wireless	1. Design appropriate mobile
			Communication	communication systems
				2. Apply frequency-reuse concept in
				mobile communications, and to
				analyze its effects on interference,
				system capacity, handoff techniques
				3. Distinguish various multiple-access
				techniques for mobile
				communications
				4. Analyze path loss and interference
				for wireless telephony and their
				influences on a mobile

					communication systems
					performance
25.	III	EEE2014	Industry Internship	1.	Apply engineering knowledge learned during the program
				2.	Propose creative and innovative
					solution to the given problem
				3.	Work in multi-disciplinary setting
				4.	Show concern for society,
					environment and other social
				_	concerns
				5.	Demonstrate given tasks according to the industrial needs with full integrity and responsibility
26.	III	MOE2010	Artificial	1.	Describe central machine learning
			Intelligence -		methods and techniques and how
			Machine Learning		they relate to artificial intelligence
				2.	Differentiate between supervised
					and unsupervised learning techniques
				3.	Apply the ML algorithms to a real-
					world problem,
				4.	Optimize the models learned and
					report on the expected accuracy that
					can be achieved by applying the
				5.	models.  Evaluate a given problem and apply
				<i>J</i> .	appropriate machine learning
25	***	14072020	G		technique
27.	III	MOE2020	Creative Thinking: Tools & Techniques	1.	Comprehend importance in tackling global challenges as well as in
				2.	everyday problem-solving scenarios  Apply different brainstorming
					techniques in group activities
				3.	Be proficient in the application of
					the 6 thinking hats tool in different life scenarios
				4.	Develop a systematic approach to
					idea generation through the use of
				5.	morphological analysis Innovate on an existing product,
					service or situation applying the SCAMPER method
				6.	Get confident with the theory of
					inventive problem solving, called TRIZ
				7.	technique based on the opportunity
28.	III	MOE2030	MOOC Course	1.	to seize or the problem to tackle  Identify the real applications and
20.	111	11012000	111000 Course	1.	practices of courses studied, at
					industry level
				2.	Recognize various modeling,
					analysis and validation techniques
					adopted at industries.

				2 Damonatuate the : of 1
				3. Demonstrate the issues at design,
				manufacturing and assembly levels.
				4. Summarize and present technical data in report format
29.	III	MOE2040	Condition	1. Identify the maintenance scheme,
			Monitoring and	their scope and limitations – apply
			Signal Processing	the maintenance strategies to various
				problems in the industrial sectors.
				2. Analyze for machinery condition
				monitoring and explain how this
				compliments monitoring the
				condition.
				3. Develop an appreciation for the need
				of modern technological approach
				for plant maintenance to reduce the
				maintenance expenditure.
				4. Emphasizes on case studies that
				require gathering information using
				the modern testing equipment and
				processing it to identify the
				malfunction in that system.
				5. Identify vibration measurement,
30.	III	MOE2050	Aircraft Concentual	lubrication oil analysis
30.	111	MOE2030	Aircraft Conceptual Design	1. Understand the design process of aircraft and decide the aircraft
			Design	configuration.
				2. Choose type of power plant as per
				flight regime.
				3. Decide the fuselage layout as per type
				of aircraft.  4. Design the wing for type of aircraft and
				its wing loading.
				5. Accurately evaluate lift, drag and mass
				for design synthesis process.
				6. Examine the influence of various
				design requirements on the
				configuration of an aircraft to derive an optimized design
31.	III	EEE2034	Dissertation Phase-I	Identify research opportunities in
				his/her domain or multidisciplinary
				domains
				2. Formulate the problem statement
				and its objectives correctly
				3. Apply the principles of project
				management during development of
				the project
				4. Present synopsis in logical order
				5. Write synopsis of the proposed
				system
32.	III	EEE2054	Dissertation Phase-	1. Identify research opportunities in
			II	his/her domain or multidisciplinary
				domains.
				2. Formulate the problem statement
				and its objectives correctly

				3.	Develop, simulate and implement
				٥.	the system by complying with
					desired technical specifications
				4	
				4.	Analyze and synthesize obtained
					results in theoretical and practical
				_	context
				5.	Present report in logical order
				6.	Write report of the system
					implementation
				7.	
					management during development of the project
33.	IV	EEE2004	Dissertation Phase-	1.	Identify research opportunities in
			III		his/her domain or multidisciplinary
					domains.
				2.	Formulate the problem statement
					and its objectives correctly
				3.	
					the system by complying with
					desired technical specifications
				4.	Analyze and synthesize obtained
					results in theoretical and practical
					context
				5	Present report in logical order
				6.	Write report of the system
				0.	implementation
				7.	Apply the principles of project
				/ .	management during development of
					the project
34.	IV	EEE2024	Dissertation Viva	1.	Identify research opportunities in
			Voce (Dissertation		his/her domain or multidisciplinary
			Phase-IV)		domains.
				2.	Formulate the problem statement
					and its objectives correctly
				3.	Develop, simulate and implement
					the system by complying with
					desired technical specifications
				4.	Analyze and synthesize obtained
				' '	results in theoretical and practical
					context
				5.	Present report in logical order
				<i>5</i> .	
				0.	Write report of the system implementation
				7.	Apply the principles of project
					management during development of
1					the project

- Department Name :- Information Technology
- UG Program Name :- B. Tech. Computer Science and Information Technology
- Vision and Mission :-
  - **Vision:** To become a prominent department of Information Technology producing competent IT professionals with research and innovation skills, inculcating moral values and societal concerns.
  - o Mission:
    - To offer high quality education through state of art curriculum and innovative teaching & learning practices.
    - To establish state of art laboratories and center of excellence in the field of technology.
    - To adopt professional practice, standards and values.
    - To inculcate problem solving aptitude in graduates with lifelong learning skills to become valuable resource for IT industry and society.
    - To create, share, and apply knowledge in Computer Science and Information Technology, including in interdisciplinary areas that extend the scope of Computer Science and Information Technology to benefit society.

Sr. No.	Program Outcomes
1.	PO1: Engineering knowledge: Apply the knowledge of mathematics, science,
	engineering fundamentals, and IT engineering specialization to the solution of complex
	engineering problems.
2.	PO2: Problem analysis: Identify, formulate, research literature, and analyze complex
	engineering problems reaching substantiated conclusions using first principles of
	mathematics and engineering sciences.
3.	PO3: Design/Development of solutions: Design and develop IT solutions using domain
	knowledge for engineering problems that meet the specified needs with appropriate
	consideration for the public health and safety, and the cultural, societal, and environmental
	considerations.
4.	<b>PO4: Conduct investigations of problems:</b> Use fundamental knowledge and engineering
	skills including design of experiments, analysis and interpretation of data, and synthesis of
	the information to provide valid conclusions.
5.	PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources,
	modern engineering and IT tools including prediction and modeling to complex
	engineering activities with an understanding of the limitations.
6.	<b>PO6: The engineer and society:</b> Apply reasoning informed by the contextual knowledge
	to assess societal, health, safety, legal and cultural issues and the consequent
	responsibilities relevant to the professional engineering practice.
7.	PO7: Environment and sustainability: Understand the impact of the professional
	engineering solutions in societal and environmental contexts, and demonstrate the
	knowledge of and need for sustainable development.
8.	<b>PO8: Ethics:</b> Apply ethical principles and commit to professional ethics and
	responsibilities and norms of the engineering practice.
9.	<b>PO9: Individual and team work:</b> Function effectively as an individual, and as a member
	or leader in diverse teams, and in multidisciplinary settings.
10.	<b>PO10: Communication:</b> Communicate effectively on complex engineering activities with
	the engineering community and with society at large, such as, being able to comprehend
	and write effective reports and design documentation, make effective presentations, and
	give and receive clear instructions
11.	PO11: Project management and finance: Demonstrate knowledge and understanding of
	the engineering and management principles and apply these to one own work, as a member
	and leader in a team, to manage projects and in multidisciplinary environments

12.	PO12: Life-long learning: Recognize the need for, and have the preparation and ability to
	engage in independent and life-long learning in the broadest context of technological
	change.

Sr. No.	Program Specific Outcomes
1.	<b>PSO1: Domain Specific Knowledge:</b> Apply the relevant methods and techniques to develop
	solutions in the domains of automation and intelligent systems.
2.	<b>PSO2: Software Product Development:</b> Apply the design and deployment principles to
	deliver a quality software product for the success of business of varying complexity.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	III	CI2011	Discrete Mathematics	<ol> <li>Evaluate logic statements using the properties of logic.</li> <li>Apply the concepts in discrete data structures such as sets, relations and functions to solve the problems.</li> <li>Use elementary combinatorics to solve counting problems.</li> <li>Solve examples of lattices, algebraic structures.</li> <li>Prove the theorems and properties of lattices, algebraic structures, graphs.</li> <li>Apply graph theory concepts to solve problems of</li> </ol>
2.		CI2031	Computer Networks	<ol> <li>connectivity.</li> <li>Describe the various network components and topologies.</li> <li>Illustrate the concepts, services, protocols and algorithms used in Computer Networks.</li> <li>Write the terminology and client-server programs using Berkeley socket programming.</li> <li>Solve problems related to routing, framing, error correction, detection and IPv4 addressing.</li> <li>Compare the different services, protocols and algorithms used in Computer Networks.</li> </ol>
3.		CI2051	Data Structures and Algorithms	<ol> <li>Describe the basic terminologies of data structures and algorithms</li> <li>Write algorithms for operations to be performed on data structures</li> <li>Demonstrate the working of stack, queue, linked list, tree and graph</li> </ol>

				4. Compare static and dynamic representations of linear
				and non-linear data structures
				5. Choose appropriate data structures while developing
				solution to the problem
4.				1. Convert the number from one system to another and
				vice versa.
				2. Explain the basic gates and realize it using universal
				gate.
				3. Minimize the given expression using Boolean algebra
			Digital	and Karnaugh Map
	Cl	I2071	Electronics	4. Draw a circuit diagram for combinational logic and
				analyze its properties
				5. Design the sequential logic circuits.
				6. Describe the 8085 architecture, Identify the instruction
				set and apply it in assembly language programming
				using modern tools.
5.				5. Implement client server applications using Berkeley
3.				
				Socket programming
				6. Implement programs to demonstrate framing methods,
				error detecting, correcting methods and routing
			G .	algorithms.
		Computer Networks	7. Solve problems based on IPv4 network addressing.	
			Lab	y zorve processing custo on in vinetuon and cosmig.
				8. Demonstrate the use of various networking tools and
				utilities.
				Distinguish between the network hardware and
				software used for network design.
6.				Describe the basic terminologies of data structures and
				algorithms
				2. Write algorithms for operations to be performed on data
			Data	structures
	CI2111	Structures	3. Implement stack, queue, linked list, tree and graph data	
		and Algorithms	structures in C language	
			Lab	4. Compare static and dynamic representations of linear
				and non-linear data structures
				5. Choose appropriate data structures while developing
				solution to the problem
7.			Digital	Verify the basics of all logic gates using IC Trainer Kit.
,.	C	I2131	Electronics	in the cases of an rogic gates using to Trainer Mit.
			Lab	

				2. Demonstrate the working of Combinational circuits on
				IC Trainer Kit.
				3. Demonstrate the working of Sequential circuits on IC
				Trainer Kit.
				4. Implement the 8085 assembly language program using
				TASM or simulator.
8.				1. Describe the procedural and object oriented paradigm
				with concepts of streams, classes, functions, data and
				objects.
				2. Illustrate dynamic memory management techniques
			Object	using pointers, constructors, destructors, etc.
		CI2151	Oriented	3. Implement the concept of function overloading, operator
		CI2151	Design and Programmin	overloading, virtual functions and polymorphism.
			g Lab	4. Apply inheritance with the understanding of early and
				late binding, usage of exception handling, generic
				programming.
				5. Develop solution for a given application using various
				OOPs concepts.
9.			Technical	Comprehend the knowledge gained in the course work.
		CI2171	Aptitude-I	2. Demonstrate the ability in Problem Solving
10.	D		Open Elective-II Professional Skills Developmen t and	Explain the traits of a leadership through real life
				examples.
				2. Exhibit the ability to work effectively in team.
		SH2633	Foreign	3. Prepare a presentation as per the audience and context
			Languages –	requirements
			Professional	1
			Leadership	
			Skills	
11.			Open	Exhibit interpersonal communication skills.
			Elective-II Professional	2. Demonstrate decision-making skills.
			Skills	3. Apply conflict resolution styles appropriate in different
	SH2613	Developmen t and	situations.	
			Foreign	4. Demonstrate skills to manage balance in work and life.
		SH2613	Languages - I-	5. Apply Jeevanvidya wisdom in day to day life.
		Interpersonal		
			Skills	
			('Jeevanvidy a' for Work	
			Life	
			Balance)	

12.		SH2693	Open Elective-II Professional Skills Developmen t and Foreign Languages – I- Innovation Tools and Methods for Entrepreneur s	Explain structured approach to define the problem with every possible detail, identify conflicts and solve them     Apply User Journey Map to the selected problem to show user interaction at various stages     Analyze the solutions provided by competitors for effectiveness and gaps if any.
13.		SH2593	Open Elective-II Professional Skills Developmen t and Foreign Languages – I Personal Effectivenes s and Body Language	<ol> <li>Develop skills to build self-esteem and positive attitude.</li> <li>Develop interpersonal skills characterized by effective communication and conflict resolution.</li> <li>Discover ways to overcome procrastination.</li> <li>Demonstrate responsiveness towards stress and health issues.</li> <li>Interpret the non-verbal behaviour of a person.</li> </ol>
14.		SH2733	Open Elective-II Professional Skills Developmen t and Foreign Languages – German Language- Basic Level	<ol> <li>Interpret the language if the next person is speaking slowly and clearly.</li> <li>Make use of the language in routine life with the routing topics like family, shopping, work etc.</li> <li>Demonstrate the language by self-introduction in German with simple sentences.</li> </ol>
15.		SH2713	Open Elective-II Professional Skills Developmen t and Foreign Languages – - Japanese Language- Level-III	<ol> <li>Make use of basic conversations in various situations.</li> <li>Identify the sentence patterns.</li> <li>Explain insights about the communication required for living in Japan.</li> <li>Interpret Japanese work ethics required in their professional career.</li> </ol>
1.	IV	SH2043	Mathematics for Data Analytics	<ol> <li>Compute Karl Pearson's Product moment correlation Coefficient and fit the lines of regression.</li> <li>Compute Discrete probability distribution, Continuous probability distributions and Joint probability distributions.</li> </ol>

			1	1 0 1 1 10 11 11 11 11 11 11
				3. Apply specific probability distributions to real-life
				examples.
				4. Compute the Mathematical formulas for the given fuzzy
				set.
				5. Prove additional properties of alpha-cuts and use
				extension principle to fuzzy sets.
				6. Apply extension principle to fuzzy arithmetic and solve
				fuzzy equations.
2.				Predict the regular expression for given language
				2. Design computational models for given language
				3. Parse the given string using top down & bottom up
		CI2021	Automata	parsing
			Theory	4. Construct the CFG for given language
				5. Prove the properties of regular language and context
				free language
3.				Describe fundamental concepts in software engineering
				and project management
				2. Practice software process models for the undertaken
			software problems	
				3. Design function-oriented and object oriented models
			using modern tools.	
		CI2041	Software Engineering	4. Compare different software testing techniques and
		Engineering	strategies.	
			5. Apply the project management concepts for the	
			undertaken software problems	
				6. Illustrate concepts of project monitoring and control in
				software development
4.				1. Describe the basic structure of computers with its
				different components.
				2. Perform the basic arithmetic operations like Number
				complements and floating points.
		CI2061	Computer	3. Analyze the machine's instruction set architecture (ISA).
	C12061	Organization	4. Categorize memory organization and explain the	
				function of each element of a memory hierarchy.
				5. Illustrate the different ways of communicating with I/O
				devices.
			6. Classify the different hazards occurred in pipelining.	
5.				1. Classify various forces and their effects, to analyze real
		CE2263	Engineering Mechanics	life problems.
			iviecnanics	
			1	

				2. Analyze engineering problems applying conditions of
				equilibrium.
				3. Determine Centroid & Moment of Inertia of the
				geometrical plane lamina
				Apply fundamental concepts of Kinematics and
				Kinetics to analyze practical problems
6.				Explain the concepts in python.
0.				Explain the concepts in python.     Implement program using loops, decision statements
				and functions in Python.
				·
				3. Use object oriented programming with classes and
		CI2081	Python lab	modules using python.
				4. Implement file handling and database handling using
				python.
				5. Plot data using appropriate Python visualization
				libraries.
7.				1. Compare coefficient of friction of various surfaces in
				contact.
				2 Complete the continued and acceptical accepts of consent
		752283	Engineering Mechanics	2. Correlate theoretical and practical results of support
	CE2283	Lab	reactions and Centroid of plane lamina.	
				3. Verify law of polygon of forces, law of triangle of forces
				and principle of moment
				1
8.				1. Discuss the importance and sensitivity of environment.
				2. Interpret the over exploitation of natural resources and
				follow the environmental ethics.
	S	SH2173	Environment	3. Explain methods to protect environment and prevent
			ai Science	environmental pollution
				_
9.				_
				F
		E.	2. Evaluate technologies for restoration of degraded	
	S	SH2603	Environment al Science	environment.
			Project	2 De la constata de 27 129
				5. Develop presentation and report writing skills.
				5. Develop as an individual and in group leadership quality.
9.			al Science  Environment al Science	follow the environmental ethics.  3. Explain methods to protect environment and prevent environmental pollution  4. Apply their knowledge and skills to solve environment related problems.  1. Utilize scientific methods to solve environmental problems.  2. Evaluate technologies for restoration of degraded

10.			Comprehend the knowledge gained in the course work.
10.	CI2101	Technical Aptitude-II	Comprehend the knowledge gained in the course work.     Demonstrate the ability in Problem Solving
11.	SH2633	Open Elective-II Professional Skills Developmen t and Foreign Languages – I Professional Leadership Skills	<ol> <li>Explain the traits of a leadership through real life examples.</li> <li>Exhibit the ability to work effectively in team.</li> <li>Prepare a presentation as per the audience and context requirements</li> </ol>
12.	SH2613	Open Elective-II Professional Skills Developmen t and Foreign Languages - I- Interpersonal Skills ('Jeevanvidy a' for Work Life Balance)	<ol> <li>Exhibit interpersonal communication skills.</li> <li>Demonstrate decision-making skills.</li> <li>Apply conflict resolution styles appropriate in different situations.</li> <li>Demonstrate skills to manage balance in work and life.</li> <li>Apply Jeevanvidya wisdom in day to day life.</li> </ol>
13.	SH2693	Open Elective-II Professional Skills Developmen t and Foreign Languages – I- Innovation Tools and Methods for Entrepreneur s	<ol> <li>Explain structured approach to define the problem with every possible detail, identify conflicts and solve them</li> <li>Apply User Journey Map to the selected problem to show user interaction at various stages</li> <li>Analyze the solutions provided by competitors for effectiveness and gaps if any.</li> </ol>
14.	SH2593	Open Elective-II Professional Skills Developmen t and Foreign Languages – I Personal Effectivenes s and Body Language	<ol> <li>Develop skills to build self-esteem and positive attitude.</li> <li>Develop interpersonal skills characterized by effective communication and conflict resolution.</li> <li>Discover ways to overcome procrastination.</li> <li>Demonstrate responsiveness towards stress and health issues.</li> <li>Interpret the non-verbal behaviour of a person.</li> </ol>

15.			Open	Interpret the language if the next person is speaking
			Elective-II Professional	slowly and clearly.
			Skills	2. Make use of the language in routine life with the
			Developmen t and	routing topics like family, shopping, work etc.
		SH2643	Foreign	3. Demonstrate the language by self-introduction in
			Languages –	German with simple sentences.
			German	
			Language- Advanced	
			Level	
16.			Open Elective-II	To be able to make basic conversations in various
			Professional	situations.
			Skills Developmen	2. To recognize the sentence patterns.
		SH2623	t and	3. To improve Japanese Language proficiency.
		3112023	Foreign Languages –	4. To give students insights about the communication
			-	required for living in Japan.
			Japanese Language-	5. To expose students to the Japanese work ethics
			Level-IV	required in their professional careers.
1.	V			1. Explain fundamental concepts in operating systems
		CI301		2. Apply the concepts of operating systems for the given
				requirement
				3. Select the appropriate algorithm such as scheduling,
			Operating Systems	deadlock, page replacement or disk scheduling for
			Systems	devising solution to the given problem
				4. Compare various operating system techniques
				5. Justify findings of the given problem using operating
				system concepts
2.				1. Describe the fundamental elements of relational
				database management systems.
				2. Design ER-models to represent simple database
				application scenarios
		CIOCO	Database	3. Write SQL/PL-SQL query to perform various operations
			Management Systems	on the database.
			J	4. Apply integrity constraints on database.
				5. Apply concepts of indexing and hashing on databases.
				6. Illustrate the transaction management, concurrency
				control and crash recovery.
3.			Design and	1. Apply mathematics needed for the analysis of
		CI305	Analysis of	algorithms.
			Algorithms	

			<ol> <li>Use asymptotic analysis to analyze the performance of algorithms.</li> <li>Compare various searching and sorting algorithms.</li> <li>Apply different algorithm design techniques to solve real life problems like change making problem, job sequencing, finding shortest path, etc.</li> <li>Identify appropriate algorithm design strategy that is applicable to a given contextual problem.</li> <li>Describe Computational complexity theory to classify computational problems according to their inherent</li> </ol>
4.	CI307	Program Elective-I - Organization al Management and Behavior	<ol> <li>Describe &amp; apply a selection of key concepts/theory/frameworks relevant to management.</li> <li>Discuss the basic concepts of operation, financial, material and marketing management.</li> <li>Present/Solve for the case study based on management and organizational behavior concepts.</li> <li>Review basic concepts of organizational behavior and group and interpersonal processes like team, group management and conflict management and handling.</li> <li>Relate organizational culture and performance and the organizational change</li> </ol>
5.	CI309	Program Elective-I - IPR and Cyber Laws	<ol> <li>Describe fundamental terms in cybercrime legislations.</li> <li>Compare various cyber-attacks &amp; offenses.</li> <li>Analyze Indian IT Act 2000 &amp; amendments in IT Act</li> <li>Demonstrate cyber forensics investigations using modern tools &amp; techniques.</li> <li>Construct a strategy for creating awareness about cyber security for e-banking and legal issues among the social community.</li> </ol>
6.	CI311	Program Elective-I - Software Modeling & Design	<ol> <li>Identify object classes and build the domain model using advanced concepts in object, dynamic and functional modeling.</li> <li>Apply different object-oriented design techniques.</li> <li>Design models using UML diagrams for software systems: use case, class, sequence, collaboration, activity, state chart diagrams, component and deployment.</li> </ol>

				4. Design software systems using open source and
				advanced modeling tools.
				5. Evaluate designs of software systems in mini-projects,
				projects using Software Modeling & Design concepts.
				projects using Software Moderning & Design concepts.
7.	-			Explain the concepts and terminologies in java
				programming language
				2. Create class hierarchy using Java inheritance and
				interface for given requirement.
			JAVA	3. Implement programs on Exception Handling, Packages,
		CI313	Programmin	File Handling using IDE's
			g Lab	4. Design GUI based applications by using AWT and
				Swing package for given problem.
				Swing package for given problem.     Develop Java applications to address particular
0				software needs by making use of collections classes.
8.				Draw Schema Diagram on given problem statement.
			Database	2. Write SQL query for various operations like retrieval,
	CI315			insertion and manipulation of data etc.
				3. Implement PL/SQL cursor, procedure/function and
		Management Systems Lab	trigger.	
			4. Implement a program to connect databases to application	
				programs.
			5. Implement basic commands of MongoDB with	
			installation.	
9.				Identify and use the basic and advanced commands in
				Unix
				2. Practice simple and advanced filters of Unix system
		CI317	Operating Systems Lab	using regular expression
			Systems Lau	3. Implement shell scripts and shell programs for given
			problems	
				4. Practice user management administration in Unix
10.		SH3032		Develop a thorough conceptual understanding
				and develop a logical approach towards solving
				Aptitude and Reasoning problems.
			Aptitude	2. Understand usage of basic aptitude terms of
			Training-I	percentages, averages, ratios and applications of
				business aptitude terms of profits and interests
				3. Develop a bridge in analogies, series and visualizing
				directions.
<u></u>				

		I	1	4 4 1 2 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1
				4. Apply various short cuts & techniques to manage speed and
				accuracy to get equipped for various competitive and
				campus recruitment exams.
11.				1. Apply the theoretical and practical knowledge of CS/IT
				Engineering for product/service development.
				2. Undergo real time IT Industry practices regarding
				product/service development.
			Summer	3. Identify and analyze engineering problems to provide IT
		CI319	Internship	based solutions.
				4. Adopt recent industry practices for project development
				5. Improve the ability to work in teams
				6. Enhance technical skills for solving complex
				engineering problems.
12.				Comprehend the knowledge gained in the course work.
12.		CI321	Comprehens ive Exam-III	
12				2. Demonstrate the ability in Problem Solving
13.				Create awareness about law depiction and importance
			Indian Constitution	of Constitution
				2. Define Fundamental Rights and Fundamental Duties
				of the Indian Citizen to instill morality, social values,
				honesty, dignity of life and their social
				Responsibilities.
				3. Create Awareness of their Surroundings, Society,
		SH301		Social problems and their suitable solutions while
		511001		keeping rights and duties of the citizen keeping in
				mind.
				4. Recognize distribution of powers and functions of
				Local Self Government.
				5. Comprehend the National Emergency, Financial
				Emergency and their impact on Economy of the
				country.
1.	VI			1. Describe the fundamentals of information security,
				security model, legal and ethical issues, risk
			Information Security	management.
				2. Apply cipher techniques and cryptographic
		CI302		algorithms to perform encryption and decryption.
				3. Analyze the ways to provide access control like
				authorization and authentication.
				4. Illustrate the working of several real-world security
				protocols.
				r

			5 Cummoniza the accountry massisians in ans
			5. Summarize the security provisions in software,
			operating system and data.
			6. Explain the model for implementing information
			security and maintain the security of information
			systems.
2.			1. Categorize and carefully differentiate between
			situations for applying different classification or
			clustering algorithms and evaluate their performance.
			2. Apply different algorithms to generate association
			rules.
		Program	3. To predict the outcome of certain problem using data
	CI304	Elective-II –	mining techniques.
		Data Mining	4. Apply appropriate data mining algorithm to any given
			data set to solve real world problems.
			5. To develop skills of using recent data mining software
			for solving practical problems.
			6. Develop the framework for web mining.
3.			1. Explain the basic terminology, architecture and
		Program Elective-II - Sensor	concepts of Sensor networks.
			2. Identify the different Platforms, Communication
			Technologies and Protocols in Sensor networks.
			3. Apply time-synchronization strategy for any wireless
	CI306		sensor application.
		Networks	4. Identify the security issues and challenges in wireless
			sensor networks.
			Compare different Sensor Network Platforms and
			Tools.
4.			Differentiate Machine Learning algorithms from
''			traditional algorithms.
			Apply Regression algorithms to predict the values for
			given applications.
		Program Elective-II - Machine Learning Algorithms	
			3. Analyze the Classification and Clustering techniques.
	CI308		4. Compare the strengths and weaknesses of different
	~		Machine Learning algorithms.
			5. Elaborate the working of the Recommendation System
			and its importance in different application domains.
			6. Evaluate performance of Artificial Neural Networks
			on different parameters such as architecture, learning
			rate etc.

			<u> </u>
5.	CI310	Program Elective-II – Computer Vision	<ol> <li>Identify basic concepts, terminology, theories, models and methods in the field of computer vision.</li> <li>Choose the appropriate image processing methods for image segmentation.</li> <li>Apply computer vision techniques for solving practical problems on Area Extractions.</li> <li>Analyze the accuracy of the methods used in Region Analysis.</li> <li>Illustrate basic methods of computer vision related to Facet Model Recognition</li> <li>Explain the different forms of Knowledge Representation methods used in computer vision</li> </ol>
5.	CI312	Program Elective-III - Soft Computing	<ol> <li>Gain understanding of various soft computing techniques.</li> <li>Identify and design fuzzy based systems.</li> <li>Explore different selection, crossover and mutation operators of genetic algorithm.</li> <li>Analyze performance of different evolutionaryalgorithms for mathematical and real-world optimization problems.</li> <li>Identify and formulate complex problems from different engineering domains.</li> </ol>
6.	CI314	Program Elective-III - Human Computer Interaction	<ol> <li>Identify the advantages of good graphic interface design</li> <li>Describe human needs in the contexts of graphical user interface</li> <li>Analyze the steps involved in the design process of human computer interaction.</li> <li>Develop graphical user interface for a given Screen specification.</li> <li>Demonstrate the different Software tools used for Interaction devices.</li> <li>Design effective HCI for mobile and web.</li> </ol>
7.	CI316	Program Elective-III - Software Testing	Describe software testing fundamentals.     Explain different software testing types.

			3. Design/build test cases based on different test case
			design techniques.
			4. Make use of modern automation tools for testing a
			given software system.
			5. Produce test case reports using manual and automation testing for given case studies.
0			
8.			Explain fundamentals of classical and modern AI.      Invalence to pride page of AI agreeds.
			2. Implement a wide range of AI concepts.
			3. Demonstrate various applications of AI in intelligent
		Artificial Intelligence	agents and knowledge acquisitions.
	OE320	(Open	Design appropriate machine learning algorithm for
		Elective-IV)	Uncertain Knowledge representation.
			5. Design expert systems using AI technique and
			machine learning.
			6.
9.			Understand the basics of computer forensics
			2. Identify the vulnerabilities in a given network
		Cyber Forensics	infrastructure
			3. Implement real-world hacking techniques to test
	OE322	(Open	system security
		Elective-IV)	4. Apply a number of different computer forensic tools to
			a given scenario
			5. Analyze and validate forensics data
10.			1. Apply biological engineering principles, procedures
			needed to solve real-world problems
			2. Demonstrate the functions of biological systems
		Dist. C	3. Analyze biological phenomena with math and physics
	SH302	Biology for Engineers	to gain important insights
			Explain working of different biomedical instruments
			5. Select the sensors for given biological applications
			<ul><li>6. Explain relevant aspect of movement control process.</li></ul>
11.			Describe .NET framework & fundamentals.
11.			1. Describe .NET trainework & fundamentals.
		C#. Net Lab	2. Implement object oriented concepts.
			3. Implement Multi-threaded and file handling programs.
	CI318		4. Implement Database programming with ADO.NET
			4. Implement Database programming with ADO.NET
			5. Implement Exception handling programs.
			6. Develop desktop applications.

12.				1. Explain the basic concepts and terminologies of
				Android technology
				2. Design User Interfaces using views, layout managers,
				menus and dialogs
				3. Make use of shared preferences, files and SQLite
			Mobile Application Developmen	database for persistent data storage and multimedia in
	CI	I320		android application
			t Lab	4. Develop mobile application using activity, services,
				content providers and broadcast receivers of Android
				Technology
				5. Apply testing frameworks, packaging and deploy
				android application to emulators and physical devices
13.				1. Apply the theoretical and practical knowledge of
				CS/IT Engineering for product/service development
				2. Identify and analyze engineering problems to provide
			IT based solutions	
		Capstone	3. Design efficient algorithms for better	
			products/services	
	CI	I322	Project	4. Adopt recent industry practices for project
			Phase-I	development
				5. Improve the ability to work in teams
				6. Develop effective presentation and communication
				skills through projects
				7. Manage the project in terms of scope, cost, time and
				quality of project as defined by stakeholders
14.				Develop a thorough conceptual understanding
				and develop a logical approach towards solving
				Aptitude and Reasoning Problems
				2. Understand usage of aptitude terms of speed, time
				and distance and permutations, probabilities and
	SH	3052	Aptitude Training-II	applications.
				3. Understand blood relations and ways of seating
				arrangements along with various geometrical figures
				4. Apply various short cuts & techniques to manage speed and
				accuracy to get equipped for various competitive and
				campus recruitment exams.
15.			Comprehens	Comprehend the knowledge gained in the course work.
	CI	I324	ive Exam-IV	2. Demonstrate the ability in Problem Solving

1.	VII	1		1. Describe software testing fundamentals.
1.	VII	IT4012	Software Testing	<ol> <li>Describe software testing fundamentals.</li> <li>Explain different software testing types.</li> <li>Design/build test cases based on different test case design techniques.</li> <li>Make use of modern automation tools for testing a given software system.</li> <li>Produce test case reports using manual and automation testing for given case studies.</li> </ol>
2.		IT4032	Neural Network and Deep Learning	<ol> <li>Describe the ideological basics of artificial neural networks.</li> <li>Identify the different structures of artificial neural networks.</li> <li>Formalize the problem and solve it by using a neural network.</li> <li>Illustrate the fundamental issues and challenges of Deep learning.</li> <li>Design the various deep neural network systems.</li> <li>Implement various Deep learning algorithms in a range of real-world applications.</li> </ol>
3.		IT4052	Parallel Computing (PE-IV)	<ol> <li>Summarize parallel programming technique and compare it with Sequential Programming</li> <li>Develop programs to use multi-core processors using OpenMP</li> <li>Write an parallel programs using MPI</li> <li>Explore different features of the CUDA framework.</li> <li>Identify the different CUDA capable GPU platforms.</li> <li>Design a parallel algorithm for any compute-intensive application.</li> </ol>
4.		IT4072	Big Data (PE-IV)	<ol> <li>Understand the need of Big data Technologies.</li> <li>Write program using Map Reduce framework.</li> <li>Describe Hadoop and its component</li> <li>Write the queries using HIVEQL</li> <li>Use Hadoop ecosystem like Pig and Hive to build application</li> </ol>
5.		IT4092	Recent IT Technologie s (PE-IV)	<ol> <li>Explore the recent tools and technologies of IT.</li> <li>Identify the ethical considerations of developing IT applications</li> </ol>

			3. Describe the potential benefits of using IT technology
			in the real world
6.	IT4112	Data Mining (PE-IV)	<ol> <li>Categorize and differentiate between situations for applying different classification or clustering algorithms and evaluate their performance.</li> <li>Demonstrate various data preprocessing techniques.</li> <li>Apply different algorithms to generate association rules.</li> <li>To predict the outcome of certain problem using data mining techniques.</li> <li>Apply appropriate data mining algorithm to any given data set to solve real world problems.</li> <li>Handle complex datasets like Text mining, web mining, stream mining and other.</li> </ol>
			(Use recent data mining tools and techniques for solving practical problems)
7.	IT4132	Data Analytics (PE-V)	<ol> <li>Differentiate the characteristics of datasets and compare the trivial data and big data for various applications.</li> <li>Select and implement techniques and computing environment that are suitable for the data analytical applications.</li> <li>Solve problems associated with the data characteristics such as high dimensionality, dynamically growing data and in particular scalability issues.</li> <li>Understand and apply scaling up machine learning techniques and associated computing techniques and technologies for data analytical.</li> <li>Provide problem solutions for multi-core or distributed, concurrent/Parallel environments.</li> </ol>
8.	IT4152	Internet of Things (PE-V)	<ol> <li>Describe the applications, basic terminologies and fundamentals of IoT.</li> <li>Illustrate the different IoT platforms, communication standards and protocols.</li> <li>Identify the security issues and challenges in IoT.</li> <li>Design and develop the IoT solutions for real word problems.</li> <li>Prepare an IoT case studies for smart applications.</li> </ol>

9.	IT4172	Computer Graphics and Virtual Reality (PE-V)	<ol> <li>Describe the basic concept and framework of virtual reality and development tools.</li> <li>Illustrate the principles and multidisciplinary features of virtual reality</li> <li>Describe the technology for multimodal user interaction and perception in VR (visual, audial and haptic interface and behavior).</li> <li>Discuss the technologies for managing large-scale VR environment in real time.</li> <li>Analyze the virtual reality issues.</li> </ol>
10.	IT4192	Front End Web Technology Lab	<ol> <li>Design and develop elegant and responsive Front-end by leveraging latest technologies</li> <li>Build strong foundations (ex: Design pattern) in entry level engineers thereby making them job ready as per industry requirements.</li> <li>Learn new technologies by applying foundation paradigms</li> <li>Become an industry-ready engineer who can be readily deployed in a project</li> <li>Design and develop websites using fundamental web languages, technologies, and tools.</li> <li>Apply the concepts of web technologies for the given requirement</li> </ol>
11.	IT4212	Advanced Java Laboratory (PE Lab)	Use Bootstrap to make web application responsive.     Build fast and interactive web application using JQuery and Angular JS2     Develop dynamic, server-side applications using Servlets.      Develop dynamic, server-side applications using JSP.     Build web applications using Hibernate framework.
12.	IT4542	R Programmin g (PE Lab)	<ol> <li>Implementation of core concepts of R programming using R studio and console</li> <li>Implement basic statistical operations using R Programming.</li> <li>Apply suitable type of data distributions to different engineering problems</li> </ol>

13.	IT4552	Asp.Net (PE Lab)	<ol> <li>Create charts, plots and vectors for graphical analysis.</li> <li>Solve Machine Learning Algorithms Using R         Programming         <ol> <li>Develop dynamic web application using ASP.NET.</li> <li>Apply front end technologies to make web application responsive and fast.</li> <li>Develop web application using MVC and Entity framework.</li> <li>Build web services in ASP.NET.</li> </ol> </li> </ol>
14.	IT4272	Capstone Project Phase- II	<ol> <li>Apply the theoretical and practical knowledge of CS/IT Engineering for product/service development</li> <li>Identify and analyze engineering problems to provide IT based solutions</li> <li>Design efficient algorithms for better products/services</li> <li>Develop the project using modern IT tools, techniques and technologies</li> <li>Adopt recent industry practices for project development</li> <li>Improve the ability to work in teams</li> </ol>

- Department Name :- Mechanical Engineering
- UG Program Name :- B.Tech. Mechanical Engineering
- Vision and Mission :-

**Vision:** To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent Mechanical Engineers who are innovative, entrepreneurial, and successful in advanced fields of engineering and research.

## Mission:

- To impart better quality education to the students for grooming them into globally competent mechanical engineers by building their capacity and strengthening skills.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices.
- To develop state of the art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.

Sr. No.	Program Outcomes
13.	Apply the knowledge of mathematics, science, engineering fundamentals, and mechanical
	engineering to the solution of complex engineering problems.
14.	Identify, formulate, review research literature, and analyze complex mechanical engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
15.	Design solutions for complex mechanical engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
16.	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
17.	Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex mechanical engineering activities with an understanding of the limitations.
18.	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
19.	Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
20.	Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
21.	Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

22.	Communicate effectively on complex mechanical engineering activities with the engineering
	community and with society at large, such as, being able to comprehend and write effective reports
	and design documentation, make effective presentations, and give and receive clear instructions.
23.	Demonstrate knowledge and understanding of the engineering and management principles and
	apply these to one's own work, as a member and leader in a team, to manage projects and in
	multidisciplinary environments.
24.	Recognize the need for, and have the preparation and ability to engage in independent and life-long
	learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes			
3.	Use Company standards, national and international standards like IS BS, SAE, ISO, ASTM etc for			
	designing and manufacturing of mechanical components and systems.			
4.	Engage professionally in industries or as an entrepreneur by applying manufacturing, design,			
	thermal and management practices.			

## 2021-22

Semester	Course Name	Course Code	Course Code Course Outcome		
Semester-III		ME2013	Explain different alloys, their properties and applications by		
			referring equilibrium diagrams.		
	Material Science &		Determine mechanical properties by destructive testing methods.		
	Metallurgy		Detect flaws in components by non-destructive testing methods.		
	Metanuigy		Select suitable heat treatment to achieve desired changes in		
			mechanical properties of steels.		
			Select suitable material for given engineering applications.		
			Apply laws of thermodynamics to various flow devices		
			Describe entropy, change in entropy and increase of entropy		
			principle.		
			Compute available and unavailable energy of a substance		
	Engineering	ME2033	Recognize the properties of pure substances and use thermodynamic		
	Thermodynamics	WIE2033	property tables, charts.		
			Apply mathematical fundamental to study the properties of steam		
			gas and gas mixtures		
			Compute performance of various thermodynamic air and vapor		
			power cycles.		
			Calculate the resultant for concurrent and non-concurrent force		
			systems.		
			Recognize the importance of D'Alembert's principle, apply it in		
	Engineering ME2053	ME2053	plane motion and connected bodies.		
			Draw the free body diagram and apply the equations of equilibrium		
			to 2D and 3D rigid bodies		
			Explain particle dynamics and compute various forms of stored		
			energy under gradually and suddenly applied load conditions		
			Apply the D'Alembert's, Work Energy and collision principle to		
			analysis in plane motion bodies.		
			Define, calculate, measure properties of fluid		
		ME2073	Apply continuity equation, Bernoulli's equation, equation of		
	Fluid Mechanics		motion and momentum equation for different flow system.		
			Identify different types of flows & forces acting on fluid.		
			Estimate forces acting on bodies submerged in fluid.		
			Estimate forces acting on bodies submerged in fluid		

			Apply basic concept of fluid mechanics for dimensional analysis & compressible flow.
	Manufacturing		Select casting as manufacturing process suitable for the component design and production volume
	Processes and		Select suitable furnaces in casting process as per requirement.
	<b>Machine Tools</b>	ME2093	Select appropriate joining process for given application.
			Select suitable Engineering forming process for production of component of required specification
			Select machine tools for metal cutting operations.
	Electrical	ME2113	Explain different types of electrical machines, their characteristics and control.
	Technology	NIE2113	Analyze different types of electrical machines.
			Explain electric drives and electric heating.
			Discuss the importance and sensitivity of environment.
	Environmental	G-14-1-2	Interpret the over exploitation of natural resources and follow the environmental ethics.
	Science	SH2173	Explain methods to protect environment and prevent environmental pollution
			Apply their knowledge and skills to solve their environment related problems
			Demonstrate the various laws studied in engineering mechanics
	Engineering	ME2513	Calculate the forces and deflection in structural member
	<b>Mechanics Lab</b>	WIE4515	Develop the physical sense towards the engineering mechanics
			term and establish relation between them
	Fluid Mechanics		Verify and apply Bernoulli's Theorem.
	and Electrical	ME2533	apparatus  Determine coefficient of discharge of fluid flow
	Technology Lab		Calculate various losses through pipes.
			Illustrate stress strain diagram for Mild steel.
	Material Science Lab		Use Rockwell Hardness testing machine to measure hardness of
			material.  Correlate mechanical properties with microstructures of steel and
			cast iron.
		ME2553	Test materials for their impact strength.
			Classify steels by spark testing method.
			Heat treat the given specimen to alter the mechanical properties.
			Measure Hardenability of given steel using Jominy End Quench Test
			Demonstrate effect of variables such as Voltage, current on welding process.
			Produce given joint by MIG welding process.
	<b>Workshop Practice</b>	ME2573	Produce welding run on S.S. by TIG welding.
	<b>−I</b>	ME25/3	Produce welding run on Aluminum by TIG welding.
			Produce given job with proper taper and V threading within
			dimensional tolerances $\pm$ 0.2 m.m. on diameter and $\pm$ 0.5 m.m. on length. (Job – A)
	Technical Aptitude -I		Apply the knowledge acquired during the course work.
		ME2593	Develop the ability of problem solving.
		SH2603	Utilize scientific methods to solve environmental problems.
		5112005	Evaluate technologies for restoration of degraded environment.

Environmental Science Project		Develop presentation and report writing skills.	
20000000	Develop as an individual and in group leadership quality		
Professional Leadership Skills	SH2633	<ol> <li>Explain the traits of a leadership through real life examples.</li> <li>Exhibit the ability to work effectively in team.</li> <li>Prepare a presentation as per the audience and context requirements.</li> </ol>	
Interpersonal Skills ('Jeevanvidya' for Work Life Balance)	SH2613	<ol> <li>Exhibit interpersonal communication skills.</li> <li>Demonstrate decision-making skills.</li> <li>Apply conflict resolution styles appropriate in different situations.</li> <li>Demonstrate skills to manage balance in work and life.</li> <li>Apply Jeevanvidya wisdom in day to day life.</li> </ol>	
Innovation Tools and Methods for Entrepreneurs	SH2693	<ol> <li>Explain structured approach to define the problem with every possible detail, identify conflicts and solve them</li> <li>Apply User Journey Map to the selected problem to show user interaction at various stages</li> <li>Analyze the solutions provided by competitors for effectiveness and gaps if any.</li> </ol>	
Personal Effectiveness and Body Language	SH2593	<ol> <li>Develop skills to build self-esteem and positive attitude.</li> <li>Develop interpersonal skills characterized by effective communication and conflict resolution.</li> <li>Discover ways to overcome procrastination.</li> <li>Demonstrate responsiveness towards stress and health issues.</li> <li>Interpret the non-verbal behaviour of a person.</li> </ol>	
German Language - Basic Level	SH2733	<ol> <li>Interpret the language if the next person is speaking slowly and clearly.</li> <li>Make use of the language in routine life with the routing topics like family, shopping, work etc.</li> <li>Demonstrate the language by self-introduction in German with simple sentences</li> </ol>	
Japanese Language - Level III	SH2713	<ol> <li>Make use of basic conversations in various situations.</li> <li>Identify the sentence patterns.</li> <li>Explain insights about the communication required for living in Japan.</li> <li>Interpret Japanese work ethics required in their professional career.</li> </ol>	

Semester	Course Name	Course Code	Course Outcome
Semester-IV	Engineering Mathematics – III	SH2063	<ol> <li>Evaluate differential equation using appropriate concept.</li> <li>Analyze system and its mathematical model and select suitable differential equation method to solve model.</li> <li>Analyze the problem and apply the concept of partial differential equations.</li> <li>Evaluate Laplace &amp; inverse Laplace transform of function and solve ordinary differential equations and linear time invariant systems.</li> <li>Develop Fourier series of periodic functions.</li> <li>Apply the concept of Fourier transform to engineering problems.</li> </ol>
	Strength of Materials	ME2023	1. Determine different types of stresses and strains induced in any machine component.

			2.	Develop shear force and bending moment diagram for different types of beam.
			3.	Determine stress distribution for various cross sections of
			4.	beam. Estimate the deflection of beams by analytical and
			5.	graphical method Analyze axially loaded column for different end conditions.
				Differentiate SI and CI engine and cycles and relate different performance parameters, and compare different pollution norms
			2.	Illustrate and analyse the performance of various the refrigeration system.
	Applied Thermodynamics	ME2043	3.	Differentiate between various types of boilers and evaluate performance of boiler
	i nei mouynamics		4.	Design a steam nozzle for given condition and calculate nozzle efficiency
			5.	Compute different efficiencies and power developed by impulse and reaction turbine.
				Estimate cooling water required and calculate vacuum and condenser efficiency.
			1. 2.	Explain the mechanism of metal cutting.  Analyze the effect of various parameters such as process
			2.	variables, cutting tool materials etc. on the performance of machining.
	Tool Engineering	ME2063	3.	Explain the importance of the various elements of tool geometry of single and multi-point cutting tools.
				Design jigs and fixtures for given components.
			5.	Design press tools for cutting and forming press working operations.
				Estimate machining cost.
			1. 2.	Select suitable mechanisms for given application Analyze the mechanism for velocity and acceleration
	Kinematics of Machines		3.	Design the CAM for given condition
		ME2083	4.	Apply appropriate power transmission method for mechanical system
			5. 6.	Analyse kinematically flywheel, governor and gear system Synthesize given mechanical system
				Build Object Oriented Programs.
	:		2.	Elaborate the concepts of "inline function", "friend function", "function overloading" and "operator overloading".
	Computer		3.	Extend the program by using inheritance.
	Programming C++	ME2103	4.	Use memory management technique "constructors" & "destructors".
	Trogramming C11		5.	"destructors".  Handle different file handling techniques like "Create', "Open", "Close" files and perform "Read", "Write" and
				"Append" operations.
				Write C <sup>++</sup> programme to draw simple geometric shapes.  Exposure to constructional details of engine, compressor
	Applied		1.	and its components
		ME2503		Perform testing on different systems
			3.	Analyze effect of different variables on performance of systems.
			1.	Recognize the significance & importance of BIS conventions
	Machine Drawing Lab	ME2523	2.	Identify & draw the proportionate dimensioned free hand
			3.	sketches of various engineering components.  Prepare details & assembly drawing from given detail
			J.	drawings
<del>-</del>	·

	their profession	1

Semester	Course	Course Code	Course Outcome
Semester V		ME3012	Apply the theoretical knowledge to balance the rotary and reciprocating systems
			Identify and investigate the stability of spinning bodies due to the gyroscopic effect
	Dynamics of Machines		Apply different principles to convert the physical vibratory system into a mathematical model
			Identify the effect of external excitation on the system and effect of dampers to control the system vibration
			Recognize the suitable method for minimizing or eliminating the vibration from the system
			1. Identify the customers need, formulate the problem and draw the design specifications.
	Design of Machine Elements	ME3032	<ul><li>2. Design a machine component using theories of failure.</li><li>3. Design a simple machine components like joints, shafts, keys, couplings</li></ul>
			4. Design a spring and power screw
			5. Select a rope and belt drives for given application
		ME3052	<ul> <li>6. Design a component against fluctuating load.</li> <li>1. Apply knowledge of various tools and techniques to determine geometry and dimensions of components in engineering applications.</li> </ul>
	Metrology & Control		2. Design system to meet desire needs within realistic constraints.
	Engineering		3. Analyze and interpret data by using QC tools.
			<ul> <li>4. Explain feedback control system.</li> <li>5. Represent control system mathematically and by using block diagrams and determine their response to various input conditions.</li> </ul>
			Explain fundamental concepts heat transfer
	Heat Transfer	ME3072	2. Analyze heat conduction, convection and radiation phenomenon
			3. Formulate and Solve problems on different modes of heat transfer.
			Design a heat exchanger
			Demonstrate effect of variables such as speed, feed and depth of cut on machining process
	Workshop		Produce given job with proper taper fitting and within dimensional tolerances $\pm$ 0.1 mm on diameter and $\pm$ 0.2 mm on length. (Job A)
	Practice – V	ME3512	Produce bearing diameter on job a maintaining fit H7g6.
			Produce Gear Teeth - Job B on Milling Machine as per specifications.
			Produce Job C to fit Job A with proper threading fitting on Turret.  Prepare process sheet for all Jobs

Dynamics of Machinery Lab  Metrology and Measurement lab	ME3532 ME3552	To identify and investigate the stability of spinning bodies due to gyroscopic effect.  To apply the theoretical knowledge to balance the rotary and reciprocating systems.  To determine natural frequency, damped frequency and resonant frequency of any vibratory system.  To recognize the whirling speed conditions of shaft and methods to eliminate it.  To determine natural frequencies and mode shapes of vibratory system with two degree of freedom.  Use Vernier Caliper, Vernier Height Gauge, and Micrometer, V-block for accurate linear and angular Measurement  Demonstrate and use the tool makers Microscope for the measurement of screw thread terminology  Measure the straightness using Autocollimator  Measurement of screw thread parameter using floating carriage micrometer.
		Conduct Gauge R & R Study.  Use load cell for measurement of Force.  Select suitable tachometer for speed measurement.
Thermal Engineering Lab- II	ME3572	Analyze heat conduction experimentally  Compare heat transfer coefficient in natural as well as forced convection environment.  Determine emissivity and Stefan Boltzmann constant for the case of radiation  Evaluate the performance of heat exchanger.
CAD-Modelling	ME3592	List the different CAD software used for mechanical engineering. Create sketches of machine parts. Model machine parts using CAD software. Assemble machine Parts by using CAD tool. Generate detailed drawing views. Create surface features using surfacing tools.
Comprehensive Exam-III	ME3612	Comprehend the knowledge gained in the course work.     Demonstrate the ability in problem solving.
Aptitude Training-I	SH3032	<ol> <li>Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning problems.</li> <li>Understand usage of basic aptitude terms of percentages, averages, ratios and applications of business aptitude terms of profits and interests</li> <li>Develop a bridge in analogies, series and visualizing directions.</li> <li>Apply various short cuts &amp; techniques to manage speed and accuracy to get equipped for various competitive and campus recruitment exams.</li> </ol>
Summer Internship (4 Weeks)	ME3632	<ol> <li>Verify the Technical knowledge in real industrial situations.</li> <li>Develop interpersonal communication skills</li> <li>Discuss activities and functions of the industry in which the internship has done</li> <li>Write technical report.</li> </ol>
Indian Constitution	SH301 :	Create awareness about law depiction and importance of Constitution

damental Rights and Fundamental Duties of Citizen to instill morality, social values, gnity of life and their social Responsibilities. Vareness of their Surroundings, Society, blems and their suitable solutions while this and duties of the citizen keeping in mind. distribution of powers and functions of Local ment.

and their impact on Economy of the
and t

Semester	Course	<b>Course Code</b>	Course Outcome
Semester VI			1. Design machine components subjected to fluctuating loads
			<b>2.</b> Design gears for various applications
	16 11 70 1	ME3022	<b>3.</b> Apply principles of interaction of materials processing and
	<b>Machine Design</b>		design.
			4. Select rolling contact and sliding contact bearing for given
			machine.
			5. Design machine components subjected to fluctuating loads
			<b>6.</b> Design gears for various applications
			1. Differentiate SI and CI engine and cycles and Calculate the
			design and operating parameters of fuel-supply system
			mixture requirements in engine
			2. Explain the stages of combustion in si and ci engines and
			effect of various operating parameters on combustion
	Engines and		3. Explain methods of measurement of different performance
	Refrigeration	ME3042	parameters and prepare heat balance sheet and identify
	g		alternative fuels and compare different pollution norms
			4. Illustrate and analyze the performance of various the
			refrigeration system.
			5. Plot various refrigeration and air conditioning processes using
			charts and tables.
			Design air-conditioning system for various applications
			Design an -conditioning system for various applications
			7. Apply biological engineering principles, procedures needed to
			solve real-world problems
	Biology for		8. Demonstrate the functions of biological systems
	Engineers	SH302	9. Analyze biological phenomena with math and physics to gain
			important insights
			10. Explain working of different biomedical instruments
			11. Select the sensors for given biological applications  Explain relevant aspect of movement control process
			Explain relevant aspect of movement control process
	Thermal		1. Perform testing on I C Engines and refrigeration and Air
	Engineering Lab-	ME3522	conditioning systems
	III	WILSSEE	2. Analyze effect of different variables on performance of
			systems.
			Test the engine emissions and compare with BS norms.
	Software Training-I ME3542	1. Use software effectively related to design/manufacturing and	
		synthesis of mechanical systems and components.	
			Develop solution for the mechanical engineering problem using
			program/software
			Comprehend the knowledge gained in the course work.
			1. Comprehend the knowledge gained in the course work.

Comprehensive Exam-IV	ME3562	Demonstrate the ability in problem solving.     Acquire the requisite skills to deal with social issues through innovative and sustainable solutions considering technical, safety and environmental issues.     Apply the principles of design and analysis of mechanical systems/processes to solve critical problems.     Translate the design into the product, process, or system, including manufacturing, coding, testing and validation.
		Participate in team work, take responsibilities and develop decision making skills to become effective and creative leaders.  Write technical report and communicate effectively  1. Develop a thorough conceptual understanding and develop a
Aptitude Training-II	SH3042	logical approach towards solving Aptitude and Reasoning Problems  2. Understand usage of aptitude terms of speed, time and distance and permutations, probabilities and applications.  3. Understand blood relations and ways of seating arrangements along with various geometrical figures  4. Apply various short cuts & techniques to manage speed and
		accuracy to get equipped for various competitive and campus recruitment exams.  5. Develop a thorough conceptual understanding and develop a logical approach towards solving Aptitude and Reasoning Problems  Identify and communicate solution to problems (oral, visual, written) effectively.  Device a project within a given time frame.

Semester	Course	Course Code	Course Outcome
Semester VII	Industrial Engineering	ME4013	<ol> <li>Apply various methods of method study and time study to improve productivity.</li> <li>Use value analysis technique in engineering projects.</li> <li>Select the plant location and design appropriate type of layout along with material handling system.</li> <li>Plan production activities using tools like capacity and aggregate planning</li> <li>Design the inventory system using appropriate inventory model</li> <li>Implement project management knowledge, tools and techniques to achieve project success.</li> </ol>
	Industrial Engineering and Quality Control Lab	ME4512	<ol> <li>Perform work and method study at given work station by using suitable industrial engineering tools.</li> <li>Design the work system for the given application</li> <li>Apply inventory management principles for controlling the inventory</li> <li>Conduct process capability analysis</li> <li>Use modern tools and techniques for solving industrial engineering problems.</li> </ol>

Advanced Machining Lab.  Software Training-II	ME4532 ME4552	<ol> <li>Develop CNC program and simulate it on CNC Simulation Software for a given job.</li> <li>Perform Set-up operation for CNC Turning Operations.</li> <li>Produce a job with given specifications on CNC Turning Machine.</li> <li>Perform Set-up operation for CNC Milling Operations.</li> <li>Produce a job with given specifications on CNC Milling Machine.</li> <li>Use simulation and analysis software in Mechanical Engineering.</li> <li>Develop solution for the Mechanical Engineering problems using simulation and analysis software.</li> </ol>
Capstone Project Phase II	ME4732	<ol> <li>Select and apply appropriate design of experiments, experimental set up, models, or simulation technique for project task.</li> <li>Fabricate project or experimental set up, or model and analyze output of models/simulations to provide information for decisions</li> <li>Perform feasibility analysis and uses results to choose candidate solutions and evaluates quality of solutions to select the best one</li> <li>Collaborates with team members of diverse background and perspectives to achieve a common goal.</li> <li>Write technical report and communicate effectively.</li> </ol>
Engineering Acoustics	ME4112	<ol> <li>Determine acoustic parameters in terms of decibel levels for pressure, power, intensity and impedance.</li> <li>Calculate sound levels by applying 1-d wave equation for air-borne and structure borne sound.</li> <li>Estimate absorption coefficient for different acoustic materials.</li> <li>Measure sound levels for mechanical systems and reduce it up to audible range by using suitable method.</li> </ol>
Material Handling Systems	ME4132	<ol> <li>Explain the flow and type of movement of industrial goods</li> <li>Apply general rules for the type of movement, and</li> <li>Identify the appropriate material handling systems to suit the said requirement</li> <li>Explain current trends in material handling.</li> </ol>
Machine Tool Design	ME4152	<ol> <li>Select &amp; design proper transmission system for machine tool</li> <li>Decide layout of machine tool</li> <li>Select proper speed &amp; feed boxes &amp; design the same.</li> <li>Design machine tool structure-Bed, Columns &amp; Housings, Select &amp; Design Guide ways &amp; slide ways, spindle.</li> <li>Determine dynamic characteristics of machine tool &amp; carry stability analysis using FEA</li> <li>Design control systems in machine tools and SPM.</li> </ol>
Process Equipment Design	ME4172	<ol> <li>Apply the role of design engineer in designing procedures of various process equipments.</li> <li>Design important components like flange couplings, heat transfer equipments, Distilation columns, absorber, extractor</li> <li>Develop a heat exchanger data sheet and test the design for safety.</li> </ol>

		1	
			4. Design storage vessels, pressure vessels and various
			parts of vessels to apply key criteria involved in the
			design of internal pressure vessels as per IS Code
			<b>5.</b> Develop relationship between equipment design, safety and environment.
			**
			<ul><li>engineering in various fields.</li><li>2. Discuss the properties of materials and cryogenic fluids</li></ul>
			at low temperature.
	Cryogenics	ME4192	3. Compare cryogenic Liquefaction systems.
	Cryogemes	WIE-172	4. Describe Cryogenic Refrigeration and Measurement
			Systems.
			<b>5.</b> Calculate performance of gas separation systems.
			<b>6.</b> Explain the methods of fluid storage, transfer, insulation
			and vacuum technology in cryogenics.
			1. Summarize energy scenario and the need for energy
	Cogeneration &		conservation.
	Waste Heat	ME4212	2. Illustrate various techniques of waste heat recovery.
	Recovery		3. Describe the various methods of cogeneration.
			4. Explain the various measures for energy conservation
			<ul><li>and financial implications for various thermal utilities.</li><li>1. Explain manufacturing automation.</li></ul>
			<ol> <li>Explain manufacturing automation.</li> <li>Analyse transfer lines for its efficiency and effect of</li> </ol>
	Industrial		break downs
	Automation and	ME4232	3. Analyse automated assembly lines for its efficiency and
	Robotics		effect of defective components
			<b>4.</b> Analyse forward and reverse kinematics of robot.
			5. Perform economic analysis of robot
			1. Select appropriate production and operation strategies
	Production and Operations Management		based on situation
			2. Plan the capacity based on the demand pattern and
			prepare the manufacturing schedule based on the
			production plan.
		ME4252	<b>3.</b> Apply lean tools for manufacturing and services operations.
			4. Implement recent production management trends like
			just in time philosophy and lean manufacturing in
			manufacturing field.
			5. Apply engineering economics principles for managing
			production function.
			Define and use the fundamental terms of vibration in
			design.
	Mechanical		2. Find natural frequencies and mode shapes of 2DOF and
	Vibrations	ME4312	Multi DOF systems.
	, 101 4410113		3. Describe methods of vibration control.
			<b>4.</b> Select instrument and transducers for vibration
			measurement 5. Analyze and interpret vibration data.
ŀ			Analyze and interpret violation data.     Determine stresses and strains in machine component by
			using photelasticity
	Experimental	ME4222	2. Use of coating methods to determine strains and stresses
	Mechanics	ME4332	3. Apply strain gauge technique to determine strains and
			stresses in machine component
			1 Evaloin anotomy of an automative valuals with leastion
	Automobile Engineering		<b>1.</b> Explain anatomy of an automotive vehicle with location of different parts and systems
			2. Expound various configurations of transmission systems
		ME4352	and auxiliary components
	0		3. Compute different performance parameters of an
			automobile

			4. Differentiate between various types of braking system
			with its specific features
			5. Explain various steering and suspension system.
			<b>6.</b> Elucidate working of automotive electronic components
			and electrical systems
			1. Explain energy scenario and necessity of solar energy.
			2. Illustrate basics of solar radiation.
			<b>3.</b> Explain effect of solar energy transmission on various
	Solar Energy	ME4372	structures / surfaces.
			<b>4.</b> Design and compare solar collectors.
			5. Write different application of solar energy
			6. Explain various solar electric conversion systems.
			<b>1.</b> Demonstrate the importance of integration of Mechanical, Electronics, computers and control in the
			design of Mechatronics system.
			2. Describe/identify key elements of sensors and
			transducers and techniques of interfacing with PLC,
			Microprocessor, Microcontroller etc.
	36 3 4		3. Apply a systematic approach to the design process for
	Mechatronics	ME4392	Mechatronics systems. (Concurrent engineering).
	System Design		<b>4.</b> Create system modeling of basic models and analyze.
			5. Demonstrate the practical application of mechatronics
			systems in areas such as manufacturing, automobile
			systems and robotics.
			<b>6.</b> Develop the capacity to think creatively and
			independently about new design problems and
			challenges.
			<ol> <li>Explain concepts of modeling and simulation</li> <li>Develop model frameworks for discrete-event simulation</li> </ol>
			3. Analyze input and output data of simulation model.
	Manufacturing	ME4412	4. Construct software models for manufacturing, logistic
	Simulation	1,12,1112	and material handling problems
			5. Develop Simulation model for a system and verify and
			validate the model.
			1. Estimate natural frequencies and mode shapes of given
			machine component.
	Mechanical	ME4592	2. Find modal parameters of vibratory system.
	Vibrations Lab	ME4592	3. Control the vibration by using principle of DVA.
			4. Use vibration measurement technique for fault diagnosis
			and machinery health monitoring
	Evnovimental		<b>1.</b> Use of transmission polariscope for measurement of stresses in machine components.
	Experimental Mechanics	ME4612	<ul><li>a. Apply reflection polariscope technique for measurement</li></ul>
	Laboratory	MILTUIA	of strain/stress in photoelastic coating.
			3. Use strain gauge technique in various applications.
			Explain the structure of an automobile.
			2. Describe and Design transmission systems of an
-	Automobile		automobile.
	Engineering Lab	ME4632	3. Demonstrate and select different types of an automobile
	Engineering Lan		systems.
			<b>4.</b> Test wheel balancing and wheel alignment.
			5. Model any automobile system/component
			Measure solar radiation using instruments.
	Solar Energy	ME4652	2. Compare solar energy collection systems.
	Lab	ME4652	<ul><li>3. Design the applications of solar energy</li><li>4. Simulate the applications of solar energy</li></ul>
			<ul><li>5. Analyze the performance of PV systems.</li></ul>
	Mechatronics		1. Demonstrate/select proper types of sensors/transducers
	System Lab	ME4672	for given task.
	System Lab	<u> </u>	101 given mon.

			<ol> <li>Design signal conditioning circuits for various signal conditioning processes like signal level change, signal form change, filters, bridge circuits etc.</li> <li>Demonstrate ability of control and automation of simple devices such as motors, cylinders using PLC.</li> <li>Demonstrate the ability to create microcontroller programs and properly interface them to input and output</li> </ol>
	Manufacturing Simulation lab	ME4692	devices.  1. Describe the nature of discrete-event simulation and the types of simulation models.  2. Illustrate the broad applicability of discrete-event simulation to solve basic manufacturing systems problems.  3. Design model considering as per constraints given.  4. Simulate the essential steps of the simulation methodology & interpret the results.
	Condition Monitoring	ME4752	<ol> <li>Apply maintenance schemes in industries.</li> <li>Monitor condition of rotating machinery using signature, temperature and corrosion analysis.</li> <li>Apply oil analysis technique to diagnose the wear debris.</li> <li>Apply modern technologies for effective plant maintenance.</li> </ol>
	Aircraft Conceptual Design	ME4772	<ol> <li>Understand the design process of aircraft and decide the aircraft configuration.</li> <li>Choose type of powerplant as per flight regime.</li> <li>Decide the fuselage layout as per type of aircraft.</li> <li>Design the wing for type of aircraft and its wing loading.</li> <li>Accurately evaluate lift, drag and mass for design synthesis process.</li> <li>Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.</li> </ol>
	Mechanical System Design	ME4792	<ol> <li>Select brake and clutch based on functional requirements of automobile transmission systems.</li> <li>Calculate the stresses induced in pressure vessel subjected to various types of loading</li> <li>Apply design principles and obtain suitable dimensions for IC Engine components.</li> <li>Design the flat belt conveyor systems for suitable applications.</li> <li>Design the machine tool gear box for different speeds and torques at driven shaft.</li> <li>Apply statistical considerations for design.</li> </ol>
	Rotor Dynamics	ME4812	<ol> <li>Model the Rotor bearing systems and formulate the governing equations.</li> <li>Describe the role of damping, stiffness and inertia effects.</li> <li>Compute the critical speeds and stability limits.</li> <li>Analyze the rotors using transfer matrix method.</li> <li>Compute the transient response of rotors.</li> </ol>
	Computational Fluid Dynamics	ME4832	<ol> <li>Derive governing equations for fluid dynamics and heat transfer.</li> <li>Implement different techniques for discretization of governing equations</li> <li>Apply different CFS tools for real field complex problem</li> <li>Select appropriate grid generation methods for CFD analysis</li> <li>Modify the available schemes and methods for multi-physics problem</li> <li>Develop suitable simple numerical model for given application</li> </ol>

Air Conditioning system	ME4852	<ol> <li>Determine cooling load on the system by considering various heat sources</li> <li>Select suitable air distribution method, distribution outlet and inlet, and fan.</li> <li>Select and design the suitable ventilation system for the commercial applications.</li> </ol>
Hybrid & Electrical Vehicles	ME4872	<ol> <li>Understand the need of hybrid vehicles in today's context.</li> <li>Understand working of Electric Vehicles and recent trends.</li> <li>Describe design steps of a hybrid electric vehicle for given requirements.</li> <li>Explain hybrid drive trains.</li> <li>Discuss different Energy sources and drives required for hybrid vehicles.</li> <li>Discuss fuel cell technology for hybrid vehicle application.</li> </ol>
Total Quality Management	ME4892	<ol> <li>Evaluate the principles of quality management and to explain how these principles can be applied within quality management systems.</li> <li>Identify the key aspects of the quality improvement cycle and to select and use appropriate tools and techniques for controlling, improving and measuring quality.</li> <li>Critically appraise the organizational, communication and teamwork requirements for effective quality management.</li> <li>Critically analyze the strategic issues in quality management, including current issues and developments, and to devise and evaluate quality implementation plans.</li> </ol>
Micro-Electro Mechanical System	ME4912	<ol> <li>Explain the micro-fabrication method for MEMS systems</li> <li>Explain the principle behind the operation of MEMS systems.</li> <li>Choose suitable sensors and actuators for given application</li> <li>Analyze the different techniques in MEMS technology</li> <li>Design a MEMS system as per the application</li> </ol>

- Department Name: Mechanical Engineering Department
- PG Program Name: M. Tech Design Engineering
- Vision:

To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers

#### • Mission

- To develop state-of-the-art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.
- To build the competency to transform students into globally competent mechanical engineers by imparting quality education.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices

Sr. No.	Program Outcomes
7.	Independently carry out research /investigation and development work to solve
	practical problems.
8.	Write and present a substantial technical report/document
9.	Demonstrate a degree of mastery over the area as per the specialization of the program.
	The mastery should be at a level higher than the requirements in the appropriate
	bachelor program
10.	Accomplish collaborative and multi-disciplinary scientific research with consideration
	of professional, legal, and ethical issues.
11.	Manage the projects and its financial aspects on the strength of engineering knowledge
	and management principles.
12.	Engage in lifelong learning to address contemporary issues through independent and
	reflective learning.

# **Programme Educational Objective (PEO):**

**PEO1**: - Students will apply knowledge of design engineering to pursue successful career in the field of Mechanical Engineering.

**PEO2**: - Students will become innovators, entrepreneurs to design and develop products and services to address social, technical and business challenges.

**PEO3**: - Students will engross in lifelong learning such as higher studies, research and other continuous professional development activities.

Sr. No.	Semest er	Course Code	Course Name	Course Outcome
1.	I	MDE1014	Advanced Solid Mechanics	<ul> <li>Co:1 Analyze stresses and strains at a point.</li> <li>Co:2 Model and analyze mechanical structures using energy methods.</li> <li>Co:3 Apply different analogies in torsion</li> <li>Co:4 Analyze and determine pressurized cylinders and rotating disks problems under loading.</li> <li>Co:5 Solve the problems in contact stresses.</li> <li>Co:6 Design a component considering plasticity effect</li> </ul>
2.	I	MDE1024	Finite Element Methods	<ul> <li>Co:1 Apply the concept of finite element method for solving machine design problems.</li> <li>Co:2 Formulate and solve manually problems in 1-D structural systems involving bars, trusses, beamsand frames.</li> <li>Co:3 Develop 2-D FE formulations involving triangular, quadrilateral elements and higher order elements.</li> <li>Co:4 Apply the knowledge of FEM for stress analysis, model analysis, heat transfer analysis, flow analysis and nonlinear analysis</li> </ul>
3.	I	MDE1034	Computer Aided Design	Co:1 Describe the principles of CAD systems, the implementation of these principles, and its connections to CAM and CAE systems.  Co:2 Demonstrate 2D, 3D transformations and projection transformations.  Co:3 Describe various approaches of geometric modeling.  Co:4 Represent 2D and 3D entities mathematically
4.	I	MDE1044	Mechanics of Composite Materials (Programme Elective - I)	<ul> <li>Co:1 Student will be able to understand the basic concepts and difference betweencomposite materials with conventional materials.</li> <li>Co:2 Students will be able to understand role of constituent materials in defining theaverage properties and response of composite materials on macroscopic level.</li> <li>Co:3 Students will be able to apply knowledge for finding failure envelopes and stress-strain plots of laminates.</li> <li>Co:4 Students will be able to develop a clear understanding to utilize subject knowledgeusing computer programs to solve problems at structural level.</li> </ul>
5.	I	MDE1054	Design for Manufacturing & Assembly (Programme Elective - I)	Co:1 Recognize the importance of selection of proper manufacturing process and its influence on new product development process and understand the interrelationship between product design and production methods for improving product performance during stage of design itself.  Co:2 Identify the factors contributing reduction in assembly time and understand to incorporate assembly & disassembly guidelines in product design.

				<ul> <li>Co:3 Utilize reliability concepts, failure analysis tools and techniques and accelerated life testmethods for improving product life cycle.</li> <li>Co:4 Understand the factors controlling cost and time required for the product maintenance and utilize this information for design for maintenance.</li> </ul>
6.	I	MDE1064	Experimental Mechanics  (Programme Elective - I)	Co:1 Determine direction and magnitude of principal stresses by using various techniques of Experimental Stress Analysis.  Co:2 Solve two and three dimensional problems of stress-strain analysis in mechanical engineering.  Co:3 Formulate solutions to general image processing problems
7.	I	MDE1074	Reliability Engineering (Programme Elective - I)	<ul> <li>Co:1 Apply the concepts of reliability, common reliability functions, parameters and methodsof their modeling and prediction.</li> <li>Co:2 Identify importance of statistical distributions for modeling failure data, and the physicalmeanings of model parameters.</li> <li>Co:3 Estimate reliability functions and parameters of an item using life testing, Weibull andhazard plotting, stress-stress analysis, and relevant reliability databases.</li> <li>Co:4 Estimate reliability functions and parameters of product/component systems usingreliability block diagram, fault tree and event tree.</li> <li>Co:5 Evaluate maintainability and availability of product/component systems, and different maintenance strategies.</li> </ul>
8.	I	MDE1084	Advanced Engineering Materials (Programme Elective - II)	<ul> <li>Co:1 Analyze the importance of various engineering materials (metals, polymers, ceramics, composites, Semi-conductor).</li> <li>Co:2 Recite polymers, ceramics and composites, their manufacturing techniques, properties and applications.</li> <li>Co:3 Propose appropriate ceramics, glass, plastics and polymers for different applications.</li> <li>Co:4 Understand and apply Electrical, Thermal, Optical and Magnetic Properties ofmetals, ceramics, polymers and composites for various applications.</li> <li>Co:5 Adapt economic considerations in usage and recycling of materials in human use.</li> <li>Co:6 Apply nano materials and nanocomposites for various applications.</li> </ul>
9.	I	MDE1094	Tribology (Programme Elective - II)	<ul> <li>Co:1 Determine tribological parameters of mechanical systems analytically by using suitabletheories of friction and theories of wear.</li> <li>Co:2 Select hydrostatic step bearing for real life application in mechanical engineering basedon axial load applied and lubricant available.</li> <li>Co:3 Calculate the maximum load carrying capacity and pressure equation for hydrodynamicthrust bearing by using engineering principles.</li> <li>Co:4 Evaluate elastohydrodynamic lubrication occurred in gears, cams and rolling elementbearing by using hertz and ertel-grubin equation.</li> </ul>

				Co:5 Estimate pressure distribution in gas lubricated bearings by applying reynolds equationfor gas lubrication within elastic limits.
10.	I	MDE1104	Advanced Mathematical Methods inEngineering (Programme Elective - II)	Co:1 Evaluate Fourier Series and Fourier Transforms for given function and apply it tosolve the partial differential equations in Engineering problems. Co:2 Apply the specific method of solution of partial differential equations for solving the given problems. Co:3 Formulate and solve a boundary value problem (Partial differential equation, boundary. Co:4 Use the relevant method for solving the simultaneous linear equations and compute the Eigen values. Co:5 Estimate numerically the solution of given algebraic equation. Co:6 Analyze the variance and explain the different research designs.
11.	I	MDE1114	Smart Materials (Programme Elective - II)	Co:1 Describe the behaviour and applicability of various smart materials.  Co:2 Demonstrate knowledge of the physicalprinciples underlying the behavior of smart materials.  Co:3 Describe the basic principles and mechanisms of the stimuli-response for the most important smart materials.  Co:4 Design simple models for smart structures & materials.
12.	I	MDE1124	Design Engineering Lab-I	Co:1 Solve 1D, 2D and 3D structural analysisproblems using the ANSYS software Co:2 Evaluate dynamic behavior of components Co:3 Appraise Linear buckling concept in Design of members which are succumbed to buckling Co:4 Solve structural analysis problems subjected to fatigue load. Co:5 Apply geometric and material nonlinearity while designing the components Co:6 Appraise steady state and transient thermal concept in design of members
13.	I	MDE1134	Advanced Stress Analysis Lab	<ul> <li>Co:1 Determine and analyze the stresses and strains in machine component.</li> <li>Co:2 Analyze the stresses and strains on combined bending and torsion.</li> <li>Co:3 Experiment on demonstration of photoelastic techniques.</li> <li>Co:4 Calibration of the photoelastic constant, determination of the stress field in a beam under bending.</li> <li>Co:5 Determine stress and strain fields using DIC</li> </ul>

14.	I	SHP551	Technical Communication	Co:1 Acquire skills required for good oral and written communication. Co:2 Demonstrate improved writing and readingskills. Co:3 Ensure the good quality of oral and written
15.	II	MDE1144	Mechanical Vibrations	Co:1 Derive and interpret equation of motions of multi-degrees of freedom systems. Co:2 Derive and interpret equation of motions of continuous systems. Co:3 Select suitable instrument and transducers for vibration measurement. Co:4 Derive and interpret response of the system subjected to Transient vibrations. Co:5 Analyze the systems with Non-linear vibrations
16.	II	MDE1154	Advanced Design of Mechanisms	Co:1 Deduce the four bar coupler point curves. Co:2 Design mechanism in given application to meet certain motion specifications. Co:3 Synthesize various mechanisms by using geometric method, algebraic methods and complex number method. Co:4 Analyze complex mechanism by using graphical
17.	П	MDE1164	Engineering Acoustics (Programme Elective - III)	methods.  Co:1 Determine acoustic parameters in terms of decibel levels for pressure, power, intensity andimpedance. Co:2 Calculate sound levels by applying 1-D wave equation for air-borne and structure borne sound. Co:3 Estimate absorption coefficient for different acoustic materials. Co:4 Measure sound levels for mechanical systems and reduce it up to audible range by using suitable method.
18.	II	MDE1174	Fracture Mechanics (Programme Elective - III)	Co:1 Explain the mechanism of fracture in ductile and brittle materials Co:2 Explain the micro mechanisms of brittle and ductile fracture Co:3 Analyze the fatigue and fracture behavior of materials. Co:4 Apply the knowledge for failure analysis and case studies Co:5 Estimate crack tip opening displacement (CD) and J-integral.
19.	П	MDE1184	Product Designand Development (Programme Elective - III)	Co:1 Explore and analyze product development processes used in product design and development. Co:2 Identify and apply various product development techniques. Co:3 Analyze, evaluate and apply design consideration like concurrent engineering, aestheticand ergonomical for industrial product design. Co:4 Apply different methods, tools and technique to create new product design for consumer product.

	1		ı	
20.	I	MDE1194	Rapid Manufacturing Techniques (Programme Elective - III)	<ul> <li>Co:1 Identify suitable time compression techniquesfor rapid product development.</li> <li>Co:2 Model complex engineering products and develop process plans for rapid production.</li> <li>Co:3 Analyze and select a rapid manufacturing technology for a given component.</li> <li>Co:4 Identify the errors during generation of STL files and minimize them.</li> <li>Co:5 Optimize FDM process parameters to improve the quality of the parts.</li> </ul>
21.	II	MDE1204	Rotor Dynamics  (Programme Elective - IV)	<ul> <li>Co:1 Model the Rotor bearing systems and formulate the governing equations.</li> <li>Co:2 Describe the role of damping, stiffness and inertia effects.</li> <li>Co:3 Compute the critical speeds and stability limits.</li> <li>Co:4 Analyze the rotors using transfer matrix method</li> <li>Co:5 Compute the transient response of rotors.</li> </ul>
22.	II	MDE1214	Design for Optimization (Programme Elective - IV)	Co:1 Identify and apply mathematical models in optimization method. Co:2 Recognize the suitable method of optimization in non linear programming with and withoutconstraints. Co:3 Apply optimization method for staticapplications like shafts and springs. Co:4 Design dynamic applications like linkage mechanism by using optimization method. Co:5 Use genetic algorithm, ANN and Fuzzy logic to optimize various design parameters.
23.	II	MDE1224	Robotics (Programme Elective - IV)	Co:1 Comprehend basic terminologies and concepts associated with Robotics and Automation Co:2 Demonstrate comprehension of various Robotic sub-systems Co:3 Compute kinematics and dynamics to explain exact working pattern of robot Co:4 Design and select robots for Industrial and Non -Industrial applications
24.	II	MDE1234	Multi-Body Dynamics (Programme Elective - IV)	Co:1 Derive equations of motion for interconnected bodies in multi-body systems with three dimensional motion.  Co:2 Implement and analyze methods of formulating equations of motion for interconnected bodies.  Co:3 Write programs to solve constrained differential equations for analyzing multi-body systems.  Co:4 Simulate and analyze all types of static and dynamic behaviors of the multi-body systems.  Co:5 Lead team projects in academic research or the industry that require modeling and simulation of multi-body systems  Co:6 Demonstrate an improved technical writing and presentation skills.
25.	II	MDE1244	Research Methodology & IPR	Co:1 Formulate a research problem. Co:2 Analyze research related information. Co:3 Prepare and present research proposal/paper by following research ethics. Co:4 Make effective use of computers and computing tools to search information, analyze informationand prepare report

				Co:5 Describe nature and processes involved in development of intellectual property rights
				action meneral property rights
26.	II	MDE1254	Design EngineeringLab-II	<ul> <li>Co:1 Apply basics of MATLAB programming for Engineering applications.</li> <li>Co:2 Compute differentiation of single variable using MATLAB.</li> <li>Co:3 Solve Numerical Integration problems using MATLAB.</li> <li>Co:4 Solve Linear and Non Linear equations using MATLAB.</li> <li>Co:5 Solve Linear Least Square Regression problems using MATLAB.</li> <li>Co:6 Solve Ordinary Differential Equation using MATLAB</li> </ul>
27.	II	MDE1264	Vibration and Acoustics Laboratory	Co:1 Estimate natural frequency, damping factor, modal density of given component experimentally Co:2 Extract experimental mode shapes of plates Co:3 Predict fault of machine by vibration and sound measurement
28.	II	MDE1274	Mini Project	Co:1 Identify structural engineering problems reviewing available literature. Co:2 Study different techniques used to analyze complex structural systems. Co:3 Work on the solutions given and present solutionby using his/her technique applying engineering principles
29.	II	MDE1284	Seminar	Co:1 Survey the literature such as books, national/international refereed journals and contact resource persons for the selected topic of Seminar. Co:2 Learn to write technical reports. Co:3 Develop oral and written communication skillsto present and defend their work in front of Department Post Graduate Committee.
30.	III	MDE2014	Industry Internship	Co:1 Identify the real applications and practices of courses studied, at industry level Co:2 Recognize various modeling, analysis andvalidation techniques adopted at industries Co:3 Demonstrate the issues at design, manufacturing and assembly level Co:4 Summarize and present technical data in report format
31.	III	MOE2010	Artificial Intelligence – Machine Learning	Co:1 Describe central machine learning methods and techniques and how they relate to artificial intelligence Co:2 Differentiate between supervised and unsupervised learning techniques Co:3 Apply the ML algorithms to a real-world problem Co:4 Optimize the models learned and report on the expected accuracy that can beachieved by applying the models. Co:5 Evaluate a given problem and applyappropriate machine learning technique
32.	III	MOE2020	Creative Thinking: Tools& Techniques	Co:1 Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios Co:2 Apply different brainstorming techniques in group activities

	<u> </u>		T	Co.2 Down-Grient's discoultred Cd. Cd. 1:
				Co:3 Be proficient in the application of the 6 thinking hats tool in different life scenarios
				Co:4 Develop a systematic approach to idea generation through the use of morphological analysis Co:5 Innovate on an existing product, service or
				situation applying the SCAMPER method Co:6 Get confident with the theory of inventive problem
				solving, called TRI
				Co:7 Select and apply the appropriate technique based on the opportunity to seize or the problem to tackle
33.	III	MOE2030	MOOC Course	Co:1 Identify the real application and practices of the courses studied, at the industry level. Co:2 Recognize various modeling analysis and validation techniques adopted at industries.
				Co:3 Demonstrate the issue at design,manufacturing and assembly level
34.	III	MOE2040	Condition Monitoring and Signal Processing	<ul> <li>Co:1 Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.</li> <li>Co:2 Analyze for machinery condition monitoring and explain how this compliments monitoring the condition</li> <li>Co:3 Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenanceexpenditure.</li> <li>Co:4 Emphasizes on case studies that require gathering information using the moderntesting equipment and processing it to identify the malfunction in that system.</li> <li>Co:5 Identify vibration measurement, lubrication oil analysis.</li> </ul>
35.	Ш	MOE2050	Aircraft Conceptual Design	<ul> <li>Co:1 Understand the design process of aircraft and decide the aircraft configuration.</li> <li>Co:2 Choose type of power plant as per flight regime.</li> <li>Co:3 Decide the fuselage layout as per type of aircraft.</li> <li>Co:4 Design the wing for type of aircraft andits wing loading.</li> <li>Co:5 Accurately evaluate lift, drag and massfor design synthesis process.</li> <li>Co:6 Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.</li> </ul>
36.	III	MDE2024	DissertationStage- I	Co:1 Explain the contributions of various researchers in the field of design engg after carrying out literature survey from reputed journals Co:2 Recognize the gap in the research and define a problem statement Co:3 Explain significance and applicability of problem statement Co:4 Summarize and present technical data in report format
37.	III	MDE2034	DissertationStage- II	Co:1 Outline the work plan for problem statement Co:2 Identify the proper modelling and analysis tool Co:3 Reproduce the preliminary results of problem statement Co:4 Summarize and present technical data in report format

38.	IV	MDE2044	DissertationStage- III	Co:1 Explain the issues related to method adopted in solving the problem Co:2 Select proper technique in solving the problem Co:3 Compare the results with available literature
39.	IV	MDE2054	DissertationStage- IV	Co:1 Design new methodology to address the problem Co:2 Justify the results obtained from new methodology Co:3 Write technical report and defend work

#### **Department Name :- Mechanical Engineering**

## PG Program Name:-Mechanical Manufacturing Engg.

#### Vision:

To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers

#### Mission

- To develop state-of-the-art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.
- To build the competency to transform students into globally competent mechanical engineers y imparting quality education.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices

Sr. No.	Program Outcomes
1.	An ability to independently carry out research /investigation and development work to solve practical problems
2.	An ability to write and present a substantial technical report/document
3.	Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program
4.	To accomplish collaborative and multi-disciplinary scientific research with consideration of professional, legal, and ethical issues.
5.	Manage the projects and its financial aspects on the strength of engineering knowledge and management principles.
6.	Engage in lifelong learning to address contemporary issues through independent and reflective learning.

### Programme Educational Objectives for the M. Tech Mechanical Manufacturing Engg.

**PEO1: -** Graduates will apply knowledge of manufacturing engineering to design, model, simulate and solve problems to develop most efficient manufacturing systems to pursuesuccessful career in the field of Mechanical Engineering.

**PEO2:** - Graduates will have technical competency in thermal engineering or related areas to become innovators, academicians and provide services to address technical, business and social challenges

**PEO3: -** Graduates will engage in lifelong learning such as higher studies, research and other continuous professional development activities.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	SHP5131	Advanced Mathematical Methods in Engineering	Co:1 Evaluate Fourier series for given function and apply it to solve the partial differential equations in Engineering problems.

				Co:2Apply the specific method of solution of partial differential equations for solving thegiven problems Co:3Formulate and solve a boundary value problem(Partial differential equation, boundary and initial conditions). Co:4Use the relevant method for solving the simultaneous linear equations and compute theEigen values. Co:5Estimate numerically the solution of given algebraic equation. Co:6Analyze the variance and explain the
2.	I	MMF101	AdditiveManufacturing for Industry 4.0	different research designs.  Co:1 Describe the Importance of AM technologies in Manufacturing  Co:2 Classify and select additive manufacturing processes for a given application.  Co:3 Design for manufacture for AM and carry out Process Analysis  Co:4 Point out the software issues addressed in the additive manufacturing process.  Co:5 Identify the Different methods for Post-processing of AM parts  Co:6 Suggest the Applications of AM in Automobile, Aerospace, and Bio-medical etc
3.	I	MMF102	Industrial Process Automation Systems	Co:1 Select appropriate automation technologies for process control system. Co:2 Design industrial process automation as per specifications of the customers Co:3 Analyze system performance.
4.	I	MMF1031	Advanced System components & Integration ( Programme Elective – I )	Co:1 Identify hardware and software issues for system integration in process and manufacturing automation and be able to offer solutions.  Co:2 Use engineering software tools such as VB & C++, .NET, NetDDE, OPC (including COM & DCOM), web services, HMI, DLLs and APIs.  Co:3 Specify hardware and software components and functions of advanced systems such as robotics and vision, automated work cells, flexible manufacturing systems, and computer integrated manufacturing as related to plant wide automated system integration and IIoT.  Co:4 Implementation of Fuzzy Logic and Neural Network Control Systems, and identify advantages, and disadvantages of such controllers.  Co:5 Select state-of-the art advanced sensors and actuators for process and manufacturing automation systems.  Co:6 Describe and apply wireless standards and applications used in industrial

	T	T		
				automation projects. Co:7 Apply process and machine safety standards in the design, integration and maintenance of process automation systems.
5.	I	MMF1041	Mechatronics System Design for Manufacturing ( Programme Elective – I )	Co:1 Demonstrate the method and importance of integration of Mechanical, Electronics andControl in the design of mechatronics system.  Co:2 Select key elements of sensors and transducers and interfacing the same with problem under consideration through PLC.
6.	I	MMF1051	IndustrialNetwork & Controllers ( Programme Elective – I )	Co:1 Design Industrial Networking architecture. Co:2 Select networking technologies for industrial automation applications. Co:3 Follow I/O bus installation and wiring connections guidelines for setting up industrialnetworks. Co:4 Design, configure, and program fieldbus networks. Program the communication among industrial automation controllers.
7.	I	MMF106	Metal Cutting& Tool Design ( Programme Elective – I )	Co:1 Analyze fundamental phenomena in metal cutting and grinding, through application of theprinciples of mechanics, materials, and allied engineering fields.  Co:2 Develop quantitative and qualitative skills necessary to address practical issues pertainingto machining productivity and innovation and machine stability.  Co:3 Design of press tools for given component.
8.	I	MMF107	Applied Data Analytics ( Programme Elective – I )	Co:1 Explain need of Data analytics in real time application.  Co:2 Apply ANOVA to the given data set.  Co:3 Apply machine learning to the given data set.  Co:4 Explain and apply different supervised learning techniques.
9.	I	MMF108	AdvancedManufacturing Technology ( Programme Elective – I )	Co:1 Select appropriate process for manufacturing products. Co:2 Have appropriate degree of competency in the evaluation of various manufacturing technologies and their applications in modern manufacturing processes.
10.	I	MMF109	Finite ElementMethods in Manufacturing ( Programme Elective – I )	Co:1 Apply finite element method to solve problems in solid mechanics. Co:2 Formulate FE characteristic equations for two dimensional elements and analyze plainstress, plain strain, axisymmetric and plate bending problems. Co:3 Apply principles of FEM to solve heat transfer and fluid mechanics problems. Co:4 Analyze deformation processes using

				finite element principles
				• •
				casting.
				Co:2 Select the proper advanced casting
			Solidification Processes	method.
11.	I	MMF1101	( Programme Elective – II	Co:3 Develop plastic shaping process for
11.	1	1,11,11	(Trogramme Elective II	new product.
			,	Co:4 Select suitable manufacturing method
				for glass & rubber products.
				Co:5 Use appropriate welding technique as
				per application.
				Co:1 Design, model & tune digital PID
12.	I	MMF1111	DigitalProcess Control	controllers.
12.	1	IVIIVII IIII	( Programme Elective – II )	Co:2 Analyze system variables using
				MATLAB/SIMULINK.
			Machine	Co:1 Demonstrate image processing
13.	I	MMF1121	Vision & Applications	techniques. Co:2 Identify various stages in applying the
			( Programme Elective – II )	technique.
				Co:1 Design MEMS device using basic planer
			AdvancedMEMS	& non-planer micro fabrication method.
14.	I	MMF1131	Fabrication & Microfluidics	Co:2 Demonstrate use of various methods &
				techniques for microfluidics actuation
				control.
				Co:1 Select the surface preparation methods
				suitable for different substrate materials.
				Co:2 Describe suitable method for testing
				&evaluation of metallic coatings.
				Co:3 Explain importance of specific coatings &
				its applications on specific Engineering
15.	I	MMF114	Industrial	Components.
13.	_		Surface Engineering	_
				Co:4 Explain the effect of process parameters
				on the properties & microstructure of The
				Surface coating processes.
				Co:5 Describe the importance & role of surface
				modifications to achieve several
				Technological Properties.
				Co:1 Explain Manufacturing methods of
				composites.
1.6	T	MMD115	Composite Materials &	Co:2 Discuss the nature of various forms of
16.	I	MMF115	Processing	composite reinforcement and matrix.
				Co:3 Select an appropriate processing method
				for variety of composite and products.
				Co:1 Develop/ select appropriate orientation
				of the casting & parting plane.
17.	I	MMF1161	SoftwareProficiency-I	Co:2 Calculate modulus of the casting &
17.	1	1411411-1101	Softwarer foliciticy-i	number of cavities in the mould.
				Co:3 Calculation of riser & gating system
				design.
				Co:1 Demonstrate the broad applicability of discrete-event simulation to solve complex
18.	Ι	I MMF1171	Manufacturing Simulation Lab	manufacturing systems problems
				Co:2 apply the essential steps of the simulation
				methodology
		•	1	

				Co:3 Learn to use the WITNESS 13/Arena
				Simulation Software Tool to build credible
				valid simulation models, design and run
				simulation experiments, and critically
				evaluate decision- support simulation
				results. Co:4 Learn analytical techniques for
				interpreting input data and output results
				pertinent to simulation models.
				Co:5 Gain insight into system behavior by
				measuring the performance characteristics of
				proposednew manufacturing system or the
				impact of proposed changes for existing
				Co:1 Acquire skills required for good oral and
				written communication
19.	I	SHP5511	TechnicalCommunication	Co:2 Demonstrate improved writing and
				reading skills
				Co:3 Ensure the good quality of oral and
				written communication Co:1 Evaluate the different mechanical
				configurations available for a modern
				industrial robot.
				Co:2 Analyze complex robot kinematic theory
		II MMF201	Robotic &Automation	and devise kinematic calculations for a given
20.	11			case study.
20.	11			Co:3 Program an industrial robot off-line using
				kinematic simulation software to performa
				specified task.
				Co:4 Appraise the impact of automation, both economic and social, on modern industryand
				future applications in industry.
				Co:1 Explain Six Sigma Methodology
				Co:2 Generate process capability indices
21.	II	MMF202	Loon Siv Sigmo	Co:3 Perform ANOVA
21.	11		Lean Six Sigma	Co:4 Perform regression analysis
				Co:5 Design experiments
				Co:6 Perform measurement system analysis
			Material	Co:1 Interpret various materials characterization techniques.
		II MMF2031	Characterization & Failure Analysis ( Programme Elective – III )	Co:2 Select the characterization tool for specific
22.	l II			application
				Co:3 Analyze the characterization results by
				various equipment
			System Modelling &	Co:1 Model any system from different fields.
22	11	MME2041	Simulation	Co:2 Implement numerical algorithm to meet
23.	II	MMF2041	( Programme Elective – III	simple requirements, expressed in English Co:3 Discuss the simulation methods and select
			)	the suitable technique on the problems.
				Co:1 Demonstrate the key practical theory
				with the operation principles of polymer
24.				processing technologies and their potential
				limitations.
			Polymer Processing & Die	Co:2 Select and justify appropriate
	II	MMF205	Design H	processing technologies for specific
	11		( Programme Elective – III	applications.  Co:3 Demonstrate the constructional
			,	features and working of basic elements in
				injectionmolds, extrusion and blow
				molding dies
		<u> </u>		Co:4 Design the mold for optimum
	•	•	•	

				performance
				Co:1 Understand & explain the concept of
25.	II	MMF206	ProductLife cycle Management ( Programme Elective – III )	PLM, set PLM Vision and Prepare PLM Strategy.  Co:2 Plan for Integrated Product Development Process.  Co:3 Plan for Collaborative Product Development Process.  Co:4 Perform Product Structure Modelling with relationships between different components of the product and their versions.  Co:5 Create Product Data & Manage it
				Co:6 Implement Digital Manufacturing Technique.  Co:1 Explain the basics of coordinate
26.	п	MMF207	Metrology 4.0 ( Programme Elective – III )	metrology as well as the application of the methods ofmechanical (tactile) and non-contact probing in 3D coordinate metrology.  Co:2 Demonstrate the concept of reverse engineering  Co:3 Use software to generate data for analysis
27.	Π	MMF2081	SustainableManufacturing Processes ( Programme Elective – IV )	Co:1 Understand the three pillars of sustainability and how they are manifested in sustainablemanufacturing. Co:2 Incorporate economic, environmental, and social aspects into decision making processesusing multi-criteria decision- making methods. Co:3 Identify the link between manufacturing process models and sustainable manufacturingmetrics for product and process improvement Co:4 Identify manufacturing system level sustainability issues and how they are linked withmanufacturing process level issues.
28.	II	MMF2091	Logistic &Supply Chain Management ( Programme Elective – IV )	Co:1 Discuss and describe the key issues in SCM and logistic network. Co:2 Demonstrate Bullwhip effect in SCM and Develop physical distribution strategies Co:3 Decide the location of warehouses and develop various inventory models based on riskand uncertainty.
29.	II	MMF210	Project Management for Industry4.0 ( Programme Elective – IV )	Co:1 Discuss Project Management relevance in the context of IND4.0  Co:2 Evaluate the needs of an organization regarding IND 4.0, taking into account maturity /readiness models (Evaluate)  Co:3 Plan, develop and manage projects in the context of IND 4.0, using frameworks of projectmanagement, such as PMI, IPMA and Agile/Lean.  Co:4 Support team decision making processes in accordance with the contingencies and

				uncertain environments of IND 4.0.
				Co:1 Explain the concept of design for Quality
				Co:2 Analyze the process and capability using
			Quality and Reliability	various methods
30.	II	MMF211	( Programme Elective – IV	Co:3 Determine Process and measurement
			)	Systems Capability
				Co:4 Carry out reliability data analysis.
				Co:5 Apply various reliability prediction and
				evolution methods.
				Co:1 Identify and apply mathematical
				models in optimization method.
				Co:2 Recognize the suitable method of optimization in non-linear programming
			Optimization	with and withoutconstraints.
			Techniques & Industrial	Co:3 Apply optimization method for static
31.	II	MMF212	Applications	applications like shafts and springs.
			( Programme Elective – IV	Co:4 Design dynamic applications like
			)	linkage mechanism by using optimization
				method
				Co:5 Use genetic algorithm, ANN and Fuzzy
				logic to optimize various manufacturing
		1		systems Co:1 Formulate research
		MMF2131	Research Methodology & IPR	
				Co:2 Analyze research related information
				Co:3 Prepare and present research
22	**			proposal/paper by following research ethics
32.	II			Co:4 Make effective use of computers and
				computing tools to search information,
				analyzeinformation and prepare report.
				Co:5 Describe nature and processes involved
				in development of intellectual property
				Co:1 Develop sketches using suitable CAD
				software.
				Co:2 Develop part models using suitable
				CAD software.
33.	II	MMF2141	CAM Lab.	Co:3 Develop Assembly model using suitable
				CAD software.
				Co:4 Develop 2D drawings using suitable
				CAD software.
				Co:5 Generate tool path and part program for
				plain milling operation.
				Co:1 Develop/ select appropriate model
				required for simulation.
34.	II	MMF2151	Software	Co:2 Apply proper constraints and boundary
	п		Proficiency-II	conditions.
				Co:3 Select suitable solver settings of
				simulation software.
				Co:1 Identify structural engineering problems
				reviewing available literature.
35.	II	MMF2161	Mini Project	Co:2 Study different techniques used to
	11		MMF2161 Mini Project	analyze complex structural systems.
				Co:3 Work on the solutions given and present
				solution by using his/her technique

		1	1	<u> </u>
36.	Ш	MMF3011	Industry Internship	Co:1 Identify the real applications and practices of courses studied, at industry level Co:2 Recognize various modeling, analysis and validation techniques adopted at industries Co:3 Demonstrate the issues at design, manufacturing and assembly levels Co:4 Summarize and present technical data in report format.
37.	III	MOE2010	Artificial Intelligence – Machine Learning	Co:6 Describe central machine learning methods and techniques and how they relate to artificial intelligence Co:7 Differentiate between supervised and unsupervised learning techniques Co:8 Apply the ML algorithms to a realworld problem Co:9 Optimize the models learned and report on the expected accuracy that can beachieved by applying the models. Evaluate a given problem and applyappropriate machine learning technique
38.	Ш	MOE2020	Creative Thinking: Tools& Techniques	Co:8 Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios Co:9 Apply different brainstorming techniques in group activities Co:10 Be proficient in the application of the 6 thinking hats tool in different life scenarios Co:11 Develop a systematic approach to idea generation through the use of morphological analysis Co:12 Innovate on an existing product, service or situation applying the SCAMPER method Co:13 Get confident with the theory of inventiveproblem solving, called TRIZ Select and apply the appropriatetechnique based on the opportunity to seize or the problem to tackle
39.	Ш	MOE2030	MOOC Course	Co:4 Identify the real application and practices of the courses studied, at the industry level.  Co:5 Recognize various modeling ,analysis andvalidation techniques adopted at industries.  Demonstrate the issue at design,manufacturing and assembly level
40.	III	MOE2040	Condition Monitoring and Signal Processing	Co:6 Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.  Co:7 Analyze for machinery condition monitoring and explain how this compliments monitoring the condition  Co:8 Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenance expenditure.  Co:9 Emphasizes on case studies that require gathering information using the modern testing equipment and processing it to

				identify the malfunction in that system.
				Identify vibration measurement, lubrication oil
				analysis.
41.	III	MOE2050	Aircraft Conceptual Design	Co:7 Understand the design process of aircraft and decide the aircraft configuration.  Co:8 Choose type of power plant as per flight regime.  Co:9 Decide the fuselage layout as per type of aircraft.  Co:10 Design the wing for type of aircraft andits wing loading.  Co:11 Accurately evaluate lift, drag and mass for design synthesis process.  Co:4 Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.
42.	Ш	MMF3031	Dissertation Phase-I	Co:1 contributions of various researchers in the field of design engg after carrying out literature survey from reputed journals Co:2 Recognize the gap in the research and define a problem statement Co:3 Explain significance and applicability of problem statement Co:4 Summarize and present technical data in report format.
43.	III	MMF3041	Dissertation Phase-II	Co:1 Outline the work plan for problem statement Co:2 Identify the proper modeling and analysis tool Co:3 Reproduce the preliminary results of problem statement Co:4 Summarize and present technical
44.	IV	MMF4011	Dissertation Phase-III	Co:1 Explain the issues related to method adopted in solving the problem Co:2 Select proper technique in solving the problem
45.	IV	MMF4021	Dissertation Viva-Voce	Co:1 Design new methodology to address the problem Co:2 Justify the results obtained from new methodology Co:3 Write the project report

### **Department Name :-Mechanical Engineering**

# • PG Program Name :-Mechanical Thermal Engineering

#### Vision:

To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent, innovative and entrepreneurial Mechanical Engineers

### Mission

- To develop state-of-the-art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.
- To build the competency to transform students into globally competent mechanical engineers by imparting quality education.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices

Sr. No.	Program Outcomes
1.	To independently carry out research /investigation and development work to solve practical problems
2.	To write and present a substantial technical report/document
3.	To demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than therequirements in the appropriate bachelor program.
4.	To accomplish collaborative and multi-disciplinary scientific research with consideration of professional, legal, and ethical issues.
5.	To Manage the projects and its financial aspects on the strength of engineering knowledge and management principles.
6.	To Engage in lifelong learning to address contemporary issues through independent and reflective learning.

**Programme Educational Objectives for the M. Tech Mechanical Thermal Engineering PEO1: -** Graduates will apply concepts of thermal engineering to design, model, simulate and solve problems to develop energy efficient systems to pursue successful career in the field of Mechanical Engineering and allied sciences.

**PEO2:** - Graduates will have technical competency in thermal engineering or related areas to become innovators, academicians and provide services to address technical, business and social challenges.

**PEO3: -** Graduates will involve in lifelong learning such as higher studies, research to maintain professionalism and ethical standards.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	SHP5131	Advanced Mathematical Methods in Engineering	<ul> <li>Co:1 Evaluate Fourier series for given function and apply it to solve the partialdifferential equations in Engineeringproblems.</li> <li>Co:2 Apply the specific method of solution of partial differential equations for solvingthe given problems</li> <li>Co:3 Formulate and solve a boundary value problem (Partial differential equation, boundary and initial conditions).</li> <li>Co:4 Use the relevant method for solving the simultaneous linear equations and compute the Eigen values.</li> <li>Co:5 Estimate numerically the solution of given algebraic equation.</li> <li>Co:6 Analyze the variance and explain the different research designs.</li> </ul>
2.	I	MTE1011	Classical and Statistical Thermodynamics	<ul> <li>Co:1 Explain different behavior of gases and thermodynamic relations</li> <li>Co:2 Interpret thermodynamics propertyrelations to various mixtures and solutions.</li> <li>Co:3 Compare thermodynamics equilibrium of system</li> <li>Co:4 Explain the kinetic theory of gases.</li> <li>Co:5 Apply the principle of statisticalthermodynamics to the various processes.</li> <li>Co:6 Develop and analyze the various thermodynamic cycles.</li> </ul>

3.	Ι	MTE1022	Principles of Heat Transfer	Co:1 Analyze heat conduction and Radiation Co:2 Develop a solution to heat convection toexternal laminar flow Co:3 Formulate heat convection to internallaminar flow. Co:4 Examine heat convection in turbulentflow Co:5 Interpret convection with phase change Co:6 Solve heat transfer problem numerically
4.	I	MTE1031	Advanced Fluid Mechanics	Co:1 Explain basic concepts in the fluid mechanics. Co:2 Analyze practical problems of fluid flow. Co:3 Explain concepts of boundary layertheory. Co:4 Evaluate the performance of fluid flowdevices in laminar and turbulent flows. Co:5 Apply the concepts in the analysis offluid flow problems.
5.	I	MTE1041	Design of Pumps, Compressor and Blower	Co:1 Select suitable pump, blower, fan and compressor for a given application. Co:2 Design pump, blower, fan or compressorfor a given application. Co:3 Analyze the performance of compressorand pump Co:4 Model and simulate pump, blower, fanand compressor.
6.	I	MTE1051	Gas turbine andJet Propulsion	<ul> <li>Co:1 Describe the ideal and real thermodynamic cycles of air-breathing engines and Industrial gas turbines.</li> <li>Co:2 Design the blading, study the velocity triangles and estimate the performance of centrifugal and axial flow compressors.</li> <li>Co:3 Explain the combustion process and design the combustion chamber of a gas turbine.</li> <li>Co:4 Design the blading, study the velocity triangles and estimate the performance of axial and radial inflow turbines.</li> <li>Co:5 Analyze off-design performance andmatching of the components of a gas turbine.</li> </ul>
7.	I	MET1061	Finite Element Method for Thermal Engineering (Program Elective-I)	<ul> <li>Co:1 Establish the mathematical model for the complex analysis problems and predict the nature of the solution.</li> <li>Co:2 Formulate element characteristic matrices and vectors.</li> <li>Co:3 Identify the boundary conditions and their incorporation into FE equation</li> <li>Co:4 Analyze simple geometry problems for Thermal and stress analysis.</li> <li>Co:5 Interpret the analysis results for the improvement or modification of the system.</li> </ul>

	<u> </u>	1		
8.	I	MTE1071	Hybrid & Electric Vehicles(Program Elective-I)	<ul> <li>Co:1 Select suitable drive scheme fordeveloping an electric hybrid vehicle.</li> <li>Co:2 Design and develop basic schemes of electric vehicles and hybrid electric vehicles.</li> <li>Co:3 Choose proper energy storage systems, electric machine and drive train for vehicle applications.</li> <li>Co:4 Analyze various communication protocolsand technologies used in vehicle networks.</li> </ul>
9.	I	MTE1081	Materials for Thermal System (Program Elective- II)	Co:1 Select suitable material for thermal systems Co:2 Justify use and suitability of thermalmaterials for different systems Co:3 Compose advanced materials for different application Co:4 Explain applications of thermal materials
10.	I	MTE1091	Solar Energy (Program Elective-II)	Co:1 Estimate and quantify available solarradiation Co:2 Design the components of solar energysystems. Co:3 Justify economics of the solar energysystems
11.	I	MTE1101	Power Plant Engineering Elective-II)	Co:1 Explain analytical and technological aspects of power plant design, systems and their effects. Co:2 Analyze and explain various power plants. Co:3 Summarize advanced power cycles. Co:4 Recognize environmental issues. Co:5 Estimate economics of power plants.
12.	I	MTE1111	Modeling Lab	Co:1 Model the components of thermal systemusing suitable software. Co:2 Create computational domain for selected geometry. Co:3 Generate mesh and refine mesh elements of given geometry.
13.	I	MTE1121	Thermal Engineering Lab-I	Co:1 Conduct test and interpret the theoretical and experimental data of conduction and convection experiments.  Co:2 Relate the theory and the experimentation pertaining to thermal system.  Co:3 Examine various thermal systems
14.	I	MTE1131	Computational Methods in Thermal Engineering Lab	Co:1 Develop codes for numerical methods totackle simple thermal problems Co:2 Simulate codes of computational methodsof given conditions Co:3 Analyze and validate output of writtencodes with analytical solution.

15.	I	SHP551	Technical Communication	Co:1 Acquire skills required for good oral andwritten communication Co:2 Demonstrate improved writing andreading skills Co:3 Ensure the good quality of oral andwritten communication
16.	II	MTE2011	Computational Fluid Dynamics	Co:1 Derive governing equations for fluid dynamics and heat transfer. Co:2 Develop finite difference algorithms forfluid flow and heat transfer problems. Co:3 Develop finite volume algorithms forfluid dynamics equations. Co:4 Select appropriate grid generationmethods for CFD analysis. Co:5 Apply different CFD Techniques tovarious fluid flow problems
17.	II	MTE2021	Design and Analysis of Thermal System	Co:1 Illustrate basic principles of modeling and optimization of design of thermal systems. Co:2 Design thermal systems. Co:3 Analyze thermal system.
18.	II	MTE2031	Design of Heat Transfer Equipment (Program Elective III)	Co:1 Select suitable heat exchanger forparticular application. Co:2 Design of heat exchanger. Co:3 Design and analyse boiler furnace. Co:4 Analyse different heat transfer equipments.
19.	II	MTE2041	Cryogenics Engineering (Program Elective III)	Co:1 Apply the basic principles of low temperature engineering. Co:2 Explain the behavior of solids and liquidat low temperatures Co:3 Analyze cryogenic systems. Co:4 Discuss gas separation systems. Co:5 Design Heat Exchangers for CryogenicSystem.
20.	II	MTE2051	Food Processing, Preservation and Transport (Program Elective III)	Co:1 Analyze mechanism of food spoilage Co:2 Design suitable food processing and preservation system Co:3 Select suitable cold storage system Co:4 Design and analysis transport system of preserved foods Co:5 Model the preservation system
21.	II	MTE2061	Battery Thermal Management System (Program Elective III)	Co:1 Illustrate major functions and parts of a battery-management system. Co:2 Design various configurations of batterypack and recent trends in battery pack. Co:3 Compute stored energy in a battery pack. Co:4 Measure and control current, temperatureand isolation in battery-management system

22.	II	MTE2071	Heating Ventilation Air Conditioning andRefrigeration Systems (Program Elective IV)	<ul> <li>Co:1 Explain different vapor compressionrefrigeration system and refrigerants.</li> <li>Co:2 Design of cooling and heating components of refrigeration system</li> <li>Co:3 Explain fundamentals of air conditioning and estimate cooling load on the building by considering various heat sources</li> <li>Co:4 Illustrate various air conditioning systems.</li> <li>Co:5 Design ducting systems and select air distribution system.</li> <li>Co:6 Explain air handling units in various applications.</li> </ul>
23.	II	MTE2081	Energy Audit and Management (Program Elective IV)	<ul> <li>Co:1 Summarize energy scenario and the needfor energy conservation.</li> <li>Co:2 Conduct energy audit of a system</li> <li>Co:3 Illustrate various techniques of waste heat recovery and cogeneration.</li> <li>Co:4 Explain the various measures for energy conservation and financial implications for various thermal utilities.</li> </ul>
24.	II	MTE2091	Cogeneration and Waste Heat Management (Program Elective IV)	Co:1 Estimate and quantify available wasteheat Co:2 Explore different waste heat recoverysystems Co:3 Explain economics of cogeneration andwaste heat recovery systems Co:4 Illustrate different cogenerationtechniques.
25.	II	MTE2101	Advanced Thermal StorageTechnology (Program Elective IV)	Co:1 Select thermal storage systems and thestorage materials Co:2 Develop a model and analyze the thermalstorage systems Co:3 Explain applications of thermal storagesystems
26.	II	MTE2111	Research Methodology & IPR	<ul> <li>Co:1 Formulate a research problem.</li> <li>Co:2 Analyze research related information.</li> <li>Co:3 Prepare and present research proposal/paper by following research ethics.</li> <li>Co:4 Make effective use of computers and computing tools to search information, analyze information and prepare report.</li> <li>Co:5 Describe nature and processes involved in development of intellectual property rights</li> </ul>
27.	II	MTE2121	Computational Fluid Dynamics Lab	<ul> <li>Co:1 Formulate problems in fluid flow and heattransfer.</li> <li>Co:2 Apply initial and boundary conditions tosolve heat transfer problems.</li> <li>Co:3 Use ANSYS-Fluent for solving real life engineering problems</li> </ul>
28.	II	MTE2131	Thermal Engineering Lab-II	Co:1 Evaluate COP of different refrigerationsystems. Co:2 Estimate cooling load needed for givenspace. Co:3 Design a refrigeration and air conditioning system for given application. Co:4 Calculate efficiency and effectiveness of different types of heat exchangers.

29.	II	MTE2141	Mini Project	Co:1 Solve a live problem using software/analytical/Experimental / computational tools. Co:2 Write technical reports. Co:3 Develop skills to present the findings.
30.	Ш	MTE3011	Industry Internship	Co:1 Identify the real applications and practices of courses studied, at industry level Co:2 Recognize various modeling, analysis and validation techniques adopted at industries. Co:3 Demonstrate the issues at design, manufacturing and assembly levels. Co:4 Summarize and present technical data in report format.
31.	III	MOE2010	Artificial Intelligence – Machine Learning	Co:10 Describe central machine learning methods and techniques and how they relate to artificial intelligence Co:11 Differentiate between supervised and unsupervised learning techniques Co:12 Apply the ML algorithms to a real-world problem Co:13 Optimize the models learned and report on the expected accuracy that can beachieved by applying the models. Co:14 Evaluate a given problem and applyappropriate machine learning technique
32.	III	MOE2020	Creative Thinking: Tools& Techniques	<ul> <li>Co:14 Comprehend importance in tackling global challenges as well as in everyday problem-solving scenarios</li> <li>Co:15 Apply different brainstorming techniques in group activities</li> <li>Co:16 Be proficient in the application of the 6 thinking hats tool in different life scenarios</li> <li>Co:17 Develop a systematic approach to idea generation through the use of morphological analysis</li> <li>Co:18 Innovate on an existing product, service or situation applying the SCAMPER method</li> <li>Co:19 Get confident with the theory of inventive problem solving, called TRIZ</li> <li>Co:20 Select and apply the appropriatetechnique based on the opportunity to seize or the problem to tackle</li> </ul>
33.	III	MOE2030	MOOC Course	Co:6 Identify the real application and practices of the courses studied, at the industry level. Co:7 Recognize various modeling ,analysis and validation techniques adopted at industries. Co:8 Demonstrate the issue at design,manufacturing and assembly level

34.	III	MOE2040	Condition Monitoring and Signal Processing	<ul> <li>Co:10 Identify the maintenance scheme, their scope and limitations – apply the maintenance strategies to various problems in the industrial sectors.</li> <li>Co:11 Analyze for machinery condition monitoring and explain how this compliments monitoring the condition</li> <li>Co:12 Develop an appreciation for the need of modern technological approach for plant maintenance to reduce the maintenanceexpenditure.</li> <li>Co:13 Emphasizes on case studies that require gathering information using the moderntesting equipment and processing it to identify the malfunction in that system.</li> <li>Co:14 Identify vibration measurement, lubrication oil analysis.</li> </ul>
35.	III	MOE2050	Aircraft Conceptual Design	<ul> <li>Co:12 Understand the design process of aircraft and decide the aircraft configuration.</li> <li>Co:13 Choose type of power plant as per flight regime.</li> <li>Co:14 Decide the fuselage layout as per type of aircraft.</li> <li>Co:15 Design the wing for type of aircraft andits wing loading.</li> <li>Co:16 Accurately evaluate lift, drag and massfor design synthesis process.</li> <li>Co:17 Examine the influence of various design requirements on the configuration of an aircraft to derive an optimized design.</li> </ul>
36.	III	MTE3021	Dissertation Phase I	Co:1 Explain the contributions of various researchers in the field of thermal engineering after carrying out literature survey from reputed journals Co:2 Recognize the gap in the research and define a problem statement Co:3 Explain significance and applicability of problem statement Co:4 Summarize and present technical data in report format
37.	III	MTE3031	Dissertation Phase II	Co:1 Outline the work plan for problem statement Co:2 Identify the proper modeling and analysistool Co:3 Reproduce the preliminary results ofproblem statement Co:4 Summarize and present technical data inreport format
38.	IV	MTE4011	Dissertation Phase III	Co:1 Explain the issues related to methodadopted in solving the problem Co:2 Select proper technique in solving theproblem Co:3 Compare the results with available literature.
39.	IV	MTE4021	DissertationPhase- IV	Co:1 Design new methodology to address the problem Co:2 Justify the results obtained from new methodology Co:3 Write technical report and defend work.

- Department Name :- Mechatronics Engineering
- UG Program Name: B.Tech. Mechatronics Engineering
- Vision and Mission :-

**Vision:** To transform the department into center of excellence by synergizing teaching, learning and research to produce globally competent Mechanical Engineers who are innovative, entrepreneurial, and successful in advanced fields of engineering and research.

### Mission:

- To impart better quality education to the students for grooming them into globally competent mechanical engineers by building their capacity and strengthening skills.
- To collaborate with research organizations, reputed educational institutions, industries and alumni for excellence in teaching, research and consultancy practices.
- To develop state of the art facilities to stimulate faculty, staff and students to create, analyze, apply and disseminate knowledge.

Sr. No.	Program Outcomes
25.	Apply the knowledge of mathematics, science, engineering fundamentals, and mechanical
	engineering to the solution of complex engineering problems.
26.	Identify, formulate, review research literature, and analyze complex mechanical engineering
	problems reaching substantiated conclusions using first principles of mathematics, natural sciences,
	and engineering sciences.
27.	Design solutions for complex mechanical engineering problems and design system components or
	processes that meet the specified needs with appropriate consideration for the public health and
	safety, and the cultural, societal, and environmental considerations.
28.	Use research-based knowledge and research methods including design of experiments, analysis and
	interpretation of data, and synthesis of the information to provide valid conclusions.
29.	Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools
	including prediction and modeling to complex mechanical engineering activities with an
	understanding of the limitations.
30.	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and
	cultural issues and the consequent responsibilities relevant to the professional engineering practice.
31.	Understand the impact of the professional engineering solutions in societal and environmental
	contexts, and demonstrate the knowledge of, and need for sustainable development.
32.	Apply ethical principles and commit to professional ethics and responsibilities and norms of the
	engineering practice.
33.	Function effectively as an individual, and as a member or leader in diverse teams, and in
	multidisciplinary settings.
34.	Communicate effectively on complex mechanical engineering activities with the engineering
	community and with society at large, such as, being able to comprehend and write effective reports
	and design documentation, make effective presentations, and give and receive clear instructions.

35.	Demonstrate knowledge and understanding of the engineering and management principles and
	apply these to one's own work, as a member and leader in a team, to manage projects and in
	multidisciplinary environments.
36.	Recognize the need for, and have the preparation and ability to engage in independent and life-long
	learning in the broadest context of technological change.

Sr. No.	Program Specific Outcomes
5.	Apply the knowledge of basic sciences, analytical skills and modern computing tools to design,
	perform and analyse experiments to meet desired goals using knowledge of Mechatronics
	Engineering.
6.	Use the principles of solid mechanics, fluid mechanics, strength of materials, advanced functional materials and manufacturing processes to design, manufacture, and commissioning of mechatronics systems.
7.	Apply concepts of circuit analysis, analog and digital electronics, controls, electricdrives, instrumentation, power systems, programming languages to design and develop automation of
	mechatronics systems.

# 2021-22

Semester	Course Name	Course Code	Course Outcome
Semester-III	Embedded Systems	MC201	1. Explain the fundamentals of Embedded Systems.
			2. Identify embedded peripheral for applications
			<b>3.</b> Select the appropriate microcontroller for given application
			<b>4.</b> Differentiate the embedded systems on the basis of its
			characteristics
	Fundamentals of	MC203	1. Identify various elements of mechatronics systems.
	Mechatronics		2. Select appropriate sensor/Actuator/controller/control
			algorithm for different applications
			3. Develop PLC/ microcontroller based applications.
	Engineering	MC205	1. Calculate the resultant for concurrent and non-concurrent
	Mechanics		force systems.
			2. Draw the free body diagram and apply the equations of
			equilibrium to 2D and 3D rigid bodies
			3. Compute the moment of inertia of standard composite
			section.
			4. Explain particle dynamics and compute various forms of
			stored energy under gradually and suddenly applied load conditions
			5. Applythe D'Alembert's, Work Energy and collision principle
			to analysis in plane motion bodies.
	Fluid Mechanics	MC207	1. Define, calculate, measure properties of fluid
	and Fluid		2. Apply Continuity equation, Bernoulli's equation, Equation of
	Machines		motion and Momentum equation for different flow system.
			<b>3.</b> Estimate forces acting on fluid & amp; different energy losses
			in fluid flow.
			<b>4.</b> Estimate forces acting on bodies submerged in fluid.
			5. Apply basic concept of fluid mechanics for dimensional
			analysis
			<b>6.</b> Select proper hydraulic machine for proper application
			& perform hydraulic design.

Manufacturing Processes and	MC209	1.	Select suitable Engineering forming process for production
Machine Tools		2.	of component of required specification  Select casting as manufacturing process suitable for the
			component design and production volume
			Select suitable furnaces in casting process as per requirement.
		4.	
		5.	Illustrate and identify main parts of machine tools for metal cutting operations.
		6.	Explain working principle of grinding & non-conventional
		•	machining processes.
Electrical Machines	MC211	1.	Explain basic principles and concepts regarding electrical machines.
Machines		2.	Describe construction, working and types of Transformers
			and DC machines.
		3.	Explain construction, working and control for Induction and
		4.	synchronous machines.  Analyze performance characteristics of AC and DC
			machines.
<del></del>	CYYALEA		Identify industrial applications for special motors
Environmental Science	SH2173	1. 2.	Discuss the importance and sensitivity of environment.  Interpret the over exploitation of natural resources and follow
Science		۷.	the environmental ethics.
		3.	Explain methods to protect environment and prevent
		4	environmental pollution.
		4.	Apply their knowledge and skills to solve environment related problems
Engineering	MC251	1.	Explain the various laws studied in engineering mechanics.
Mechanics Lab		2.	Calculate the forces and deflection in structural member.
		3.	Develop the physical sense towards the engineering mechanics term and establish relation between them.
Fluid Mechanics	MC253	1.	Verify and apply Bernoulli's Theorem.
and Fluid	1120200	2.	Determine coefficient of discharge of fluid flow apparatus.
Machines lab-I		3.	Calculate various losses through pipes.
		4.	Draw performance characteristic curves for pumps, compressors and turbines
		5.	Evaluate various efficiencies of pumps, compressors and
77	1.5025		turbines.
Fundamentals of Mechatronics Lab	MC255	1. 2.	Develop PLC ladder logic for given engineering problem.  Integrate electrical, electronic and mechanical components.
Mechan Unics Lau		3.	Justify the use of PLC and Microcontroller in mechatronic
			system design
Workshop Practice	MC257	6.	Perform experiments on AC and DC machines
-I (Electrical		7.	Demonstrate testing and control of various electrical machines.
Machine Lab)		8.	Plot the characteristics of various electrical machines.
		9.	Analyze the performance parameters of electrical machines.
Tashnisal A-4443-	MC250		Compare the performances of the electrical machines
Technical Aptitude -I	MC259	1. 2.	Apply the knowledge acquired during the course work.  Develop the ability of problem solving.
-			The second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of th
Environmental	SH2603	1.	Utilize scientific methods to solve environmental problems.
Science Project		2.	Evaluate technologies for restoration of degraded
		2	environment.
		3. 4.	Develop presentation and report writing skills.  Develop as an individual and in group leadership quality
		-f•	20.010p as an morrison and in group readership quanty

Professional Leadership Skills  Interpersonal	SH2633 SH2613	1. 2. 3.	Explain the traits of a leadership through real life examples. Exhibit the ability to work effectively in team. Prepare a presentation as per the audience and context requirements.  Exhibit interpersonal communication skills.
Skills	5112013	2.	Demonstrate decision-making skills.
('Jeevanvidya' for		3.	Apply conflict resolution styles appropriate in different
Work Life			situations.
Balance)		4.	Demonstrate skills to manage balance in work and life.
,		5.	Apply Jeevanvidya wisdom in day to day life.
Innovation Tools	SH2693	1.	Explain structured approach to define the problem with
and Methods for		2	every possible detail, identify conflicts and solve them
Entrepreneurs		2.	Apply User Journey Map to the selected problem to show user interaction at various stages
		3.	Analyze the solutions provided by competitors for
		٥.	effectiveness and gaps if any.
Personal	SH2593	1.	Develop skills to build self-esteem and positive attitude.
Effectiveness and		2.	Develop interpersonal skills characterized by effective
Body Language			communication and conflict resolution.
		3.	Discover ways to overcome procrastination.
		4.	Demonstrate responsiveness towards stress and health
		5.	issues. Interpret the non-verbal behaviour of a person.
German Language-	SH 2733	<u> </u>	Interpret the language if the next person is speaking slowly
Basic Level	511 2755	т.	and clearly.
Busic Zever		5.	Make use of the language in routine life with the routing
			topics like family, shopping, work etc.
		6.	Demonstrate the language by self-introduction in German
			with simple sentences.
Japanese Language	SH2713	1.	
- Level III		2.	Identify the sentence patterns.
		3.	Explain insights about the communication required for living in Japan.
		4.	Interpret Japanese work ethics required in their professional
		••	career.

Semester	Course Name	Course Code	Course Outcome	
Semester-IV	Engineering	SH2083	1. Illustrate curve fitting concepts in Mechatronics related	
	<b>Mathematics</b> -		problems.	
	III		2. Compute problems on probability distribution by using	
			different formulae.	
			<b>3.</b> Evaluate differential equation using appropriate concept.	
			<b>4.</b> Analyze the problem and apply the concept of partial	
			differential equations.	
			5. Evaluate Laplace & inverse Laplace transform of function	
			and solve ordinary differential equations and linear time	
			invariant systems.	
			<b>6.</b> Develop Fourier series of periodic functions.	
	Strength of Materials	MC202	1. Determine different types of stresses and strains induced in	
			any machine component.	
			2. Develop shear force and bending moment diagram for	
			different types of beam.	
			3. Determine stress distribution for various cross sections of	
			beam.	
			<b>4.</b> Estimate the deflection of beams by analytical and graphical	
			method	
			5. Analyze axially loaded column for different end conditions.	
	Microcontrollers	MC204	1. Explain the fundamentals of Embedded Systems.	
			<b>2.</b> Write programs in Embedded C	
			3. Interface peripherals with PIC microcontroller	

		4.	Design the system using a PIC microcontroller.
Kinematics &	MC208	1	Select suitable mechanisms for given application
Dynamics of		2.	Analyze the mechanism for velocity and acceleration
Machines		3.	Design the CAM for given condition
		4.	Apply appropriate power transmission method for
			mechanical system
		5.	apply different techniques to balance the rotary and
			reciprocating systems
		6.	Evaluate and analyze the parameters affecting on stability of
			spinning bodies due to gyroscopic effect
Computer	MC210	1.	Build Object Oriented Programs.
Programming C++	1,10210	2.	Elaborate the concepts of "inline function", "friend function",
			"function overloading" and "operator overloading".
		3.	Extend the program by using inheritance.
		4.	Use memory management technique "constructors" &
			"destructors".
		5.	Handle different file handling techniques like "Create',
			"Open", "Close" files and perform "Read", "Write" and
			"Append" operations.
		6.	Write C <sup>++</sup> program to draw simple geometric shapes.
Microcontroller lab	MC250	1.	Write embedded C programs for on chip and off chip
			peripherals
		2.	Interface peripherals with PIC microcontroller.
		3.	Compile debug and test logic on PIC microcontroller.
CAD Modeling Lab	MC252	1.	List the different CAD software used for mechanical
			engineering.
		2.	Create sketches of machine parts.
		3.	Model machine parts using CAD software.
		4.	Assemble machine Parts by using CAD tool.
		5.	Generate detailed drawing views.
		6.	υ
Kinematics &	MC254	1.	Select suitable mechanism for given application
Dynamics of		2.	Analyse the mechanism by using different methods.
Machines Lab		3.	Design the CAM for given condition
		4.	Analyse the controlling force and stability of governors.
		5.	Apply different techniques to balance the rotary systems
			Evaluate and analyze the parameters affecting on stability of
			spinning bodies due to gyroscopic effect
Computer	MC256	1.	Build Object Oriented Programs.
Programming C++	1,1020	2.	Elaborate the concepts of "inline function", "friend function",
Lab			"function overloading" and "operator overloading".
		3.	Extend the program by using inheritance.
		4.	Use memory management technique "constructors" &
			"destructors".
		5.	Handle different file operations like "Create', "Open",
			"Close" files and perform "Read", "Write" and "Append"
			operations.
		6.	Write programme to draw simple geometric shapes.
Workshop Practice -	MC258	1.	Demonstrate effect of variables such as speed, feed and depth
II			of cut on machining process
		2.	Produce given joint by MIG welding process.
		3.	Produce welding run on S.S. by TIG welding.
		4.	Produce given job with proper taper and V threading within
			dimensional tolerances $\pm$ 0.2 m.m. on diameter and $\pm$ 0.5
			m.m. on length. (Job – A)
Technical Aptitude -	MC260	1.	Apply the knowledge acquired during the course work.
II	G	2.	Develop the ability of problem solving.
Professional	SH2633	1.	Explain the traits of a leadership through real life examples.
Leadership Skills		2.	Exhibit the ability to work effectively in team.

		3. Prepare a presentation as per the audience and context
		requirements.
Interpersonal Skills	SH2613	1. Exhibit interpersonal communication skills.
('Jeevanvidya' for		2. Demonstrate decision-making skills.
Work Life Balance)		3. Apply conflict resolution styles appropriate in different
		situations.
		<b>4.</b> Demonstrate skills to manage balance in work and life.
		5. Apply Jeevanvidya wisdom in day to day life.
Innovation Tools and	SH2693	1. Explain structured approach to define the problem with
Methods for		every possible detail, identify conflicts and solve them
Entrepreneurs		2. Apply User Journey Map to the selected problem to show
		user interaction at various stages
		3. Analyze the solutions provided by competitors for
		effectiveness and gaps if any.
Personal	SH2593	1. Develop skills to build self-esteem and positive attitude.
Effectiveness and		2. Develop interpersonal skills characterized by effective
<b>Body Language</b>		communication and conflict resolution.
		<b>3.</b> Discover ways to overcome procrastination.
		<b>4.</b> Demonstrate responsiveness towards stress and health
		issues.
		5. Interpret the non-verbal behaviour of a person.
German Language-	SH 2643	<b>4.</b> Interpret the language if the next person is speaking slowly
Advanced Level		and clearly.
		<b>5.</b> Make use of the language in routine life with the routing
		topics like family, shopping, work etc.
		<b>6.</b> Demonstrate the language by self-introduction in German
		with simple sentences.
Japanese Language ·	SH2623	1. To be able to make basic conversations in various situations.
Level IV		2. To recognize the sentence patterns.
		3. To improve Japanese Language proficiency.
		<b>4.</b> To give students insights about the communication required
		for living in Japan.
		5. To expose students to the Japanese work ethics required in
		their professional careers.

- Department Name: Science and Humanities
- UG Program Name :-\_F.Y.B.Tech.

Sr. No.	Semester	Course Code	Course Name	COs	Course Outcome
	I/II	SH 1034	Engineering Chemistry	CO1	Relate to the basic concepts of chemistry in engineering
				CO2	Select the correct instrumental techniques for the examination of materials.
1.				CO3	Examine water quality for industrial and domestic sector and suggest remedial measures
				CO4	Illustrate construction, working and applications of batteries and fuel cells
				CO5	Identify causes of corrosion and its remedial measures
				CO6	Compare types and quality of fuels and lubricants
	I	SH 1054	Engineering	CO1	Sketch the curve with full justification.
			Mathematics I	CO2	Apply the properties of special functions to evaluate integral.
				CO3	Evaluate double integral and change the order of the integration.
2.				CO4	Evaluate area bounded between two curves, mass of Lamina, moment of inertia.
				CO5	Prove the results of partial differentiation.
				CO6	Apply partial differentiation for evaluating and proving the results based on Errors approximations ,minima and maxima
	I/II	SH1292	Electrical	CO1	Solve magnetic circuits, d.c. and a.c. electric circuits.
			Engineering	CO2	Describe construction, working and application of transformers.
3.				CO3	Describe construction, working and application of different types of commonly used rotating machines.
3.				CO4	Classify power converters on the basis of their applications.
				CO5	Suggest suitable capacity of wires, cables switchgear and illumination system for low voltage electrical installations.
	I/II	SH1331	Programming for Problem Solving	CO1	Explain the basic terminology and concepts of C programming language.
				CO2	Design Algorithm and Flow Chart for the given problem.
4.				CO3	Write, Compile and execute 'C' programs for a given problem.
				CO4	Analyze the given C Program to predict the output
				CO5	Evaluate the C program to resolve the errors
	I/II	SH1533	Engineering Chemistry Lab	CO1	Examine the materials by using analytical instruments.
5.				CO2	Identify the quality of water for industrial and domestic purposes.
				CO3	Apply the knowledge of electrochemistry for design of various cells and batteries.

				CO4	Select proper Lubricant for different machines
				CO4	according to working condition.
				CO5	Inspect the quality of fuel.
	I/II	SH1911	Programming for Problem Solving	CO1	Describe orally the basic terminology and concepts of C programming language.
			Lab	CO2	Develop algorithm and flow chart for the given problem.
6.				CO3	Write, compile and execute 'c' programs for a given problem.
				CO4	Evaluate the C program to resolve the errors.
				CO5	Debug the program to predict the correct output.
	I	SH1832	English	CO1	Demonstrate reception skills of language
			Proficiency Lab.	CO2	Communicate using oral and written mode.
7.			I	CO3	Make use of English language with grammatical accuracy.
				CO4	Articulate correctly the frequently used words using phonemic transcriptions
	I	SH1851	Engineering	CO1	Acquire skills in basic engineering practice.
			Practice	CO2	Use of hand tools and power tools.
			Lab. I	CO3	Develop sheet metal model for specific application.
8.				CO4	Understand the various operations performed in
				CO4	machine shop.
				CO5	Perform different joining operations
				CO6	Perform pipe fittings operations.
	I/II	SH1311	Engineering Physics	CO1	Compare the behaviour of mechanical system under damping and external periodic force
				CO2	Use principle of interference in thin reflecting films with uniform and non-uniform thickness
9.				CO3	Solve problems of 1-d potential box using principles of quantum physics
				CO4	Illustrate the types of semiconductor, hall effect, basics of laser production with application and fiber optics communication
	II	SH1024	Engineering Mathematics II	CO1	Use the concepts of matrices that serve as an essential basis for several computational techniques.
				CO2	Solve the differential equations by choosing proper method of solution.
10.				CO3	Solve the problems on orthogonal trajectories, simple electrical circuits, andheat flow by applying the methods of ordinary differential equations.
				CO4	Use the relevant method for solving simultaneous algebraic linear equations.
				CO5	Apply the relevant numerical method for interpolating the polynomial.
				CO6	Apply appropriate numerical method to compute the solution of ordinary differential equations.
	I/II	SH1133	Engineering Graphics	CO1	Determine the location of the location and orientation of point, line, and plane with respect to reference planes to draw their projection.
11.				CO2	Develop the projection of various types of solids in various conditions.
				CO3	Develop section views and true shape section of various types of solids
				CO4	Identify the need of development of lateral surfaces and apply the same in engineering drawing.

				CO5	Develop orthographic views of an object to convert pictorial view into two-dimension (2D) view.
				CO6	Develop isometric view to convert two-dimension (2D) view to pictorial view.
	I/II	SE1012	Basics of Electronics	CO1	Recognize basic semiconductor components and devices used for different electronic applications.
12.			Engineering	CO2	Explain working principle of diode, transistor and their applications.
12.				CO3	Describe the number system, basic structure of computer and processor architecture.
				CO4	Analyze the analog and digital electronic circuits using discrete components.
	I/II	SE1052	Basics of Civil	CO1	Apply fundamental knowledge of civil engineering.
			Engineering	CO2	Identify building components and materials used in construction along with concepts of suitability and safety of buildings.
13.				CO3	Use basic principles of planning in the building design and processes involved in the property transactions.
				CO4	Determine horizontal and vertical distances using modern surveying instruments.
				CO5	Illustrate the infrastructural facilities.
	I/II	SE1132	Green Technology	CO1	Understand the principles of green chemistry and engineering
				CO2	Design processes that are benign and environmentally viable
14.				CO3	Design processes and products that are safe and hazard free
				CO4	Learn to modify processes and products to make them green safe and economically acceptable
	I/II	SE1451	Creativity, Design Thinking and	CO1	Learn structured approach to creativity, problem identification and problem solving in a new venture context
15.			Entrepreneurial Mindset	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions
				CO3	Identify, validate and define specific innovation opportunities through Jobs-to-be-Done methodology
				CO4	Develop mindset of a successful entrepreneur
	I/II	SH1513	Engineering Physics	CO1	Develop the skill of performing the experiments relevant to theories in optics, ultrasound,
			Lab	CO2	semiconductors, oscillations and magnetic materials  Use different measuring tools and techniques to
16.				CO3	Conduct the experiments  Give the physical interpretation for observed measurements and determine the relevant physical
				CO4	quantities  Write a lab report which communicates scientific information in a clear manner.
	I/II	SH1553	Engineering Graphics Lab	CO1	information in a clear manner.  Determine the location and orientation of point, line, and plane with respect to reference planes to draw
17.				CO2	their projection.  Develop the projection of various types of solids in various conditions.
				CO3	various conditions.  Develop section views and true shape section of various types of solids

				CO4	Identify the need of development of lateral surfaces
				CO5	and apply the same in engineering drawing.  Develop orthographic views of an object to convert
					pictorial view into two-dimension (2D) view.  Develop isometric view to convert two-dimension
				CO6	(2D) view to pictorial view.
	I/II	SE1512	Basics of Electronics	CO1	Demonstrate use of various electronic components & equipment's for building applications.
			Engineering Lab	CO2	Build the circuits using Diode, Transistor Electronics Devices.
18.				CO3	Construct various applications using Operational Amplifier like Amplifiers.
				CO4	Test the basic logic gates, adders & substractors.
	I/II	SE1552	Basics of Civil	CO1	Draw dimensioned sketch/plan of building
19.			Engineering Lab	CO2	Plan building using principles and bye laws.
				CO3	Perform horizontal and vertical measurement.
				CO4	Use modern surveying techniques.
	I/II	SE1632	Green Technology Lab	CO1	Illustrate the concept of green technology in energy and building sector.
20.				CO2	Prepare energy and water budget for a building.
				CO3	Design rainwater harvesting for a small catchment area.
	I/II	SE1671	Creativity,	CO4	Analyze air quality by using HC/CO analyzer.  Learn structured approach to creativity, problem
	1/11	SEIO/I	Design Thinking and	CO1	identification and problem solving in a new venture context.
21.			Entrepreneurial Mindset Lab	CO2	Apply design thinking approach to identify innovation opportunities and develop solutions.
			Williaset Lab	CO3	Develop mindset of a successful entrepreneur
	II	SH1621	English Proficiency Lab.	CO1	Demonstrate writing skills through letters, circulars, notices, memos, and emails
			II	CO2	Apply report writing skills.
22.				CO3	Organize message in appropriate structures.
				CO4	Prepare job application addressing requirements of the post.
	II	SH1641	Engineering Practice Lab II	CO1	Explain & demonstrate facts, concept & techniques of manufacturing of various items in technology area.
22				CO2	Develop quality & safety consciousness while working in workshop.
23.				CO3	Develop respect towards effort, skill &labour work in manufacturing.
				CO4	Demonstrate ability to read drawing & carry out Smithy, Tin smithy, Welding & plumbing operations.
	I/II	SH1891	Engineering Exploration and	CO1	Explain the role of an engineer as a problem solver
			Exploration and Design Project	CO2	Design engineering solutions to complex problems utilizing multi-disciplinary systems approach.
24.				CO3	Examine a given problem using process of engineering problem analysis.
				CO4	Build simple systems/prototypes using engineering design and development process.
				CO5	Analyze engineering solutions from ethical and sustainability perspectives.

		1		,	1
				CO6	Apply basics of engineering project management skills in project development.
	I/II	SE1072	Thermodyna-		Apply thermodynamics principles to mechanical
			mics	CO1	engineering applications
25.				CO2	Describe entropy, change in entropy and increase of entropy principle.
				CO3	Differentiate between available and unavailable energy with examples.
				CO4	Apply mathematical fundamental to study the
					properties of steam, gas and gas mixtures.
26.	I/II	SE1572	Thermodyna- mics Lab	CO1	Conduct test to find properties of oils
				CO2	Explain boilers and mountings
				CO3	Estimate the properties of steam, interpret and comment on the results.
27.	I/II	SE1092	Engineering Materials	CO1	Classify materials on the basis of various properties.
			Materials	CO2	Estimate different mechanical properties using destructive testing methods.
				CO3	Select suitable non-destructive testing method for flaw detection in component.
				CO4	Select suitable material for different engineering applications.
				CO5	Identify the recycling issues associated with various
28.	I/II	SE1592	Engineering	CO1	engineering materials.  Illustrate stress strain diagram for different
20.	1/11	SE1392	Materials Lab	COI	materials.
			1/14/011415 24/5	CO2	Use Rockwell Hardness testing machine to measure
					hardness of material.
				CO3	Measure impact strength of the metals
				CO4	Determine fatigue strength of metals.
				CO5	Determine flaws in the component using non-destructive testing methods.
				CO6	Explain working principle of emission spectrometer.
29.	I/II	SE147	Introduction to Artificial	CO1	Explain the different terminologies used in Artificial Intelligence.
			Intelligence	CO2	Identify engineering and societal problems that can be efficiently solved by artificial intelligence techniques.
				CO3	Demonstrate the search algorithms to solve problems.
				CO4	Apply Python Programming in AI based applications.
				CO5	Illustrate the concepts of machine learning.
				CO6	Describe the robot tasks, architecture and usage in real world.
30.	I/II	SE169	Introduction to Artificial	CO1	Identify Real Time Problems with their AI solutions.
			Intelligence Lab	CO2	Demonstrate and explore the functionalities in
					different programming frameworks & S/W
				902	technologies.
				CO3	Solve problems using python programming concepts.
				CO4	Implement supervised learning algorithms using
					python programming to solve the real time
					problems.

31.	I/II	SH1792	Electrical	CO1	After successful completion of the course, students will be able to,
			Engineering Lab	CO2	Acquaint with the basic concepts and properties of
				002	electrical circuits and awareness about
				CO3	safety precautions.
				CO4	Select proper meter/s for measuring electrical
				CO5	quantities during experiments.  Explain various electrical circuits (DC, AC) and
				003	magnetic circuits through laboratory.
32.	I	SH1583	Japanese Language Lab	CO1	Demonstrate Japanese scripts through oral and written communication.
			Level I	CO2	Express themselves by using simple sentences and responses to questions.
				CO3	Demonstrate effective listening.
				CO4	Make use of Japanese etiquette
33.	I	SH1602	German	CO1	Make use of everyday expressions and basic phrases
			Language Lab Level I		aimed at the satisfaction of needs of a concrete type.
				CO2	Express him/herself and others and ask and answer
					questions about personal details such as where
					he/she lives, people he/she knows and things he/she has.
				CO3	Make use of the basic grammar concepts correctly.
				CO4	Demonstrate reading and writing skills.
34.	II	SE1662	Japanese	CO1	Converse in Standard Japanese to perform basic
			Language Lab		communicative tasks (e.g., exchange
			Level II		greetings/personal information, give time/directions/daily activities)
				CO2	Make use of Japanese vocabulary effectively.
				CO3	Demonstrate reading comprehension
35.	II	SH1681	German Language Lab	CO1	Make use of everyday expressions and basic phrases aimed at the satisfaction of needs of a concrete type.
			Level II	CO2	Express him/her and others and ask and answer
					questions about personal details such as where
					he/she lives, people he/she knows and things he/she has.
				CO3	Make use of basic grammar concepts correctly.
				CO4	Demonstrate reading and writing skills.
36.	I/II	SE1431	Basics of Mechanical	CO1	Explain different power generation systems.
			Engineering	CO2	Select appropriate energy conversion device for the given application.
				CO3	Classify vehicles on the basis of different
				CO4	parameters.  Compare two stroke and four stroke IC engines.
				CO5	Describe different transmission devices in a given system.
				CO6	Choose suitable materials and manufacturing
2=		GE4 (=1	D	601	processes for a given application.
37.	I/II	SE1651	Basics of Mechanical	CO1	Explain the different components of power generation systems.
			Engineering Lab	CO2	Identify the systems and components of vehicle.
		1			

CO3	Distinguish between two stroke and four stroke engines.  Carry out day to day life maintenance of machines.
CO5	Explain the different components of power generation systems.

## Department of Management Studies (MBA)

- Department Name :- Department of Management Studies (MBA)
- PG Program Name :-Management Studies
- Vision and Mission :-

## Vision:-

Achieving excellence in academics and research to develop globally competent and socially responsible managers.

## Mission:-

- 1. To leverage innovation and excellence in academic design, delivery and assessment to ensure holistic development of students for employability, entrepreneurship and higher education.
- 2. To design and keep the curricula updated, based on changing needs of industry and society worldwide.
- 3. To build and maintain world-class infrastructure, for sustained learning, development and research.
- 4. To provide an environment that encourages creativity, analysis and critical thinking.

Sr. No.	Program Outcomes
1.	<b>PO1:</b> Apply knowledge of management theories and practices to solve business problems.
2.	<b>PO2:</b> Foster Analytical and critical thinking abilities for data-based decision making.
3.	PO3: Ability to develop Value-based Leadership ability.
4.	<b>PO4:</b> Ability to understand, analyze and communicate global, economic, legal, and ethical
	aspects of business.
5.	<b>PO5:</b> Ability to lead themselves and others in the achievement of organizational goals,
	contributing effectively to a team environment.
6.	<b>PO6:</b> Be capable of self-education and clearly understand the value of lifelong learning.
7.	<b>PO7:</b> Be familiar with modern statistical and software tools to analyze business problems.
8.	<b>PO8:</b> To examine critically for self-assessment and take corrective measures accordingly
	without external feedback.

Sr. No.	Semester	Course Code	Course Name	Course Outcome
1.	I	MGC 1012	Principles of	Interpret classical & modern theories.
			Management	Apply functions of management in real world scenarios
				Communicate effectively about management decisions.
				Analyze recent trends in live management case studies
				Evaluate the current business landscape and trends.
2.	I	MGC1032	Managerial	Evaluate microeconomic and macroeconomic variables and
			Economics	its implication in business decision making.
				Identify the competitive and global market for making larger
				presence and leadership.
				Assess and evaluate macroeconomic variables for selection
				of best alternatives to maximize profit and value of an
				organization
				Identify issues related to development and governance issue
				that hinder the development
				Analyse the sectoral development and policies initiated by
2	т	MGG1052	T' ' 1 A	the governments to improve.
3.	I	MGC1052	Financial Accounting	Comprehend the fundamental aspects concerning financial
			and Analysis	accounting.
				Prepare various accounts and financial statements.
				Analyse and interpret the financial statements by associating
				the tools and techniques for effective decision-making.
				Apply accounting theory and information as a tool for
4.	I	MGC1072	Local & Dusiness	solving managerial problems  Develop on understanding about micro & macro elements of
4.	1	MGC1072	Legal & Business Environment	Develop an understanding about micro & macro elements of business environment.
			Environment	Analyse the major and minor factors affecting the
				functioning of business.
				Provide an overview of important laws that have a bearing
				on the conduct of business in India.
				on the conduct of business in Illula.

				Analyse the international environment and strategies adopted by firms to expand globally.
				Analyse the dynamics of business environment and its impact on the conduct of business.
5.	I	MGC1092	Marketing	Discuss Core concept of marketing and the role of marketing
			Management	in business and society.  Develop marketing strategies based on product, price, place
				and promotion.
				Analyse marketing problems and provide solution based on
				a critical examination of marketing information.
6.	I	MGC1112	Organizational	Analyze the conceptual anchors of Organizational behavior
			Behaviour	Identify personal dimensions of personality. Job satisfaction, motivation and learning
				Demonstrate the group dynamics and its applicability
				Explain organizational change and culture effect on working
				relationships
				Apply various leadership styles and conflict management
7	7	MCC1122	O	strategies used in organizations.
7.	I	MGC1132	Quantitative Analysis	Apply basic mathematical and statistical tools.  Summarize data visually and numerically.
				Demonstrate analytical skill for solving business problems.
				Interpret results from decision making perspectives
8.	I	MGC1152	Indian Ethos and	Interpret the variable values in morality
			Business Ethics	Propose strategies for maximizing personal growth and
				productivity of employees.
				Apply value-based management and ethical practices in all functional areas of management
				Develop ethical decision-making capabilities
				Comprehend and practice the way of righteousness in the
				Indian mythological literature
9.	I	MGC1172	Business	Write business letters in a proper, formal format
			Communication	Demonstrate the methods of oral presentation both in a formal and informal environment
				Tormar and informar chynomicit
				Review the importance of communication relative to
				Review the importance of communication relative to securing employment, with emphasis on using both verbal
				securing employment, with emphasis on using both verbal and non-verbal communication and their impact
				securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal,
				securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications
10.	I	MGC1192	Advanced Excel	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each
10.	I	MGC1192	Advanced Excel	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks
10.	I	MGC1192	Advanced Excel	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.
10.	I	MGC1192	Advanced Excel	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create
	-			securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports
10.	I	MGC1192 MGC 1212	Advanced Excel  MS Power Point	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports  Demonstrate applying themes and layouts to slides.
	-			securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports
	-			securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports  Demonstrate applying themes and layouts to slides.  Demonstrate inserting pictures, graphics, shapes, and other
	-			securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports  Demonstrate applying themes and layouts to slides.  Demonstrate inserting pictures, graphics, shapes, and other things.  Demonstrate working with sound and videos, master slides, smart art.
	-			securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports  Demonstrate applying themes and layouts to slides.  Demonstrate inserting pictures, graphics, shapes, and other things.  Demonstrate working with sound and videos, master slides, smart art.  Use existing PowerPoint presentations using advanced
11.	I	MGC 1212	MS Power Point	securing employment, with emphasis on using both verbal and non-verbal communication and their impact  Prepare the student with the communication tools-verbal, non-verbal and written-and the practical applications inherent in each  Customize the formatting of spreadsheet in Excel.  Protect data in worksheets & workbooks  Design the structure of various template.  Consolidate & analyze data from multiple sheets & create reports  Demonstrate applying themes and layouts to slides.  Demonstrate inserting pictures, graphics, shapes, and other things.
